Just Like Daddy Ovi Nedelcu,2015-04-28 A vividly illustrated day in the life of a little boy and his daddy, this charming picture book paints a gently ironic comparison of how the day unfolds for each of them. The toddler is filled with glee as he tackles each new challenge, while the dad faces his day with a more grown-up combination of perseverance and resignation--yet he finds himself inspired by his son's open-hearted optimism. Spreads alternate between perspectives--the little boy's excitement at driving his toy car around compared with his father trying to navigate traffic, for example. The tension is resolved by a transcendent final spread that shows what makes it all

worthwhile. Inits unvarnished yet loving acceptance of the travails of being a working parent, Just Like Daddy is a perfect Father's Day gift for today's dads.

Nedelcu, 2015-03-27 The book integrates our understanding of the factors and processes underlying the evolution of multicellularity by providing several complementary perspectives (both theoretical and experimental) and using examples from various lineages in which multicellularity evolved. Recent years marked an increased interest in understanding how and why these transitions occurred, and data from various fields are providing new insights into the forces driving the several independent transitions to multicellular life as well as into the genetic and molecular basis for the evolution of this phenotype. The ultimate goal of this book is to facilitate the identification of general and unifying principles and mechanisms.

**Multicellularity** Karl J. Niklas, Stuart A. Newman, 2022-06-07 Scholars consider the origins and consequences of the evolution of multicellularity, addressing a range of organisms, experimental protocols, theoretical concepts, and philosophical issues. The evolution of multicellularity raises questions regarding genomic and developmental commonalities and discordances, selective advantages and disadvantages, physical determinants of development, and the origins of morphological novelties. It also represents a change in the definition of individuality, because a new organism emerges from interactions among single cells. This volume considers these and other

questions, with contributions that explore the origins and consequences of the evolution of multicellularity, addressing a range of topics, organisms, and experimental protocols. Each section focuses on selected topics or particular lineages that present a significant insight or challenge. The contributors consider the fossil record of the paleontological circumstances in which animal multicellularity evolved; cooptation, recurrent patterns, modularity, and plausible pathways for multicellular evolution in plants; theoretical approaches to the amoebozoa and fungi (cellular slime molds having long provided a robust model system for exploring the evolution of multicellularity), plants, and animals; genomic toolkits of metazoan multicellularity; and philosophical aspects of the meaning of individuality in light of multicellular evolution. **Complications in Bariatric Surgery** Diego Camacho,Natan Zundel,2018-04-26 This text focuses on the complications following bariatric surgery. The focus is on the immediate and long term complications that would be important to both the general surgeon and those surgeons with specialty experience in bariatric surgery. Sections address the nutritional deficiencies following bariatric surgery with specific attention to Roux en Y gastric bypass and pancreatoco-biliary diversion as well as the correction of these deficiencies with medical intervention as well as the indications for surgical revision or reversal. The text reviews the work-up of a bariatric patient with abdominal pain including the appropriate imaging and threshold for operative intervention and the techniques to achieve optimal visualization during this difficult situation. This section focuses on the operative management of anastomotic and staple line leaks and how to definitively manage these surgical emergencies as well as achieve source control and stabilization. Later chapters focus on specific complications following bariatric surgery with specific focus on RYGB, vertical sleeve gastrectomy (VSG), biliary pancreatic diversion, and gastric band. Complications include gastric fistula, gastric staple line disruption following VSG, gastro-jejunal leak following RYGB, reflux following bariatric surgery, and failure of weight loss following bariatric surgery. These sections are written by experts in the field of bariatrics and include evidence based medicine as well as expert opinion on the management of bariatric complications. The sections provide a review of the literature and references at the close of each section. *Complications in Bariatric Surgery* will serve as a resource for both the general surgeon who handles bariatric emergencies as well as the bariatric specialist.

**Routledge Handbook of Diaspora Studies** Robin Cohen,Carolyn Fischer,2018-09-03 The word 'diaspora' has leapt from its previously confined use - mainly concerned with the dispersion of Jews,

Greeks, Armenians and Africans away from their natal homelands – to cover the cases of many other ethnic groups, nationalities and religions. But this ‘horizontal’ scattering of the word to cover the mobility of many groups to many destinations, has been paralleled also by ‘vertical’ leaps, with the word diaspora being deployed to cover more and more phenomena and serve more and more objectives of different actors. With sections on ‘debating the concept’, ‘complexity’, ‘home and home-making’, ‘connections’ and ‘critiques’, the Routledge Handbook of Diaspora Studies is likely to remain an authoritative reference for some time. Each contribution includes a targeted list of references for further reading. The editors have carefully blended established scholars of diaspora with younger scholars looking at how diasporas are constructed ‘from below’. The adoption of a variety of conceptual perspectives allows for generalization, contrasts and comparisons between cases. In this exciting and authoritative collection over 40 scholars from many countries have explored the evolving use of the concept of diaspora, its possibilities as well as its limitations. This Handbook will be indispensable for students undertaking essays, debates and dissertations in the field.

