**Treaty Series 2965/Recueil des Traités 2965**

United Nations,2019-10-18 In accordance with Article 102 of the Charter and the relevant General Assembly Resolutions, every treaty and international agreement registered or filed and recorded with the Secretariat since 1946 is published in the United Nations Treaty Series. At present, the collection includes about 30,000 treaties reproduced in their authentic languages, together with translations into English and French, as necessary. The Treaty Series, where treaties are published in the chronological order of registration, also provides details about their subsequent history (i.e., participation in a treaty, reservations, amendments, termination, etc.). Comprehensive Indices covering 50-volume-lots are published separately. A Standing Order service is available for the Series and out-of-print volumes are available on microfiche.

**Onze autres avatars de la Belle au bois dormant**

Raymond Terrasse,2014-04-23 Delaissant l'ufologie, et abandonnant les articles de vulgarisation scientifique de ses trois premiers livres, Raymond Terrasse se lance sur les traces de la Belle au bois dormant, à la recherche de variantes possibles. Comme il fut précédé sur ce sentier par d'autres auteurs, Raymond Terrasse leur rend hommage dans son avant-propos, expliquant ainsi le titre du livre.

Physique XXI Marc Séguin,Me Julie Descheneau,Mr Benjamin Tardif,2010-07-05 Physique XXI réinvente le manuel de physique en offrant un outil vraiment convivial au lecteur désireux de comprendre et de maîtriser les lois fondamentales qui régissent les phénomènes physiques. Grâce à sa structure modulaire et flexible, à la clarté de ses démonstrations, à la pertinence des situations concrètes analysées et à la rigueur de la présentation des solutions, cet ouvrage se révèle un véritable partenaire pédagogique, tant pour les élèves que pour les professeurs. Une structure simple, modulaire et flexible Les quatre ou cinq chapitres de chacun des trois tomes sont divisés en sections courtes qui contiennent toutes un glossaire, des questions conceptuelles et des exercices, ce qui permet au lecteur d'évaluer sa compréhension de chaque sujet avant de passer au suivant. Un organigramme placé au début de chaque chapitre montre les liens entre les sections, rendant possibles des parcours adaptés aux besoins de chacun. Une approche concrète, des solutions complètes Les sections sont bâties autour de l'analyse détaillée de mises en situations concrètes. On décrit souvent les situations avant de présenter la théorie nécessaire pour les analyser, rendant ainsi explicites les raisons qui motivent l'introduction de nouveaux éléments de théorie. Les analyses des situations sont très détaillées afin de permettre au lecteur d'apprendre à construire des solutions rigoureuses: les schémas qui doivent accompagner une solution complète sont systématiquement présentés, et on n'omet aucune des étapes logiques et algébriques qui permettent d'obtenir les réponses. Une iconographie riche et intégrée Les illustrations et les photos sont étroitement intégrées au

texte: plusieurs situations et exercices sont basés sur des photos. Les démonstrations et les solutions particulièrement complexes s'appuient sur plusieurs schémas détaillés qui montrent chacune des étapes de l'analyse. Des outils de révision et de synthèse À la fin de chaque chapitre figurent des fiches de synthèse qui exposent de manière schématique les liens principaux reliant les concepts du chapitre, ainsi que des exercices de révision et de synthèse. À la fin du livre se trouve une annexe mathématique complète et détaillée qui permet au lecteur de réviser les notions mathématiques importantes en physique. Le tome C - ONDES ET PHYSIQUE MODERNE traite les sujets suivants : Mouvement harmonique simple Ondes sinusoïdales Ondes stationnaires Effet Doppler Battements Décibels Optique géométrique Optique ondulatoire Relativité Physique quantique Physique nucléaire

### **Decolonisations of Literature Stefan**

Helgesson, 2022-04-15 An Open Access edition of this book is available on the Liverpool University Press website and the OAPEN library. This book sets out to understand how the meaning of 'literature' was transformed in the Global South in the post-1945 era. It looks at institutional contexts in South Africa (mainly Johannesburg), Brazil (São Paulo), Senegal (Dakar) and Kenya (Nairobi), and engages with critical writing in English, Portuguese and French. Critics studied in the book include Antonio Candido, Tim Couzens, Isabel Hofmeyr, Es'kia Mphahlele, Léopold Senghor, Taban Lo Liyong and Ngugi wa Thiong'o. By reading these intellectuals of the Global South as producers of theory and practice in their own right, the book attempts to demonstrate the contingency of what is her called the worlding of the concept of literature. 'Decolonisation' itself is seen as a contingent, non-linear process that unfolds in a

recursive dialogue with the past. In a bid to offer a more grounded approach to world literature, a key objective of this study is therefore to investigate the accumulation of temporalities in institutional histories of critical practice. To reach this objective, it engages the method of conceptual history as developed by Reinhart Koselleck and David Scott, demonstrating how the concept of 'literature' is resemanticised in ways that dialectically both challenge and consolidate literature as a concept and practice in post-colonised societies.

