## **Phonics for Pupils with Special Educational Needs Book 1: Building Basics**

Ann Sullivan, 2018-10-12 Phonics for Pupils with Special Educational Needs is a complete, structured, multisensory programme for teaching reading and spelling, making it fun and accessible for all. This fantastic seven-part resource offers a refreshingly simple approach to the teaching of phonics, alongside activities to develop auditory and visual perceptual skills. Specifically designed to meet the needs of pupils of any age with special educational needs, the books break down phonics into manageable core elements and provide a huge wealth of resources to support teachers in teaching reading and spelling. Book 1: Building Basics introduces basic sounds and explores their relationship with letters. It focuses on sounds and letters where there is a simple 1:1 correspondence between the two, and explores the sounds in simple words that follow the pattern of vowel-consonant or consonant-vowel-consonant. Sounds are grouped into seven sets, with each set containing more than 50 engaging activities, including: sound story, dynamic blending, reading race, spot the word and spelling challenge. Thorough guidance is provided on how to deliver each activity, as well as a lesson planner template, handy word lists and posters for teachers and teaching assistants to use to support learning. Each book in the series gradually builds on children's understanding of sounds and letters and provides scaffolded support for children to learn about every sound in the English language. Offering tried and tested material which can be photocopied for each use, this is an invaluable resource to simplify phonics teaching for teachers and teaching assistants and provide fun new ways of learning phonics for all children. This book is accompanied by a companion resource, 'Phonics

for Pupils with Complex SEND ', to be used alongside the Phonics for Pupils with Special Educational Needs programme. The activities from Books 1-6 of the programme are adapted to be accessible for non-verbal pupils, including AAC users, and those with physical disabilities.

Phonics First Hunter A. Calder, 1999 BOOKS IN SERIES: 8 BOOKS IN READING FREEDOM 2000 PROGRAM: 24 ISBN: 978174020 0202 AUTHOR: Hunter Calder RRP: \$13.95 PAGES: 72 pp. The Phonics First series has been written specifically for pre-readers and beginning readers (suggested age 4 - ... 6). The series is carefully structured to develop phonemic awareness - ... the ability to identify individual sounds in words as well as the ability to blend sounds into meaningful words. In Phonics First Book 5, students are introduced to higher order phonics skills and generalisations. They learn the common consonant digraphs, long vowel rules, and the soft 'ec',, and 'eg',, sounds. Through a variety of motivational exercises and activities students develop their skills so they are able to read words containing these sounds with accuracy and fluency. The Reading Freedom 2000 Diagnostic Handbook should be used to place students at the correct level in the program. In order to work successfully with the Phonics First Activity Books, teachers should refer to the Phonics First Teacher Resource Book and monitor student progress with the Phonics First Achievement Tests.

**Phonics They Use** Patricia Marr Cunningham, 2013 A collection of practical activities that provide a framework for teaching phonics.

*Whole to Part Phonics* Henrietta Dombey, Myra Barrs, Margaret Moustafa, 1998 Researchers have discovered that traditional phonics, with its emphasis on letters, sounds, and words, ignores the complexity of children's natural learning processes, including children's inclination to focus first on the text, then on whole words, and then on their constituent parts. Whole-to-part phonics offers a concise, accessible introduction to this research and proven strategies for translating it into effective classroom practice. The contributors to Whole-to-part phonics recognize that children need to understand letter-sound relationships in order to become independent and fluent readers. But, they argue, this knowledge is of little value unless children learn how to use it in context. Accordingly, the authors maintain that children's encounters with print lay the groundwork for effective phonics learning. By drawing on children's wider experience and their preferred modes of learning, whole-to-part phonics enables students to focus on the construction of meaning rather than the decoding of text.

*Phonics Exposed* Richard J. Meyer, 2001-11-01 What are the implications of teaching phonics via a systematic direct intense program that mandates all children to experience the same scripted lesson at the same time? This book addresses the question through an in-depth play-by-play description of a phonics lesson as it occurred in a real classroom, followed by chapters that look at it from different angles by zooming in on one facet to analyze it closely: \*Reading. What is reading? What definition of reading is presented (implicitly) in the phonics lesson? What do competing definitions from the reading research literature say about how important phonics rules are and how they are used by readers and teachers of reading? \*Teacher knowledge. What is the role and the place of teacher knowledge as it relates to the lesson? What are the skills a teacher has and needs to use in a lesson that is completely

scripted ? \*The children. What are their roles and positions during the lesson? What are they learning? \*Curriculum. Where does the phonics curriculum come from? Curriculum in general? Who does it serve and how? What is its purpose? \* Culture. What is the role of culture in the lesson? How do cultural differences and culturally relevant pedagogy relate to the scripted phonics lesson? \*Politics and ideology. Why and how is everything that happens in schools political? How are scripted lessons and resistance to them, forms of political action? \*Teacher professionalism. How can teachers act in order to maintain academic freedom expressed as professional decision making in classrooms? The author of this book is not neutral. He presents the difficulties a teacher encounters in implementing mandated systematic, direct, intense phonics instruction and children who are confused and frustrated by it. But at the same time he constantly presents hope in the form of smart teachers, curious children, and possibilities for taking action that can lead to change. His direct, accessible writing style stimulates thought and discussion.

