The Rust Programming Language is the official book on Rust: an open source systems programming language that helps you write faster, more reliable software. Building Successful Online Communities Robert E. Kraut,Paul Resnick,2012-03-23 How insights from the social sciences, including social psychology and economics, can improve the design of online communities. Online communities are among the most popular destinations on the Internet, but not all online communities are equally successful. For every flourishing Facebook, there is a moribund Friendster—not to mention the scores of smaller social networking sites that never attracted enough members to be viable. This book offers lessons from theory and empirical research in the social sciences that can help improve the design of online communities. The authors draw on the literature in psychology, economics, and other social sciences, as well as their own research, translating general findings into useful design claims. They explain, for example, how to encourage information

contributions based on the theory of public goods, and how to build members' commitment based on theories of interpersonal bond formation. For each design claim, they offer supporting evidence from theory, experiments, or observational studies.

Online TV Catherine Johnson,2019-01-04 With growth in access to high-speed broadband and 4G, and increased ownership of smartphones, tablets and internet-connected television sets, the internet has simultaneously begun to compete with and transform television. Online TV argues that these changes create the conditions for an emergent internet era that challenges the language and concepts that we have to talk about television as a medium. In a wide-ranging analysis, Catherine Johnson sets out a series of conceptual frameworks designed to provide a clearer language with which to analyse the changes to television in the internet era and to bring into focus the power dynamics of the online TV industry. From providing definitions of online TV and the online TV industry, to examining the ways in which technology, rights, interfaces and algorithms are used to control and constrain access to audiovisual content, Online TV is a timely intervention into debates about contemporary internet and television cultures. A must-read for any students, scholars and practitioners who want to

understand and analyse the ways in which television is intertwining with and being transformed by the internet.

Online versus traditional education. A contrasting analysis Caroline Mutuku,2018-07-17 Polemic Paper from the year 2018 in the subject Didactics - Common Didactics, Educational Objectives, Methods, grade: 1, , language: English, abstract: Educational transition has led to the development of new approaches for the 21st Century education. The emergence of online learning in the 1990s seems to have changed the relevance of traditional education. This can be attributed to the current social change and technological development. Ordinarily, the principal reason for learning is to acquire intellectual knowledge, but the element of usefulness of the acquired knowledge has become the key determinant of the mode of learning. Traditional and online education exhibits varied characteristics, which are useful in elucidating their similarities and differences. Concisely, characteristics of online

education imply that learners assume full responsibility in the learning process. On the other hand, traditional education is characterized with shared responsibility between learners and instructors. Similarities between online and traditional education can be outlined with regard to reference materials, assignments, exams and the role of instructors in the learning process. All curricula involve assignments and exams for evaluating the learners' understanding of coursework and reference materials; either printed or electronic are intended to be used by students to extent their knowledge on different concepts. On the other hand, the two systems manifest differences in flexibility, interaction, communication, learning mode and skills development. Traditional education uses the classroom setup, whereas online learning is computer-based. In conclusion, traditional education holds high values over online education, especially with regard to the equivalency theory. Its high value is attributable to the face-to-face aspect, which enhances skills development among learners.
