The Photo Ark Joel Sartore, 2017 This book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals -- especially those that are endangered. His message: to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits: from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the prose of veteran wildlife writer Douglas Chadwick, this book presents an argument for saving all the species of our planet.

Create Your Own Photo Book Petra Vogt, 2012-05-25 These days, photographs live on hard drives and DVDs in the company of several thousand other images, coming to light on a computer screen only for a short moment, if ever.

In that respect our computer is a one-image-at-a-time exhibition of our photographic work. But as photographers, we like to print our best images, frame and show them at home or at an exhibition, or present a collection of prints in a portfolio. This book will guide you through the process of creating a printed and bound portfolio of your photographs, or even a bookstore-quality coffee table book. Learn about every step of the process, from selecting a book publishing service all the way through designing and proofing your photo book. You'll get practical advice on how to work with software provided by services such as Blurb or Viovio, and will learn about relevant concepts of book design, color management, and digital printing. Create your Own Photo Book is the perfect guide for the aspiring amateur photographer as well as the seasoned pro.

William Eggleston, 2 1/4, 1999 Born and raised in Mississippi and Tennessee, William Eggleston began taking pictures during the 1960s after seeing Henri Cartier-Bresson's *The Decisive Moment*. In 1966 he changed from black and white to color film, perhaps to make the medium more his own and less that of his esteemed predecessors. John Sarkowski, when he was curator of photography at the Museum of Modern Art, called Eggleston the first color photographer, and certainly the world in which we consider a color photograph as art has changed because of Eggleston. From 1966 to 1971, Eggleston would occasionally use a two and one quarter inch format for photographs. These are collected and published here for the first time, adding more classic Eggleston images to photography's color canon.
