Primary Education Thinking Skills 1 Sally Thomson,Dodie Merritt,Margaret Wolfe,2012-06 PETSTM (Primary Education Thinking Skills) is a systematized enrichment and diagnostic thinking skills program. Lessons are presented in convergent analysis, divergent synthesis, visual/spatial thinking, and evaluation, suitable for grades K-3. The program aligns to the higher levels of Bloom's Taxonomy. PETSTM 1, the red book, introduces the six thinking specialists of Crystal Pond Woods: Dudley the Detective, the convergent/deductive thinker, Isabel the Inventor, the divergent/inventive thinker, Sybil the Scientist, the convergent/analytical thinker, Yolanda the Yarnspinner, the divergent/creative thinker, Max the Magician, the visual/spatial thinker, Jordan the Judge, the evaluative thinker. Included in the 24 lessons are encounters with the animal characters who are engaged in problem-solving scenarios calling for their types of thinking -- four lessons involving each character (two whole class lessons to help identify talented learners with accompanying reproducible activities, and two small group lessons for identified students and accompanying reproducible activities). PETSTM helps build behavioral portfolios for talented learners that support a differentiated approach to their education, integrates flexibly into any existing primary curriculum, and offers opportunities for learners with different strengths to shine--Amazon.com.

Companion Animals and Us Anthony L. Podberscek, Elizabeth S. Paul, James A. Serpell, Professor of Humane Ethics & Animal Welfare James A. Serpell, 2000-04-13 Over the past 30 years there has been a tremendous growth in interest in the multidisciplinary field of human-companion animal interactions and relationships. This is not surprising considering that pets are kept in at least half of the households in Western societies. What then, is so special about the relationships people have with their pets? Are we very different from our ancestors in the ways we feel about animals? What does pet-keeping tell us about ourselves and our relationships with people? Can pets be good for our health? Do they help promote empathy for other humans? These questions and more are explored in this book. Companion Animals and Us brings together some of the newest research from a wide variety of disciplines including anthropology, history, psychology, sociology, human and veterinary medicine. This book will make fascinating reading for anyone interested in understanding more about the human-pet relationship.

Pets in America Katherine C. Grier, 2010-11-15 Entertaining and informative, Pets in America is a portrait of Americans' relationships with the cats, dogs, birds, fishes, rodents, and other animals we call our own. More than 60 percent of U.S. households have pets, and America grows more pet-friendly every day. But as Katherine C. Grier demonstrates, the ways we talk about and treat our pets--as companions, as children, and as objects of beauty, status, or pleasure--have their origins long ago. Grier begins with a natural history of animals as pets, then discusses the changing role of pets in family life, new standards of animal welfare, the problems presented by borderline cases such as livestock pets, and the marketing of both animals and pet products. She focuses particularly on the period between 1840 and 1940, when the emotional, behavioral, and commercial characteristics of contemporary pet keeping were established. The story is filled with the warmth and humor of anecdotes from period diaries, letters, catalogs, and newspapers. Filled with illustrations reflecting the whimsy, the devotion, and the commerce that have shaped centuries of American pet keeping, Pets in America ultimately shows how the history of pets has evolved alongside changing ideas about human nature, child development, and community life. This book accompanies a museum exhibit, Pets in America, which opens at the McKissick Museum in Columbia, South Carolina, in December 2005 and will travel to five other cities from May 2006 through May 2008.
