The Lawn Virginia Jenkins,1994-04-17 Lawns now blanket thirty million acres of the United States, but until the late nineteenth century few Americans had any desire for a front lawn, much less access to seeds for growing one. In her comprehensive history of this uniquely American obsession, Virginia Scott Jenkins traces the origin of the front lawn aesthetic, the development of the lawn-care industry, its environmental impact, and modern as well as historic alternatives to lawn mania.

A Weed by Any Other Name Nancy Gift, 2009-05-01 Is that a weed? This question, asked by anyone who has ever gardened or mowed a lawn, does not have an easy answer. After all, a weed, as suburban mother and professional weed scientist Nancy Gift reminds readers, is simply a plant out of place. In *A Weed by Any Other Name*, Gift offers a personal, unapologetic defense of clovers, dandelions, plantains, and more, chronicling her experience with these enemy plants season by season. Rather than falling prey to pressures to achieve the perfect lawn and garden, Gift elucidates the many reasons to embrace an unconventional, weedy yard. She celebrates the spots of

wildness that crop up in various corners of suburbia, redeeming many a plant's reputation by expounding on its positive qualities. She includes recipes for dandelion wine and garlic mustard pesto as well as sketches that show the natural beauty of flowers such as the morning glory, classified by the USDA as an invasive and noxious weed. Although she is an advocate of weeds, Gift admits that some plants do require eradication-she happily digs out multiflora rose and resorts to chemical warfare on poison ivy. But she also demonstrates that weeds often carry a message for us about the land and our treatment of it, if we are willing to listen.