**Acoustics and Vibration of Mechanical Structures - AVMS-2021** Nicolae Herisanu, Vasile Marinca, 2022-08-10 This book is a collection of contributions presented at the 16th Conference on Acoustic and Vibration of Mechanical Structure held in Timișoara, Romania, May 28, 2021. The book also discusses analytical, numerical and experimental

techniques applicable to analyze linear and non-linear noise and vibration problems (including strong nonlinearity) and it is primarily intended to emphasize the actual trends and state-of-the-art developments in the above mentioned topics. The primary audience of this book consist of academics, researchers and professionals, as well as PhD students concerned with various fields of acoustics and vibration of mechanical structures.

**The Oxford History of Romanian Morphology** Martin Maiden,Adina Dragomirescu,Gabriela Pană Dindelegan,Oana Uță,Rodica Zafiu,2021-03-23 This book offers the first comprehensive account of the development of the Romanian morphological system. Romanian is one of the most morphologically complex Romance languages, but has remained relatively understudied compared with better-known languages such as French and Spanish. Following an introduction that provides an outline of the history of Romanian, its writing system and major typological characteristics, and the major patterns of allomorphy, chapters in this volume explore a range of fascinatingly complex aspects of Romanian grammar whose structure and history have to date been largely inaccessible to the English-speaking world. Among the most distinctive morphological characteristics of Romanian discussed by the authors are its inflexional case system; the highly unpredictable formation of the plural; the existence of a non-finite verb form that appears to be the continuation of the Latin supine; the near-absence of distinctive subjunctive morphology; and the complex patterns of allomorphy brought about by successive sound change. The frequently controversial origins of many of these developments have important implications for broader historical Romance linguistics and indeed for morphological theory more generally.

**Childhood and Parenting in Transnational Settings** Viorela Ducu, Mihaela Nedelcu, Aron Telegdi-Csetri, 2018-06-08 This book describes children and youth on the one hand and parents on the other within the newly configured worlds of transnational families. Focus is put on children born abroad, brought up abroad, studying abroad, in vulnerable situations, and/or subject of trafficking.

The book also provides insight into the delicate relationships that arise with parents, such as migrant parents who are parenting from a distance, elderly parents supporting migrant adult children, fathers left behind by migration, and Eastern-European parents in Nordic countries. It also touches upon life strategies developed in response to migration situations, such as the transfer of care, transnational (virtual) communication, common visits (to and from), and the co-presence of family members in each other's (distant) lives. As such this book provides a wealth of information for researchers, policy makers and all those working in the field of migration and with migrants. The chapter 'Afterword: Gender Practices in Transnational Families' is open access under a CC BY 4.0 license via [link.springer.com](https://link.springer.com).

**The Evolution of Multicellularity** Matthew D. Herron, Peter L. Conlin, William C. Ratcliff, 2022-06-07 Among the most important innovations in the history of life is the transition from single-celled organisms to more complex, multicellular organisms. Multicellularity has evolved repeatedly across the tree of life, resulting in the evolution of new kinds of organisms that collectively constitute a significant portion of Earth's biodiversity and have transformed the biosphere. This volume examines the origins and subsequent evolution of multicellularity, reviewing the types of multicellular groups that exist, their evolutionary relationships, the processes that led to their evolution, and the conceptual frameworks in which their evolution is understood. This important volume is intended to serve as a jumping-off point, stimulating further research by summarizing the topics that students and researchers of the evolution of multicellularity should be familiar with, and highlighting future research directions for the field.

**Ageing as a Migrant** Ruxandra Oana Ciobanu, Tineke Fokkema, Mihaela Nedelcu, 2020-06-29 Motivated by the steady increase in the population of older migrants worldwide, this book

acknowledges the diversity within this population group and provides an interdisciplinary and multi-level approach for studying older migrants' strategies to overcome vulnerability. The book brings together original research on the topics of diversity among older migrants, social vulnerability, loneliness, (transnational) care and support networks. Based on a review of the growing literature on the topic of older migrants and anchored in the empirical findings discussed in the chapters, the book puts forward a general approach to study older migrants as social actors who develop strategies to surpass vulnerabilities. As documented by empirical research, older migrants mobilise their resources and are able to deal with structural opportunities and restrictions operating at meso and macro levels. These strategies are placed at the intersection between family obligations and resources, social networks, and migration and care regimes. The interdisciplinary and multi-level research in this book acknowledges the heterogeneity within the population of older migrants and puts forward research results that have implications for policies targeting the growing population of older migrants. This book was originally published as a special issue of the Journal of Ethnic and Migration Studies.
