*Labor Matters* Roderick O. J. D. Ford, 2011-02 No solution to the crisis of American race relations is viable without taking into account labor matters. *Labor Matters--African American Labor Crisis, 1861-2010* presents a sobering historical analysis of race and employment relations in the United States through thirteen unique essays-- including scholarly articles, speeches, a biographical essay, and law review notes. In this book, we learn that American labor and employment laws were, from 1861 to about 1940, intentionally designed to preserve the effects of American slavery on African American workers; that these laws were revamped after World War II in response to the Civil Rights Movements of the 1940s, 50s and 60s; but since the 1970s, these laws have been misapplied to the detriment of the African American community. The reasons covered are multifaceted; the problems dealt with are spiritual and cultural; and the underlying solutions appear to be fundamentally economic. Attorney Roderick O. Ford has completed a masterful work.

**The Korowai of Irian Jaya** Gerrit J. van Enk, Lourens de Vries, 1997-07-03 Irian Jaya is the official name of the western half of New Guinea, a province of Indonesia since the 1960s. Its inhabitants are generally untouched by civilization, and most of their hundreds of native languages and cultures remain unstudied. Van Enk and de Vries gained access to one of the most isolated parts of Irian Jaya in order to study the Korowai, a tribe in southern Irian Jaya. The Korowai still use stone tools, live in tree-houses, and have no knowledge of the outside world. Van Enk and de Vries provide the first study of the Korowai language and culture. They reproduce oral texts that show patterns of grammar, discourse, and culture, and discuss the phonological, morphological, and syntactical aspects of the language. In the process, van Enk and de Vries reveal a number of key semantic fields and conceptual patterns such as kinship, counting, the role of lunar phases, and Korowai cosmology.

**The London DMS Bus** Matthew (Matt) Wharmby, 2016-11-30 Vilified as the great failure of all London Transport bus classes, the DMS family of Daimler Fleetline was more like an unlucky victim of straitened times. Desperate to match staff shortages with falling demand for its services during the late 1960s, London Transport was just one organization to see nationwide possibilities and savings in legislation that was about to permit double-deck one-man-operation and partially fund purpose-built vehicles. However, prohibited by circumstances from developing its own rear-engined Routemaster (FRM) concept, LT instituted comparative trials between contemporary Leyland Atlanteans and Daimler Fleetlines. The latter came out on top, and massive orders followed. The first DMSs entering service on 2 January 1971. In service, however, problems quickly manifested. Sophisticated safety features served only to burn out gearboxes and gulp fuel. The passengers, meanwhile, did not appreciate being funnelled through the DMS's recalcitrant automatic fare-collection machinery only to have to stand for lack of seating. Boarding speeds thus slowed to a crawl, to the extent that the savings made by laying off conductors had to be negated by adding more DMSs to converted routes! Second thoughts caused the ongoing order to be amended to include crew-operated Fleetlines (DMSs), noise concerns prompted the development of the B20 "quiet bus" variety, and brave attempts were made to fit the buses into the time-honored system of overhauling at Aldenham Works, but finally the problems proved too much. After enormous expenditure, the first DMSs began to be withdrawn before the final RTs came out of service, and between 1979 and 1983 all but the B20s were sold – as is widely known, the DMSs proved perfectly adequate with provincial operators once their London features had been removed. OPO was to become fashionable again in the 1980s as the politicians turned on London Transport itself, breaking it into pieces in order to sell it off. Not only did the B20 DMSs survive to something approaching a normal lifespan, but the new cheap operators awakening with the onset of tendering made use of the type to undercut LT, and it was not until

1993 that the last DMS operated.
