**Namer Bamidbar** Nir Gadon,2015-02-08 A tiger would not get into a trap. It is a clever and cautious animal. A lone creature, roaming the fields by itself and hunting for survival. The male has no responsibilities. Provides for himself only. Meets a female solely for mating and reproducing, and has no interest in his offspring. A clue to finding the predator throws us into a journey with Nahshon, a landscape architect with a military past, who leads a group of men on a quest to capture the lonely tiger. A journey of love and unfulfilled passion sparks off dark memories in our hero's past, sending our story into a vortex. Who's hunting whom? Who is the prey? Nir Gadon (R.I.P), 55; married with four children, born and raised in Kibbutz Nativ HaLeh in Israel, F-16 combat pilot, El-al airline captain and a volunteer in the police force. Alongside his daily job, Nir nurtured his love for drawing, bike-riding and recently writing. But when enraged forest spirits attack, Ash shows that the names she hears have power. After taming a destructive forest spirit, Ash teams up with Fen, a wild forest boy, and embarks on an unusual journey to save her village. In this steampunk eco-fantasy, the perils of deforestation and the power of friendship are explored through a fantastical adventure involving giant mistcats, tempestuous forest spirits, a supernatural puppy, and a girl with a special gift for shaping what things become.

**NAMER** Steven M. Sidik,1972 Under certain specified conditions, the Bayes procedure for designing two- level fractional factorial experiments is that which maximizes the expected utility over all possible choices of parameter-estimator matchings, physical-design variable matchings, defining parameter groups, and sequences of telescoping groups. NAMER computes the utility of all possible matchings of physical variables to design variables and parameters to estimators for a specified choice of defining parameter group or groups. The matching yielding the maximum expected utility is indicated, and detailed information is provided about the optimal matchings and utilities. Complete documentation is given; and an example illustrates input, output, and usage.

*The lexeme in descriptive and theoretical morphology* Olivier Bonami,Gilles Boyé ,Georgette Dal ,Hélène Giraudo , Fiammetta Namer , After being dominant during about a century since its invention by Baudouin de Courtenay at the end of the nineteenth century, morpheme is more and more replaced by lexeme in contemporary descriptive and theoretical morphology. The notion of a lexeme is usually associated with the work of P. H. Matthews (1972, 1974), who characterizes it as a lexical entity abstracting over individual inflected words. Over the last three decades, the lexeme has become a cornerstone of much work in both inflectional morphology and word formation (or, as it is increasingly been called, lexeme formation). The papers in the present volume take stock of the descriptive and theoretical usefulness of the lexeme, but also adress many of the challenges met by classical lexeme-based theories of morphology.

Nursing and Informatics for the 21st Century Charlotte Weaver,Connie Delaney,Patrick Weber,Robyn Carr,2016-05-13 Nursing and Informatics for the 21st Century is the follow-up to the highly successful, award-winning first edition. Published in 2006, the first edition was a critical resource in chronicling the huge historical shift in nursing linked to the explosion of EHR national strategies and health policies around the globe. This updated edition, co-published by AMIA, examines the revolution that has occurred in nursing and explores the role IT is playing in this transformation, with a thoughtful examination of nursing practice, science and research, and education across the globe. With nearly 50 case studies written by nursing's leading innovators and recognized leaders across specific segments of the healthcare industry and the globe, the book presents a snapshot of nursing and IT adoption worldwide. The book provides in-depth analysis of nursing developments in the United States and an expanded global focus, including profiles of EHR initiatives in the Middle East and Asia. In addition, new topics

in this second edition include nursing faculty development and results of a five-country international survey on nursing clinical documentations.

**Galileo's Inquisition Trial Revisited** Jules Speller,2008 This book shows that the known accounts of Galileo's trial leave many important facts unexplained or even clash with them. A most careful reading of the relevant documents and treatises backs an interpretation which has Pope Urban VIII sue Galileo for denying God's omnipotence or His omniscience by admitting the «absolute truth» of Copernicanism. The Pope's opinion results from an argument he fully trusts, together with his belief that Galileo failed to fulfill a condition to which the publication of the Dialogue was subjected. That the trial does not end with a conviction for Urban's awful «formal heresy» but merely for «vehement suspicion of heresy», with the «heresy» consisting in the pseudo-heretical belief in a doctrine contrary to the Bible, all this is due to the existence of a Galileo-friendly party inside the Holy Office, led by Cardinal Francesco Barberini and powerful enough to wring a compromise from the Pope.
