Modern Foreign Language Study

**The Book of Languages** Mick Webb,2015-04-14 Take a tour of 21 of the world's most commonly spoken languages!--Back cover.

*The Loom of Language* Frederick Bodmer,1985 Here is an informative introduction to language: its origins in the past, its growth through history, and its present use for communication between peoples. It is at the same time a history of language, a guide to foreign tongues, and a method for learning them. It shows, through basic vocabularies, family resemblances of languages -- Teutonic, Romance, Greek -- helpful tricks of translation, key combinations of roots and phonetic patterns. It presents by common-sense methods the most helpful approach to the mastery of many languages; it condenses vocabulary to a minimum of essential words; it simplifies grammar in an entirely new way; and it teaches a language as it is actually used in everyday life.

Babel Gaston Dorren,2019-12-17 From the celebrated author of Lingo, a whistle-stop tour of the world's twenty most-spoken languages, exploring history, geography, linguistics, and culture--showing how the language we speak reflects our view of the world

*The Acquisition of Heritage Languages* Silvina Montrul,2015-12-03 Heritage speakers are native speakers of a minority language they learn at home, but due to socio-political pressure from the majority language spoken in their community, their heritage language does not fully develop. In the last decade, the acquisition of heritage languages has become a central focus of study within linguistics and applied linguistics. This work centres on the grammatical development of the heritage language and the language learning trajectory of heritage speakers, synthesizing recent experimental research. The Acquisition of Heritage Languages offers a global perspective, with a wealth of examples from heritage languages around the world. Written in an accessible style, this authoritative and up-to-date text is essential reading for professionals, students, and researchers of all levels working in the fields of sociolinguistics, psycholinguistics, education, language policies and language teaching.

**Language** Leonard Bloomfield,1984-10-15 Perhaps the single most influential work of general linguistics published in this century, Leonard Bloomfield's Language is both a masterpiece of textbook writing and a classic of scholarship. Intended as an introduction to the field of linguistics, it revolutionized the field when it appeared in 1933 and became the major text of the American descriptivist school.

*Languages and Dialects in the U.S.* Marianna Di Paolo,Arthur K. Spears,2014-03-05 Languages and Dialects in the U.S. is a concise introduction to linguistic diversity in the U.S. for students with little to no background in linguistics. The goal of the editors of this collection of fourteen chapters, written by leading experts on the language varieties discussed, is to offer students detailed insight into the languages they speak or hear around them, grounded in comprehensive coverage of the linguistic systems underpinning them. The book begins with setting the stage chapters, introducing the sociocultural context of the languages and dialects featured in the book. The remaining chapters are each devoted to particular U.S. dialects and varieties of American English, each with problem sets and suggested further readings to reinforce basic concepts and new linguistic terminology and to encourage further study of the languages and dialects covered. By presenting students with both the linguistic and social, cultural, and political foundations of these particular dialects and variations of English, Languages and Dialects in the U.S. is the ideal text for students interested in linguistic diversity in the U.S., in introductory courses in sociolinguistics, language and culture, and language variation and change.

*Extinct Languages* Johannes Friedrich,2021-10-26 A noted linguist examines extinct languages, from Egyptian hieroglyphs to the mysteries of as-yet undeciphered writings, in this scholarly work. While certain ancient languages were passed down continuously through the ages, many others were ignored for centuries. When scholars began to decipher these extinct languages in the early nineteenth century, they uncovered previously inaccessible riches of knowledge and history. Yet much work remains to be done on undeciphered scripts that continue to tantalize and perplex us today. In Extinct Languages, linguist Johannes Friedrich guides readers through the fascinating world of recovered systems of writing, including Egyptian and Hittite hieroglyphs, Babylonian cuneiform, and others. He also explains the methodology and principles behind the deciphering process that will one day crack ancient mysteries such as the Indus Valley script.

Révész,2015-03-17 Covers all areas, including operations on languages, context-sensitive languages, automata, decidability, syntax analysis, derivation languages, and more. **Minority Languages and Multilingual Education** Durk Gorter,Victoria Zenotz,Jasone Cenoz,2013-11-04 This book presents research on the situation minority language schoolchildren face when they need to learn languages of international communication, in particular English. The book takes minority languages as a starting point and it bridges local and global perspectives in the analysis of multilingual education contexts. It examines the interaction of minority languages and cultures, majority languages and lingua franca-s in a variety of settings across different regions and countries on all continents. Even though all chapters in this book involve minority languages, the issues discussed are relevant to any context in which more than language is used in education. The book reveals challenges and opportunities of multilingual education by discussing issues such as Northern and Southern concepts, language education policies, language diversity, interethnic understanding, multimodal language practices, power, conflict, identity and prestige, among many others. “This is the volume that finally accounts for multilingual education from a truly multilingual perspective by involving proposals and research from a variety of multilingual speech communities in the world. The (linguistically) rich Ethiopia and Mexico can teach the poor Europe and other Northern countries about multilingual education. CLIL promoters may learn from Finnish Sámi and Canadian Innu and Mi’gmaq indigenous communities as well as from Basque results. Speakers and teachers of minority and international languages will certainly be glad to hear the news. There is no need for a monolingual bias or tunnel vision in acquiring English in non-English speaking communities. This volume includes new challenging pedagogical perspectives while pointing to interesting conclusions for worldwide educational authorities”. Maria Pilar Safont Jordà, Universitat Jaume I, Castelló, Spain

