Light R. W. Ditchburn, 1991-01-01 This classic study, available for the first time in paperback, clearly

demonstrates how quantum theory is a natural development of wave theory, and how these two theories, once thought to be irreconcilable, together comprise a single valid theory of light. Aimed at students with an intermediate-level knowledge of physics, the book first offers a historical introduction to the subject, then covers topics such as wave theory, interference, diffraction, Huygens' Principle, Fermat's Principle, and the accuracy of optical measurements. Additional topics include the velocity of light, relativistic optics, polarized light, electromagnetic theory, and the quantum theory of radiation. The more difficult mathematics has been placed in appendixes, or in separated paragraphs in small type, intended to be omitted on first reading. Examples and/or references follow each chapter to assist the student in absorbing the material and to suggest additional resources.

Matches S. Chrostowska, 2015-11-20 It takes any number of forms. Epigrams. Aphorisms. Fragments. Sayings. Dicta. Sententiae. Facetiae. Pearls of wisdom. Fractions of truth. Maxims. Definitions. Jottings. Miscellaneous musings. Meditations. Ricordi. Pensées. Ephemera. Miniatures. Sketches. Vignettes. Denkbilder. Capriccios. Tiny 'fires without flames'... In returning to these genres, Matches goes back to the drawing board of modern critique. It sets out to rekindle short-form literary-philosophical reflection, with roots in the Antiquity of Heraclitus and Hippocrates, apogee in the French moralistes (La Rochefoucauld, Pascal, Chamfort...), and late splendour in German letters (Nietzsche, Kraus, Jünger...). Moving from art and aesthetics to philosophies past and present, through natural and technological landscapes, beneath the constellations of politics, history and ethics, along the byways of contemporary literary culture - the slow reader with a little spare time will not fail to be struck. Here are pages to peruse and mistrust, texts to think with, a book to put down and ponder, to ponder and put down. A tome to keep handy, handle often, and strike repeatedly against the rough patches of the mind. A must-read for aficionados of the fragment and literary critical experiments for the breadth of its subject matter and its style. -Alexander Kluge S.D. Chrostowska's Matches: A Light Book is a lambent marvel. The text interlaces a finely wrought poetic sensibility with a rare conceptual acuity. The literary beauty and philosophical rigor that permeate Chrostowska's apodictic constellation of fragments, aphorisms, and thought-images make her work a worthy heir to a tradition of transformative aphoristic writing and thinking that includes such masterpieces as Nietzsche's Human, All Too Human, Benjamin's One-Way Street, Adorno's Minima Moralia, Bloch's Traces, and Blanchot's The Writing of the Disaster. The many matches that the text lights never fail to illuminate - and in the process also to consume - the heterogeneous thoughts and experiences to which they attend. Chrostowska's high-wire literary performance reminds us that, in our administered world of techno-capitalist sameness, the last word may not yet have been spoken after all. -Gerhard Richter, Brown University An elegant and agile meditation on thinking, writing and reading in the twenty-first century. Chrostowska's sharp and original Matches will light readers' imaginations on fire and keep them burning long after they've put the book down. -Imre Szeman, Canada Research Chair in Cultural Studies, University of Alberta

The unpublished poems feature early poems from 1965-1969, a collection-in-progress titled the book of days (2008), and a poignant selection of final poems. An insightful foreword by Nobel Prize-winning author Toni Morrison and comprehensive afterword by noted poet Kevin Young frames Clifton's lifetime body of work, providing the definitive statement about this major America poet's career. On February 13, 2010, the poetry world lost one of its most distinguished members with the passing of Lucille Clifton. In the last year of her life, she was named the first African American woman to receive the \$100,000 Ruth Lilly Poetry Prize honoring a US poet whose lifetime accomplishments warrant extraordinary recognition, and was posthumously awarded the Robert Frost Medal for lifetime achievement from the Poetry Society of America. mother-tongue: to man-kind (from the unpublished the book of days): all that I am asking is that you see me as something more than a common occurrence, more than a woman in her ordinary skin.

A Flicker of Light Katie Powner, 2021-10-05 Secrets are like pennies. Everybody's got one, even the poorest among us. For generations, the Jensens have raised their families in the small Montana town of Moose Creek, where gossip spreads faster than the wind. Yet some secrets need to be told. When twenty-one-year-old Bea discovers she's pregnant on the heels of her husband losing his job, she's forced to admit she needs help and asks her dad for a place to stay. But past resentments keep her from telling him all that's going on. Mitch Jensen is thrilled to have a full house again, though he's unimpressed with Bea's decisions: dropping out of college, marrying so young--and to an idealistic city kid, of all things. Mitch hopes to convince Bea to return to the path he's always envisioned for her, but she's changed since her mom died. And he refuses to admit how much he's changed, too, especially now that he might be losing his mother as well. Grandma June is good at spinning stories, but there's one she's never told. Now that her mind is starting to fade, her time to tell it is running out. But if she reveals the truth before her memories are gone forever, the Jensen family will never be the same. Powner will be the next big star in Christian fiction.--Library Journal starred review

Organized along the order of the electromagnetic spectrum--from Radio waves to Gamma rays--each chapter focuses on a different type of light. From ultraviolet light, used in microscopy to image plant cells and bacteria, to X-rays, which let us peer inside the human body and view areas around black holes in deep space, Arcand and Watzke show us all the important ways light impacts us. With hundreds of stunning full-color photographs, including new images from the James Webb Space Telescope, Light is a joy to read and browse.
