Parts Tedd Arnold, 1997-09-01 I just don't know what's going on or why it has to be. But every day it's something worse. What's happening to me? So begins this uproarious new story from the best-selling creator of *No Jumping on the Bed!*, *Green Wilma*, and other popular books. The young narrator has discovered a disturbing trend: There's fuzz in his belly button his toes are peeling and something just fell out of his nose. The last straw is a loose tooth, which convinces him of the awful truth his parts are coming unglued! *Parts* deals with a subject of deepest interest to every young child: the stuff our bodies shed. Parents will appreciate the reassuring message that it's all quite normal, while Tedd Arnold's comical illustrations and rhyming text are guaranteed to make young readers laugh their heads off.

Karl and Carolina Uncover the Parts of a Book Sandy Donovan, 2010 It's never dull in the library! Silly stories and lively characters teach book basics, from how a book is made to understanding the Dewey Decimal System.

What is Part This, Part that Harriet Ziefert, 2013 Written in rhyme, this unique companion to the acclaimed *Do You Know Which Ones Will Grow?* takes a look at the parts that make up the whole of various things, actions, and concepts. Full color.

Book Parts Dennis Duncan, Adam Smyth, 2019-06-27 What would an anatomy of the book look like? There is the main text, of course, the file that the author proudly submits to their publisher. But around this, hemming it in on the page or enclosing it at the front and back of the book, there are dozens of other texts – page numbers and running heads, copyright statements and errata lists – each possessed of particular conventions, each with their own lively histories. To consider these paratexts – recalling them from the margins, letting them take centre stage – is to be reminded that no book is the sole work of the author whose name appears on the cover; rather, every book is the sum of a series of collaborations. It is to be reminded, also, that not everything is intended for us, the readers. There are sections that are solely directed at others – binders, librarians, lawyers – parts of the book that, if they are working well, are working discreetly, like a theatrical prompt, whispering out of the audience's ear-shot. *Book Parts* is a bold and imaginative intervention in the fast growing field of book history: it pulls the book apart. Over twenty-two chapters, *Book Parts* tells the story of the components of the book: from title pages to endleaves; from dust jackets to indexes – and just about everything in between. *Book Parts* covers a broad historical range that runs from the pre-print era to the digital, bringing together the expertise of some of the most exciting scholars working on book history today in order to shine a new light on these elements hiding in plain sight in the books we all read.

Look the Part Jewel E. Ann, 2018-01-12 Flint Hopkins finds the perfect tenant to rent the space above his Minneapolis-based law office. All the t's are crossed and i's dotted on Ellen's application. Her references are good. And she's easy on the eyes. Until ... Flint discovers Ellen Rodgers, Board-Certified Music Therapist, plays music. Bongos, guitars, singing-not Beethoven administered through noise-cancelling headphones. The cut-throat attorney serves up an eviction notice to the bubbly, constantly humming redhead who's too sexy for her own good. But luck is on Ellen's side when Flint's autistic son, Harrison, takes an instant liking to her. A single dad can't compete with guitars-and rats. Yes, she has pet rats. This woman ... She's annoyingly happy with a constant need to touch him-adjust his tie, button his shirt, invade his space, and mess with his mind. Still ... She must go. Their lust-hate relationship escalates into something beautiful and tragic. This sexy, romantic-comedy explores the things we want, the things we need, and the impossible decisions parents and children make to survive.

2017 CFR Annual Print Title 40 Protection of Environment - Part 63 (63.1440 to 63.6175) Office of The Federal Register, 2017-07-01

MRCOG Part One Alison Fiander, Baskaran Thilaganathan, 2016-10-13 Fully updated to reflect changes to the curriculum and question format since publication of the original edition, this book is essential reading for all Part 1 MRCOG candidates. A chapter has been added to mirror the new curriculum domain of data interpretation. Edited by experienced RCOG examiners and written by contributors to the RCOG's revision course, this comprehensive textbook provides extensive coverage of all curriculum areas covered by the Part 1 examination (the basic sciences which are vital to the clinical practice of obstetrics and gynaecology). Fully illustrated in colour throughout to aid understanding, this is the one textbook that every Part 1 candidate should own. The content is complementary to RCOG's eLearning programme StratOG (<https://stratog.rcog.org.uk>) which offers a range of products to support training and professional development in obstetrics and gynaecology, including banks of Single Best Answer (SBA) questions that offer candidates invaluable practice at tackling this demanding examination.