*Defining Language Universals* Bianca Stärk,2006-11-20 Studienarbeit aus dem Jahr 2004 im Fachbereich Anglistik - Linguistik, Note: 2,8, Universität zu Köln (Anglistisches Institut), Veranstaltung: Morphosyntax English - German, Sprache: Deutsch, Abstract: Language is something uniquely human. Bertrand Russell stated in 1948 that “A dog cannot relate his autobiography; however eloquently he may bark, he cannot tell you that his parents were honest though poor” (Whaley 1997: 4). Language is not only unique to humans and diverse but there are also commonalities between languages. About five thousand languages are spoken in the world today but there still is a basic unity that underlies their diversities. Many of the world’s languages show similar principles. An example of such a similarity is word order. In some languages such as English, French and Italian the word order is subject, verb and object. This is the so called SOV order. Besides similarities like this, there also exist features between some languages, which are common to all human languages in the

world and are called language universals. These language universals classify entire languages into categories which are then based on shared properties. Language universals are examined within the field of typology. Typology has the task of examining cross-linguistic patterns. This means that “all typological research is based on comparisons between languages” (Whaley 1997: 7). Through comparing different languages with each other, one necessarily comes into contact with universals, which hold true for a group of languages or even for all languages. This is how language universals are placed within the field of typology.

Introduction to the Science of Language Archibald Henry Sayce,1880

*Third language acquisition* Camilla Bardel,Laura Sánchez,2020-11-19 This book deals with the phenomenon of third language (L3) acquisition. As a research field, L3 acquisition is established as a branch of multilingualism that is concerned with how multilinguals learn additional languages and the role that their multilingual background plays in the process of language learning. The volume points out some current directions in this particular research area with a number of studies that reveal the complexity of multilingual language learning and its typical variation and dynamics. The eight studies gathered in the book represent a wide range of theoretical positions and offer empirical evidence from learners belonging to different age groups, and with varying levels of proficiency in the target language, as well as in other non-native languages belonging to the learner’s repertoire. Diverse linguistic phenomena and language combinations are viewed from a perspective where all previously acquired languages have a potential role to play in the process of learning a new language. In the six empirical studies, contexts of language learning in school or at university level constitute the main outlet for data collection. These studies involve several language backgrounds and language combinations and focus on various linguistic features. The specific target languages in the empirical studies are English, French and Italian. The volume also includes two theoretical chapters. The first one conceptualizes and describes the different types of multilingual language learning investigated in the volume: i) third or additional language learning by learners who are bilinguals from an early age, and ii) third or additional language learning by people who have previous experience of one or more non-native languages learned after the critical period. In particular, issues related to the roles played by age and proficiency in multilingual acquisition are discussed. The other theoretical chapter conceptualizes the grammatical category of aspect, reviewing previous studies on second and third language acquisition of aspect. Different models for L3 learning and their relevance and implications for representations of aspect and for potential differences in the processing of second and third language acquisition are also examined in this chapter. As a whole, the book presents current research into third or additional language learning by young learners or adults, considering some of the most important factors for the complex process of multilingual language learning: the age of onset of the additional language and that of previously acquired languages, social and affective factors, instruction, language proficiency and literacy, the typology of the background languages and the role they play in shaping syntax, lexicon, and other components of a L3. The idea for this book emanates from the symposium Multilingualism, language proficiency and age, organized by Camilla Bardel and Laura Sánchez at Stockholm University, Department of Language Education, in December 2016.

*Learning to Read across Languages and Writing Systems* Ludo Verhoeven,Charles Perfetti,2017-10-12 Around the world, children embark on learning to read in their home language or writing system. But does their specific language, and how it is written, make a difference to how they learn? How is learning to read English similar to or different from learning in other languages? Is reading alphabetic writing a different challenge from reading syllabic or logographic writing? Learning to Read across Languages and Writing Systems examines these questions across seventeen languages representing the world's different major writing systems. Each chapter highlights the key features of a specific language, exploring research on learning to read, spell, and comprehend it, and on implications for education. The editors' introduction describes the global spread of reading and provides a theoretical framework, including operating principles for learning to read. The editors' final chapter draws conclusions about cross-linguistic universal trends, and the challenges posed by specific languages and writing systems.
