Mind Reading as a Cultural Practice Laurens Schlicht, Carla Seemann, Christian

Kassung, 2020-04-04 This book provides a genealogical perspective on various forms of mind reading in different settings. We understand mind reading in a broad sense as the twentieth-century attempt to generate knowledge of what people held in their minds – with a focus on scientifically-based governmental practices. This volume considers the techniques of mind reading within a wider perspective of discussions about technological innovation within neuroscience, the juridical system, “occult” practices and discourses within the wider field of parapsychology and magical beliefs. The authors address the practice of, and discourses on, mind reading as they form part of the consolidation of modern governmental techniques. The collected contributions explore the question of how these

techniques have been epistemically formed, institutionalized, practiced, discussed, and how they have been used to shape forms of subjectivities – collectively through human consciousness or individually through the criminal, deviant, or spiritual subject. The first part of this book focuses on the technologies and media of mind reading, while the second part addresses practices of mind reading as they have been used within the juridical sphere. The volume is of interest to a broad scholarly readership dealing with topics in interdisciplinary fields such as the history of science, history of knowledge, cultural studies, and techniques of subjectivization.

The Mind Readers Margery Allingham, 2023-04-28 A mysterious invention causes mayhem in a coastal English village—from “my very favourite of the four Queens of Crime” (J. K. Rowling). The ancient hamlet of Saltey, once the haunt of smugglers, now hides a secret rich and mysterious enough to trap all who enter . . . and someone in town is willing to terrorize, murder, and raise the very devil to keep that secret to themselves. When a transistor thought to be the key to telepathic communication is found, Albert Campion is called to sort fact from fiction. But the device at the center of the mystery is

in the possession of two schoolboys, and whether they stole it or invented it, there are others who will kill to get hold of it. “Allingham has a strong, well controlled sense of humour, a power of suggesting character with a few touches and an excellent English style. She has a sense of the fantastic, and is never dull” —Times Literary Supplement
