Photographic Composition Richard D. Zakia,2017-11-10 However amazing the subject or technically excellent the photography, the single biggest factor in deciding whether a photograph is good or bad is how well it is composed. This book looks at this fundamental issue by offering instruction in a visual format. It covers the full range of compositional considerations.

The Photographic Experience, 1839-1914 Heinz K. Henisch,Bridget Ann Henisch,1994 The Photographic Experience deals with episodes and issues relating to the spread and practice of photography from its beginnings to World War I. Bridget and Heinz Henisch concern themselves with the reception accorded to the new art by professionals, amateurs, and the general public. They examine reactions to the new invention in the press, literature, poetry, music, and fashion; the response of intellectuals and painters; and the beliefs held by prominent photographers concerning the nature of the medium and its mission. With a wide array of images - many never before published - they illustrate the photograph's use as a record of public and private moments in life.

Touching Surfaces Anca Cristofovici,2009 Who isn't seduced by the idea of an affinity between aging and aesthetics? Yet, when does aging truly begin? What attributes does the aesthetic embrace? Looking into startling photographic art of the past three decades, this book is prompted by such questions and turns them into a meditation on how aesthetics mediates our relation to time. The photographic approach of the corporeal is at the center of the book. Within a phenomenological framework, Cristofovici brings into focus the physical and the psychic body to read aging as a process of change and becoming over time. Her understanding of aging sees beyond difference into larger patterns of perceptions that we share. Offering valuable insights into aging as a process of subject construction, this book will be of interest to students and scholars of visual culture, photography, art history, age studies, and theories of knowledge. This cross-disciplinary study that puts theory to the test of life's and art's paradoxes in an evocative style will also appeal to a wider readership interested in how photography and aging illuminate each other.

The Pioneering Photographic Work of Hercule Florence Boris Kossoy,2017-12-14 This book delivers an in-depth analysis of Hercule Florence, who is virtually unknown despite being among the world's photographic pioneers. Based on the texts of various manuscripts, letters, diaries, notes, and advertisements, this book answers numerous questions surrounding Florence's work, including the materials, methods, and techniques he employed and why it took more than a century for his discovery to come to light. Kossoy's groundbreaking research establishes Florence's use of photographie to describe the product of his experiments, half a decade before Sir John Herschel recommended photography to Henry Fox Talbot. This book aims to change the fact that despite its cultural and historical importance, Florence's photographic breakthrough remains largely unknown in the English-speaking world.

Fire & Ice Frederic Edwin Church,Thomas Weston Fels,2002 Frederic Church (1826-1900), who gained international renown for paintings such as Niagara (1857), The Heart of the Andes (1859), Twilight in the Wilderness (1860), and The Icebergs (1861), was inspired by his extensive travel and study. His work was also informed by his appreciation of a new visual medium. Fire & Ice, a selection from the several thousand photographs and daguerreotypes Church collected at Olana, his Orientalist home on the Hudson River, provides insight into the interests and taste of one of nineteenth-century America's greatest painters.

Decolonizing images Ronnie Close,2024-02-06 The 2011 revolution put Egypt at the centre of discussions around radical transformations in global photographic cultures. But Egypt and photography share a longer, richer history rarely included in western accounts of the medium. Decolonizing images focuses on the country's local visual heritage, continuing the urgent process of decolonizing the canon of photography. It presents a new account of the visual cultures produced and exhibited in Egypt by interpreting the camera's ability to conceal as much as it reveals. The book moves from the initial encounters between local knowledge and western-led modernity to explore how the image intersects with the politics of representation, censorship, activism and aesthetics. It overturns Eurocentric understandings of the photograph through a compelling narrative of contemporary Egypt's indigenous visual culture.

Locating Memory Annette Kuhn,Kirsten Emiko McAllister,2006 Paying close attention to the setting in which photographs are made and used, the contributors consider how meanings in photographs, from historical inquiry to quests for identity, may be shifted, challenged and renewed over time and for different purposes.

Historic Photographic Processes: A Guide to Creating Handmade Photographic Images Richard Farber,1998-10-01 Historic Photographic Processes is a comprehensive user's guide to the historical processes that have become popular alternatives to modern and digital technology. Though many of the techniques, applications, and equipment were first developed in the nineteenth century, these same methods can be used today to create hand-crafted images that are more attractive and permanent than conventional prints or digital outputs. Fine-art photographer Richard Farber incorporates extensive research with clearly-written directions and resource lists to provide in-depth information on eight of the most enduring processes in photographic history, including salted paper, albumen, cyanotype, kallitype, platinum/palladium, carbon/carbro, gum bichromate, and bromoil. He guides the reader through each step, from selecting the appropriate paper and sensitizing it to exposing, developing, and toning the final print. Each method is accompanied by a short explanation of how it was originally used and its significance in the evolution of photography. Historic Photographic Processes contains more than fifty color and ten black-and-white images that beautifully illustrate each of the processes described. Chapters include an introduction to photographic techniques and applications, such as useful safelights, sizing paper, measuring solutions, exposure

controls, ultraviolet light sources, and making enlarged negatives, as well as an extensive section on safety in- and outside of the darkroom. The appendix provides important information on the chemicals discussed, as well as health-and-safety references, supply sources in the United States, Canada, and Europe, and a complete catalog of Internet resources. Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don't aspire to publish a New York Times bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.

At Face Value and Beyond Monika Schwärzler, 2016-04-30 How to account for the peculiar attraction of certain photos? How to deal with the specific use of images in particular contexts? Monika Schwärzler presents a variety of photographic case studies exploring visual phenomena from the point of view of media analysis as well as from sociological, aesthetic, and psychoanalytic perspectives. The topics range from a new reading of Thomas Struth's street photographs to CERN photos with their charged rhetoric, from the assault of photographic close-ups to speculations on an anonymous slide collection featuring a woman with an ever-present white handbag. The book is intended for an audience receptive to the analytical appeal of images, prepared to go beyond what can be taken at face value.
