The Hypothetical Mandarin : Sympathy, Modernity, and Chinese Pain Eric Hayot Associate Professor of Comparative Literature and Director of the Program in Asian Studies Pennsylvania State University,2009-03-27 Why has the West for so long and in so many different ways expressed the idea that the Chinese have a special relationship to cruelty and to physical pain? What can the history of that idea and its expressions teach us about the politics of the West's contemporary relation to China? And what does it tell us about the philosophy of modernity? The Hypothetical Mandarin is, in some sense, a history of the Western imagination. It is also a history of the

interactions between Enlightenment philosophy, of globalization, of human rights, and of the idea of the modern. Beginning with Bianchon and Rastignac's discussion of whether the former would, if he could, obtain a European fortune by killing a Chinese mandarin in Balzac's *Le Pere Goriot* (1835), the book traces a series of literary and historical examples in which Chinese life and European sympathy seem to hang in one another's balance. Hayots wide-ranging discussion draws on accounts of torture, on medical case studies, travelers tales, photographs, plasticized corpses, polemical broadsides, watercolors, and on oil paintings. His analyses show that the historical connection between sympathy and humanity, and indeed between sympathy and reality, has tended to refract with a remarkable frequency through the lens called China, and why the story of the West's Chinese pain goes to the heart of the relation between language and the body and the social experience of the modern human being. Written in an ebullient prose, *The Hypothetical Mandarin* demonstrates how the network that intertwines China, sympathy, and modernity continues to shape the economic and human experience.

The Prosody of Mandarin Chinese Xiao-nan Susan Shen, 1990-01-01 Through acoustic analysis of Mandarin Chinese intonation, the author finds that the intonation baseline moves up when intonation is shifted from assertive to interrogative; therefore, two baselines and two intonation layers must be reckoned with. Sentence intonation affects the tonal values and

the tonal shapes of intrinsic lexical tones, though not beyond recognition. Tonal changes prove to be closely related to sentence intonation, which is superimposed simultaneously onto the utterance as a whole. The author's findings support the position of the movability of the intonation baseline and rectify some widely spread traditional claims concerning Mandarin Chinese prosody.

Dreaming in Chinese Deborah Fallows, 2010-09-07 Deborah Fallows has spent much of her life learning languages and traveling around the world. But nothing prepared her for the surprises of learning Mandarin, China's most common language, or the intensity of living in Shanghai and Beijing. Over time, she realized that her struggles and triumphs in studying the language of her adopted home provided small clues to deciphering the behavior and habits of its people, and its culture's conundrums. As her skill with Mandarin increased, bits of the language—a word, a phrase, an oddity of grammar—became windows into understanding romance, humor, protocol, relationships, and the

overflowing humanity of modern China. Fallows learned, for example, that the abrupt, blunt way of speaking that Chinese people sometimes use isn't rudeness, but is, in fact, a way to acknowledge and honor the closeness between two friends. She learned that English speakers' trouble with hearing or saying tones-the variations in inflection that can change a word's meaning-is matched by Chinese speakers' inability not to hear tones, or to even take a guess at understanding what might have been meant when foreigners misuse them. In sharing what she discovered about Mandarin, and how those discoveries helped her understand a culture that had at first seemed impenetrable, Deborah Fallows's *Dreaming in Chinese* opens up China to Westerners more completely, perhaps, than it has ever been before.
