The Fall of the House of Labor David Montgomery,1987 This book studies the changing ways in which American industrial workers mobilised concerted action in their own interests between the abolition of slavery and the end of open immigration from Europe and Asia. Sustained class conflict between 1916 and 1922 reshaped governmental and business policies, but left labour largely unorganised and in retreat. The House of Labor, so arduously erected by working-class activists during the preceeding generation, did not collapse, but ossified, so that when labour activism was reinvigorated after 1933, the movement split in two. These developments are analysed here in ways which stress the links between migration, neighbourhood life, racial subjugation, business reform, the state, and the daily experience of work itself.

Hard Work Melvyn Dubofsky,2000 This welcome collection encapsulates the evolving thought of one of American labor history's most prominent scholars. Melvyn Dubofsky's accessible style and historical reach mark his work as required reading for students and scholars alike. Hard Work juxtaposes Dubofsky's early and recent writings, forcefully suggesting how present and past interact in the writing of history. In addition to solid essays on various aspects of labor history, including western working-class radicalism, U.S. labor history in transnational and comparative settings, and the impact of technological change on the American worker movements, this volume provides an invaluable I was there perspective on the academic and political climate of the 1960s and early 1970s and on the development of labor history as a discipline over the past four decades. An exploration of some of American labor's central themes by a giant in the field, Hard Work is also a compelling narrative of how one scholar was drawn to labor history as a subject of study and how his approach to it changed over time.'
