Get Out of Your Own Way Robert K. Cooper,2006-04-11 A Powerful Road Map for Surpassing Everyone's Expectations Break through your self-imposed limitations by learning how your own brain can be your biggest obstacle—or your greatest ally. You'd expect your brain to be an always-reliable ally in your quest for a successful, satisfying life, but surprisingly the opposite is usually true. That's because your brain is pretty much the same model your ancestors were using thousands of years ago when mere survival was everyone's primary goal. It tells you now what it told them then: Play it safe. Avoid risk. Evade confrontation. Don't venture outside the territory you already know. And never break the habits that have gotten you this far. Coming at just the right time to help you deal with the growing demands of our pressure-packed, fast-changing world, Robert Cooper's *Get Out of Your Own Way* helps you understand what's going on in that head of yours. Once you know what really drives you, you can switch off the counterproductive parts of your brain, engage the helpful parts, and set out on the path to accomplishing what everyone else thinks you can't. Based on more than two decades of worldwide research, *Get Out of Your Own Way* shows you the five keys for making the choices that let you engage and triumph over the realities of today's world: • Direction, not motion • Focus, not time • Capacity, not conformity • Energy, not effort • Impact, not intentions Filled with wonderful stories—about everything from the note written by one of the author's ancestors upon leaving Dublin for

America in 1829 (“On the horizon is where hope lives . . . I am going there”) to the unlikely exploits of the world record-setting Jamaican bobsled team—this groundbreaking book confirms that the next frontier is not only ahead of you, it’s inside of you . . . and what everyone else thinks is impossible isn’t. A Fighting Chance Shannon Stacey, 2016-02-01 All work and no play makes Adeline Kendrick a dull girl, so when she heads to a casino resort for a friend's bachelorette weekend, she's ready to have a good time. Until she runs into Brendan Quinn, professional fighter and the one who got away—the one her family drove away—and things take a turn for the interesting. Running into his ex won't shake Brendan. Even if it brings up the old pain of loving her when she was only slumming. Even if she looks really good. In fact, what better way to get over the past than to take advantage of the still-sizzling chemistry running hot between them? He's there to win an MMA fight, but he won't say no to a little physical relief of a different kind. But when the weekend is over, Adeline isn't ready to give up her second chance that easily. Brendan is still the one for her, no matter what her family thinks. Now, if only she can convince him of that...

**Knowledge-building** Karl Maton,Susan Hood,Suellen Shay,2015-10-08 Education and knowledge have never been more important to society, yet research is segmented by approach, methodology or topic. Legitimation Code Theory or 'LCT' extends and integrates insights from Pierre Bourdieu and Basil Bernstein to offer a framework for research and practice that overcomes segmentalism. This book shows how LCT can be used to build knowledge about education and society. Comprising original papers by an international and multidisciplinary group of scholars, Knowledge-building offers the first primer in this fast-growing approach. Through case studies of major research projects, Part I provides practical insights into how LCT can be used to build knowledge by: - enabling dialogue between theory and data in qualitative research - bringing together quantitative and qualitative methodologies in mixed-methods research - relating theory and practice in praxis - conducting interdisciplinary studies with systemic functional linguistics Part II offers a series of studies of pressing issues facing knowledge-building in education and beyond, encompassing: - diverse subject areas, including physics, English, cultural studies, music, and design - educational sites: schooling, vocational education, and higher education - practices of research, curriculum, pedagogy and assessment - both education and informal learning contexts, such as museums and masonic lodges Carefully sequenced and interrelated, these chapters form a coherent collection that gives a unique insight into one of the most thought-provoking and innovative ways of building knowledge about knowledge-building in education and society to have emerged this century. This book is

essential reading for all serious students and scholars of education, sociology and linguistics.