**LE TROISIEME MILLENIUM : jeu de rôle** ,2014-04

Préparez-vous à découvrir l'ampleur et la puissance d'un monde « space opera » d'un genre nouveau. Des êtres extraterrestres aux dons extraordinaires utilisent une technologie hyper-sophistiquée défiant même les lois de notre physique. Luttez, aux services du sage Empire Millénique, contre la puissance terrifiante de la Force Noire. Pilotez des astronefs aussi rapides que la lumière, échangez des tirs de pistolets-lasers avec les terribles Agents noirs, puisez à la source du Psionic qui constitue le pouvoir des Prêtres. Explorez des mondes féériques possédant chacun des merveilles et des dangers à découvrir : un univers aux sinistres périls où la glorieuse

Lumière se bat désespérément contre les sombres Ténèbres. Dans Le Troisième Millénium, vous serez confronté à des rapports de force désastreux, des choix difficiles et des défis impossibles. Mais si vous affrontez le Mal avec bravoure, vous triompherez, car le Grand Concepteur Universel sera à vos côtés à tout jamais ! Ce jeu de rôle est à l'origine de l'univers space opera créé et développé par l'auteur depuis 1992. Le cycle LTM est déjà illustré par la BD TomaxBrenn, le mercenaire impérial et le roman Extrstellaires. D'autres ouvrages vont venir compléter la collection...

Paldaran l'Isolée Alexis Bouzinac, 2014-10-09 Une civilisation avancée sur la planète-capitale de Sýrőj reçoit soudainement des messages en provenance de l'outremonde, de l'étoile de Palбаяаŋ plus précisément. Cela heurte profondément les sentiments religieux de la société matriarcale de Sýrőj et provoque des réactions politiques très violentes : l'obscurantisme va-t-il prendre le dessus sur la raison scientifique ? En filigrane d'une société redevenue plus tolérante et apaisée, la famille d'Éoŵine et Kaңba Marmossaj va œuvrer pendant des décennies à contacter ces mystérieux étrangers, et va même parvenir à traverser l'espace entre les deux étoiles. Leur quête va bouleverser le destin de Sýrőj et de Palбаяаŋ.

**Utopies réalisables** Yona Friedman, 2000 L'utopie sociale naît d'une insatisfaction collective. L'utopie réalisable, c'est la réponse collective à cette insatisfaction. Mais comment répondre collectivement à une insatisfaction ? Et quelles limites une collectivité doit-elle

respecter pour satisfaire à son utopie réalisée ? Telles sont les questions soulevées - avec une grande précision et quelques dessins au trait - par le livre de Yona Friedman, paru pour la première fois en 1974, et revu et augmenté pour cette édition.

### **Un monde meilleur** Désiré

Kraffa,2015-06-04T00:00:00Z Les X2Priens savaient qu'ils vivaient dans un trou noir, car l'univers lui-même est un trou noir. Il n'est pas limité par un horizon, mais recourbé sur lui-même comme la surface d'un objet rond. La belle histoire des humains a commencé par un Big Bang il finira peut-être dans un phénomène singulier appelé Big Crunch : sorte de Big Bang inverse, où l'espace se mettrait à se contracter, et où l'univers redeviendrait très dense et chaud. Les X2Priens savaient que ce qui lie étroitement les univers et les trous noirs peut aussi créer un nouvel univers. De ce fait, l'univers aurait un destin infini, en somme un perpétuel recommencement de sa création. Dans ce cycle sans fin de création dans ces temps lointains et incommensurables évalués à des milliards d'années, les X2Priens pourront peut-être recréer des univers semblables à celui dans lequel ils vivent maintenant ou même quitter le monde physique pour celui de la métaphysique, domaine des dieux. Après des milliards d'années d'évolution ils trouveront peut-être la possibilité d'atteindre la sphère immatérielle, et côtoyer les êtres de lumière la source de leur création ?

### **Le tire-bouchon du bon Dieu** Vladimir Volkoff,2005 **Simon Sol le Solarien** Antoine

Deya,2023-12-22T00:00:00Z Simon Sol le Solarien est difficilement classable, à mes yeux, dans un genre littéraire déterminé. L'histoire, en deux épisodes, touche à la fiction,

la politique, la religion, l'eschatologie... et même l'éénigme policière. Le héros quitte la Terre en 2047 ; il y revient en 2500 ; et dans les changements politiques, idéologiques, économiques, sociologiques et autres de cette lointaine époque, il rencontre dans l'espace-temps réservé aux humains un acteur aussi inattendu qu'incroyable : le diable en personne ! L'aventure comblera, je l'espère, les lecteurs aimant joindre la distraction à la réflexion, l'utopie à la vérité, en un mot : tous ceux qui aiment voguer dans les cieux sans pour autant s'aveugler sur les dures réalités de la terre.

**Out of Earth** Clément Hourseau, 2013-04-13 Un jeune homme, ecrivain, a l'occasion de quitter la Terre. Desapointe par la facon dont a evolue l'espece humaine et ayant l'opportunité de realiser son plus grand reve, il accepte. Il s'apprete a elire domicile dans l'espace. Si j'avais un v u a faire, je quitterais ce monde pourri par les guerres, la cupidite, l'avarice et l'Homme. Peu importe les dangers que cela impliquerait, j'embarquerais sans hesiter a bord du premier vaisseau s'envolant en direction des etoiles. Quitte a vivre dans l'obscurite, je prefererais celle de l'espace a celle de l'Homme. L'Homme n'est pas une erreur de la Nature. C'est un prototype dont la seule particularite est d'avoir ete programme pour s'autodetruire en cas d'echech, sans meme en prendre conscience.
