This book shares the habits and processes used by top leaders worldwide to minimize distractions and maximize accomplishments. In researching more than 1,260 managers and executives from more than 108 different organizations, Steve and Rob Shallenberger discovered that 68 percent of them feel like their number one challenge is time management, yet 80 percent don't have a clear process for how to prioritize their time. Drawing on their forty years of leadership research, this book offers three powerful habits that the top 10 percent of leaders use to Do What Matters Most. These three high performance habits are developing a written personal vision, identifying and setting roles and goals, and consistently doing pre-week planning. And Steve and Rob make an audacious promise: these three habits can increase anyone's productivity by at least 30 to 50 percent. For organizations, this means higher profits, happier employees, and increased innovation. For individuals, it means you'll find hours in your week that you didn't know were there—imagine what you could do! You will learn how acquiring this skillset turned an “average” employee into her company's top producer, enabled a senior vice president to reignite his team and achieve record results, transformed a stressed-out manager's work and home life, helped a CEO who felt like he'd lost his edge regain his fire and passion, and much more. By implementing these simple and easy-to-understand habits, supported by tools like the Personal Productivity Assessment, you will learn how to lead a life by design, not by default. 📖 **The Most Venerable Book (Shang Shu)** Confucius,2014-07-31 A wonderfully enjoyable storehouse of ancient Chinese history and legends, which also has an important role in understanding 21st-century China 'And remember: Heaven's blessing will cease forever if there's despair and poverty in your lands' The Most Venerable Book (also known as The Book of History) is one of the Five Classics, a key work of Chinese literature which preserves some of the most ancient and dramatic chronicles of the history, both real and mythological, of the Chinese state. For many centuries it was a central work for anyone wishing to work for the imperial administration, preserving as it does a fascinating mixture of key Confucian concepts as well as page after page of heroes, benevolent rulers, sagacious ministers, and struggles against flood, corruption and vicious, despotic rulers. The first emperor tried in 213 BC to have all copies of the book destroyed because of its subversive implication that 'the Mandate of Heaven' could be withdrawn from rulers who failed their people. For similar reasons it was also banned by Chairman Mao. Extraordinarily, the values of The Most Venerable Book have been revived by the Chinese government of the 2010s.

Throughout it all, they shared a bond more intimate than any other in Prince's life. No one else can tell this story or can provide a deeper, more nuanced portrait of Prince--both the famously private man and the pioneering, beloved artist--than Mayte, his partner during some of the most pivotal personal and professional years of his career. The Most Beautiful is a book that will be returned to for decades, as Prince's music lives on with generations to come.

📖 [Most Commons in Ophthalmology](#) Dhaval Patel, “Most Commons” has always been the hot topic which helps in solving many direct and indirect questions in entrance examinations and also clears many fundamentals related to subject. During my ophthalmology residency at AIIMS, New Delhi, I had started gathering relevant text which has helped me to compile a huge collection of most commons and has now taken the form of this book. Time taken to compile this book is really enormous and I have tried not to leave any topic untouched. More than 1000 ophthalmology related books has been reviewed to compile this huge list of more than 4000 “most commons”. I have permitted myself to allow few duplications of most commons, it is just in the view of getting all relevant material under single heading. This text, in a concise manner, relays information related to all major topics in ophthalmology. Additionally, it also reviews all areas commonly covered in PG and Post-PG Entrance examinations of ophthalmology. Science is an ever changing dynamic field and medicine is no more exception. Though each and every data collected and given here is checked for its correctness, some of the facts like percentage etc may change as new research goes on. I have taken utmost care to present the information in its latest form. I hope readers will welcome my this text just as my previous texts like Ophthalmonics, Ophthalmology Explorer and I-Notes for which I still continue to receive appreciation emails and messages. 📖 [A Most Magnificent Machine](#) Craig Miner, 2010-10-14 Just as the railroad transformed America’s economic landscape, it profoundly transfigured its citizens as well. But while there have been many histories of railroads, few have examined the subject as a social and cultural phenomenon. Informed especially by rich research in the nation’s newspaper archives, Craig Miner now traces the growth of railroads from their origins in the 1820s to the onset of the Civil War. In this first social history of the early railroads, Miner reveals how ordinary Americans experienced this innovation at the grass roots, from boosters’ dreams of get-rich schemes to naysayers’ fears of soulless corporations. Drawing on an amazing 400,000 articles from 185 newspapers-plus more than 3,000 books and pamphlets from the era-he documents the initial burst of enthusiasm accompanying early railroading as it took shape in various settings across the country. Miner examines the cultural, economic, and political aspects of this broad and complicated topic while remaining rooted in the local interests of communities. He takes readers back to the days of the Mauch Chunk Railway, a tourist sensation of the mid-1820s, navigates the mixed reactions to trains as Baltimore’s city fathers envisioned tracks to the Ohio River, shows how Pennsylvanians wrestled with the efficacy of railroads versus canals, and describes the intense rivalry of cities competing for trade as old transportation patterns were replaced by the new rail technology. Miner samples individual railroads to compare progress across the industry, showing how it became a quintessentially American business- and how the Panic of 1837 significantly slowed the railways as a major engine of growth for many years. He also explores the impact of railroads on different regions, even disproving the backwardness of the South by citing the Central of Georgia as one of the best-managed and most profitable lines in the country. Through this panoramic work, readers will discover just how the benefits of what became the country’s first big business triumphed over cultural concerns, though not without considerable controversy along the way. By identifying citizens’ hopes and fears sparked by the railroads, A Most Magnificent Machine takes readers down the tracks of progress as it opens a new window on antebellum America.
