Nature Next Door Ellen Stroud,2012-12-15 The once denuded northeastern United States is now a region of trees. Nature Next Door argues that the growth of cities, the construction of parks, the transformation of farming, the boom in tourism, and changes in the timber industry have together brought about a return of northeastern forests. Although historians and historical actors alike have seen urban and rural areas as distinct, they are in fact intertwined, and the dichotomies of farm and forest, agriculture and industry, and nature and culture break down when the focus is on the history of Northeastern woods. Cities, trees, mills, rivers, houses, and farms are all part of a single transformed regional landscape. In an examination of the cities and forests of the northeastern United States—with particular attention to the woods of Maine, New Hampshire, Pennsylvania, and Vermont—Ellen Stroud shows how urbanization processes there fostered a period of recovery for forests, with cities not merely consumers of nature but creators as well. Interactions between city and hinterland in the twentieth century Northeast created a new wildness of metropolitan nature: a reforested landscape intricately entangled with the region's cities and towns.

The Nature of Desert Nature Gary Paul Nabhan,2020-11-10 In this refreshing collection, one of our best writers on desert places, Gary Paul Nabhan, challenges traditional notions of the desert. Beautiful, reflective, and at times humorous, Nabhan's extended essay also called "The Nature of Desert Nature" reveals the complexity of what a desert is and can be. He passionately writes about what it is like to visit a desert and what living in a desert looks like when viewed through a new frame, turning age-old notions of the desert on their heads. Nabhan invites a prism of voices—friends, colleagues, and advisors from his more than four decades of study of deserts—to bring their own perspectives. Scientists, artists, desert contemplatives, poets, and writers bring the desert into view and investigate why these places compel us to walk through their sands and beneath their cacti and acacia. We observe the spines and spears, stings and songs of the desert anew. Unexpected. Surprising. Enchanting. Like the desert itself, each essay offers renewed vocabulary and thoughtful perceptions. The desert inspires wonder. Attending to history, culture, science, and spirit, The Nature of Desert Nature celebrates the bounty and the significance of desert places. Contributors Thomas M. There are also lined pages for writing, blank pages for drawing, and numerous activity pages.

Valuing Nature William Ginn,2020-05-21 As the world faces unprecedented challenges such as climate change and biodiversity loss, the resources needed far outstrip the capabilities of nonprofits and even governments. Yet there are seeds of hope—and much of that hope comes from the efforts of the private sector. Impact investing is rapidly becoming an essential tool, alongside philanthropy and government funding, in tackling these major problems. Valuing Nature presents a new set of nature-based investment areas to help conservationists and investors work together. NatureVest founder William Ginn outlines the emerging private sector investing opportunities in natural assets such as green infrastructure, forests, soils, and fisheries. The first part of Valuing Nature examines the scope of nature-based impact investing while also presenting a practical overview of its limitations and the challenges facing the private sector. The second part of the book offers tools for investors and organizations to consider as they develop their own projects and tips on how nonprofits can successfully navigate this new space. Case studies from around the world demonstrate how we can use private capital to achieve more sustainable uses of our natural resources without the unintended consequences plaguing so many of our current efforts. Valuing Nature provides a roadmap for conservation professionals, nonprofit managers, and impact investors seeking to use market-based strategies to improve the management of natural systems.

Narrating Nature Mara Jill Goldman, 2020-11-03 The current environmental crises demand that we revisit dominant approaches for understanding nature-society relations. Narrating Nature brings together various ways of knowing nature from differently situated Maasai and conservation practitioners and scientists into lively debate. It speaks to the growing movement within the academy and beyond on decolonizing knowledge about and relationships with nature, and debates within the social sciences on how to work across epistemologies and ontologies. It also speaks to a growing need within conservation studies to find ways to manage nature with people. This book employs different storytelling practices, including a traditional Maasai oral meeting—the enkigüena—to decenter conventional scientific ways of communicating about, knowing, and managing nature. Author Mara J. Goldman draws on more than two decades of deep ethnographic and ecological engagements in the semi-arid rangelands of East Africa—in landscapes inhabited by pastoral and agropastoral Maasai people and heavily utilized by wildlife. These iconic landscapes have continuously been subjected to boundary drawing practices by outsiders, separating out places for people (villages) from places for nature (protected areas). Narrating Nature follows the resulting boundary crossings that regularly occur—of people, wildlife, and knowledge—to expose them not as transgressions but as opportunities to complicate the categories themselves and create ontological openings for knowing and being with nature otherwise. Narrating Nature opens up dialogue that counters traditional conservation narratives by providing space for local Maasai inhabitants to share their ways of knowing and being with nature. It moves beyond standard community conservation narratives that see local people as beneficiaries or contributors to conservation, to demonstrate how they are essential knowledgeable members of the conservation landscape itself.

Nature Obscura Kelly Brenner, 2020-02-26 With wonder and a sense of humor, Nature Obscura author Kelly Brenner aims to help us rediscover our connection to the natural world that is just outside our front door—we just need to know where to look. Through explorations of a rich and varied urban landscape, Brenner reveals the complex micro-habitats and surprising nature found in the middle of a city. In her hometown of Seattle, which has plowed down hills, cut through the land to connect fresh- and saltwater, and paved over much of the rest, she exposes a diverse range of strange and unknown creatures. From shore to wetland, forest to neighborhood park, and graveyard to backyard, Brenner uncovers how our land alterations have impacted nature, for good and bad, through the wildlife and plants that live alongside us, often unseen. These stories meld together, in the same way our ecosystems, species, and human history are interconnected across the urban environment.

The Curious Naturalist Sy Montgomery, 1991-01-01 Boston Globe nature columnist discusses the lovelorn messages sent by singing insects on autumn evenings, the messages contained in spiderwebs, the effects of winter snow on the way sound travels, the way all life depends on the unusual structure of water, and much more. Most fun is the author's description of ways to interact with other creatures (e.g., teaching wild birds to eat out of your hand).