Many of the worksheets engage children in creating new words and using them in context. The words are age-appropriate and the reading selections have been created using the Spache Readability Formula. These activities can be used in any reading program with children of all ability levels. They provide the extra practice that many children need to master beginning reading skills.

*Trek to Oak Forest/The Slow Tow - Book 13* Debbie Hepplewhite MBE  
FRSA,2022-10-10 ABOUT THIS READING BOOK SERIES These cumulative, decodable phonics ebooks provide an effective and enjoyable 'stand-alone' approach to teach beginning reading. They are also designed to complement No Nonsense Phonics Skills (Pupil Books 1 to 8) and the Phonics International programme - a FREE online programme (Units 1 to 6 of 12 Units). The books can be used to complement and supplement other early reading programmes and reading instruction. The series is colour-coded for ease of organisation and management. The back covers indicate the code featured cumulatively in each book. Purpose - these books are designed for children: 1. to practise the technical skill of decoding new printed words by sounding out and blending ('lifting the words off the page') using their knowledge of letter/s-sound correspondences (the alphabetic code) 2. to learn the meaning of new words, enriching their vocabulary, in the context of events in the storylines 3. to practise reading aloud with increasing confidence and fluency - learning how to use expression when re-reading The books are challenging: The books are structured to be 'cumulative' and 'decodable' and they are also challenging. They include shorter and longer words from the outset and some words that are likely to be new to children's spoken language. Generally, there are many words on most pages to provide plenty of accurate decoding practice. After the children have decoded any new words they do not automatically recognise, the supporting adult can discuss the storylines, including with reference to

the illustrations, to explain new words. There is 'Vocabulary Support' in the back of the books. Capital letters are code for the same sounds as their lower case letters. Children should attempt to decode the words, sentences or pages by themselves at first with the adult encouraging, supporting, re-reading words, sentences and pages as required. Some beginners may only manage one page in any one reading session until they have perfected the phonics skill of sounding out in response to letters and letter groups, and blending the sounds (synthesising) to decode new words. Children learn at different rates and have different needs: Debbie's approach includes incidental phonics teaching and support as well as systematic provision. Some children may need reminding of letter/s-sound correspondences that are not yet embedded in memory. Some children will self-teach as they learn more about the alphabetic code, and some children will recognise words they've previously read more easily than others. Some children may be able to 'discern' (detect) a word they've sounded out because they know the word in their spoken language, but struggle to 'discern' a new printed word that is not in their spoken language. This will improve over time as children decode and learn new words from the literature they read not just the words they hear and speak. Using the books in the school and at home advisedly: In school, teachers may decide to use these books lagging behind the introduction of the various letter/s-sound correspondences for additional reading practice. Both the No Nonsense Phonics and the Phonics International programmes already provide plain 'matched texts' for children's reading, writing, spelling and language comprehension. These reading books are additional and complementary to the phonics programmes. Teachers may decide to cascade these books to children for home-reading starting with the

children who are the quickest and most adept at sounding out and blending to decode new words. Teachers may decide to use these books in school for supported practice in school before sending them home for re-reading in the home. Again, this may depend on the children themselves and how teachers decide the books will be most beneficial – particularly when children are beginners. Teachers may use later books differently according to children's changing needs over time. Children can be introduced to letter/s-sound correspondences 'incidentally' and this will add to their code knowledge and capacity to self-teach over time. Illustrations: The pictures in children's books enhance the storylines and often tell a story beyond the words on the pages. It is important that the 'back and forth' discussions between adults and children always take place with these phonics reading books no less than with storybooks. In addition, 'homophones' are so common in the English language that it is helpful, as adults, to point out that the same words can have various meanings in different contexts – and to engage children fully with this notion. About the 'sounds' and the alphabetic code: Parents and carers can 'hear' the sounds via an audio Alphabetic Code Chart at [alphabeticcodecharts.com](http://alphabeticcodecharts.com). There are also free printable alphabetic code charts at this site. Tweaking or modifying pronunciation: It is very common that a spoken word's final pronunciation needs to be 'tweaked' or 'modified' after sounding out and blending. Early examples of this are words such as 'is', 'his', 'as', 'has'. In reality, these words are pronounced 'iz', 'hiz', 'az', 'haz' with a /z/ sound at the end, not a /s/ sound, but most children who are decoding these words will automatically sound them out and then say them with their correct pronunciation even without thinking about it. The sooner adults and children alike understand this constant process of slight

modification of pronunciation (as required), the sooner a wider range of words can be included for beginners.