Preparation for MRCP Part II P. Siklos, S. Olczak, 2012-12-06 This book is directed towards post-graduates who have passed Part I of the examination for Membership of the Royal College of Physicians and are preparing for Part II. However, it is hoped that physicians at all stages of their careers will find some parts that interest them. Most of the material has appeared in the Hospital Update series, 'Preparation for MRCP', but this has been modified and expanded; many useful points arising from correspondence relating to the series have been included, and the authors would like to express their thanks to those who have written. It is not intended that this should be used as a work of reference, although there is detailed discussion of some subjects. Only the written part of the examination is dealt with in detail, but the introduction contains hints on tackling the clinical sections which the authors hope the candidates will find valuable. There is, however, no substitute for clinical practice under supervision. The questions in Vll PREFACE the written section of the examination require short answers so that marking may be easy and objective. This book contains questions similar to those that may be encountered in the examination, but the answers have been expanded as a basis for discussion. It is hoped that this will encourage the candidate to read around the subjects covered, and the authors recommend that the questions are used as a basis for group discussion, as answers other than those in the text may be considered.

Where are you? Self- and body part localization using virtual reality setups Albert van der Veer ,2019-09-19 This volume presents a line of original experimental studies on the bodily self, investigating where people locate themselves in their bodies and how accurate they are at localizing their body parts. So far, it was not well known whether people locate themselves in one or more specific regions of their bodies. On the other hand, some systematic distortions in indicating bodily locations were already documented. In the present studies, participants were therefore asked to indicate their self-locations, as well as the locations of several of their body parts, using a self-directed, first-person perspective pointing paradigm in various virtual reality (VR) setups (different head-mounted displays and a large-screen immersive display). Overall, participants were found to locate themselves mainly in the (upper) face and the (upper) torso. However, striking differences in self-localization were found when testing in different VR setups. Upon further investigation, these differences were found to be foremost due to inaccuracies in body part localization. When taking these inaccuracies into account, differences between setups—and also with self-localization outside of VR—largely disappear. Another striking finding was that providing participants—in between pointing phases—with information about their bodies in the form of a real-time animated self-avatar, did not make them more accurate at locating their own body parts. While manipulating their viewpoint to chest-height of their self-avatar did shift the afterwards indicated locations of their own body parts upwards, towards where they were seen on the avatar. Potential explanations for the various new findings, also from tasks outside of VR, are discussed. Taken together, this volume suggests a differential involvement of multi-sensory information processing in experienced self-location within the body and the ability to locate body parts. Self-localization seems to be less flexible, possibly because it is strongly grounded in the 'bodily senses', while body part localization appears more adaptable to the manipulation of sensory stimuli, at least in the visual modality.

Part-Time Work and Employee Satisfaction Paula Müller,2018-11-28 Essay from the year 2014 in the subject Leadership and Human Resource Management - Miscellaneous, grade: 1,0, University of Applied Sciences Dresden, language: English, abstract: Is part-time work the key to happier families? Empirical findings on job-satisfaction and personal happiness of part-time workers. Over the last decades, there has been a large increase of women in jobs and hence an increase in dual-earner households. Consequently, a significantly higher amount of stress and

pressure on men and women has been observed as it is difficult to combine the duties at work and at home which can reduce the overall quality of life and threat the work-life balance. For many people part-time work can be a solution to this problem especially in industrial nations. By definition, an employee works part-time if he regularly works fewer hours than a comparable full-time employee. The number of hours varies from state to state and institution to institution. However, there has been an increase in part-time work also in traditionally full-time professions. In Europe about 32% of all women and 8% of men work part-time, though this rate is lowest in eastern countries and highest in northern and western countries. In the USA about 23% of employees work part-time. But does part-time employment really increase the personal and work satisfaction? Why is the satisfaction higher or lower and what are benefits and disadvantages of part-time work? Moreover, what determines the satisfaction in part-time arrangements apart from influences of work and personal life?
