Historic Photos of Mississippi ,2009-05-01 Imagine a ride with the Mississippi mockingbird as it soars through the Mississippi skies. Beginning in the land of Elvis at Tupelo, one moves down to the Piney Woods of East Central Mississippi where the ground is covered with fragrant pine straw and where Choctaw moccasins once walked the trails. Then turn south where the ocean waves swell upon sandy beaches and sea gulls hover and squawk in the breeze. Continue onward to the mansions of historic Natchez and the cotton fields of the Mississippi Delta where the blues reigns supreme. Finally, swoop down toward Old Man River, the majestic Mississippi, and skim across its yellow waters. The waters have seen war and defeat, loss and love, heartbreaks and triumphs. No sentiments need speaking. Only the sweet songs of the mockingbird are required to understand a land whose beauty is second only to the strength of its people. Through nearly 200 images printed in vivid black-and-white, with brief introductions and captions, Historic Photos of Mississippi takes the viewer on a flightpath to key points of interest in historic Mississippi.

**Pocket Guide - Stock Photos** Steve McNewman,2017-09-27 With the invention of the digital camera, most of us have large collections of photos in our personal libraries. Some have photos in several libraries like iPhoto, Picasa, and Flickr. Amongst the hundreds of photos we have, there are many that would qualify as stock photos. The photos that we identified as stock, can be uploaded to a number of different photos stock sites. Once there, they are made available for purchase and download to interested buyers.

*Family Photo Detective* Maureen A. Taylor,2023-04-19 Historical family photos are cherished heirlooms that offer a glimpse into the lives of our ancestors. But the images, and the stories behind them, often fade away as decades pass--the who, when, where, and why behind the photos are lost. In this book, photo identification expert and genealogist Maureen A. Taylor shows you how to study the clues in your old family photos to put names to faces and recapture their lost stories.

*Visualizing Climate Change* Stephen R.J. Sheppard,2012-03-29 Carbon dioxide and global climate change are largely invisible, and the prevailing imagery of climate change is often remote (such as ice floes melting) or abstract and scientific (charts and global temperature maps). Using dramatic visual imagery such as 3D and 4D visualizations of future landscapes, community mapping, and iconic photographs, this book demonstrates new ways to make carbon and climate change visible where we care the most, in our own backyards and local communities. Extensive color imagery explains how climate change works where we live, and reveals how we often conceal, misinterpret, or overlook the evidence of climate change impacts and our carbon usage that causes them. This guide to using visual media in communicating climate change vividly brings to life both the science and the practical solutions for climate change, such as local renewable energy and flood protection. It introduces powerful new visual tools (from outdoor signs to video-games) for communities, action groups, planners, and other experts to use in engaging the public, building awareness and accelerating action on the world's greatest crisis.

*Photos by Ran.* D. Randall S. Underwood,2021-02-09 Back in the early eighties I used to hop on a bus or get in a car and drive over to a magical island, the island of Manhattan. My cousin gave me a camera along with a few canisters of film. I had a little darkroom in my basement. I snapped these pictures. It was a fun time for me and great memories were created hanging out on the scene, in the clubs and on the streets of the

Lower East Side. I met some great people, some to this day I am still friends with. I have been hoarding these images for a long time. I guess this is as good a time to share them as any. Enjoy the pictures, Ran.D.

The Photo Ark Joel Sartore,2017 This book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals -- especially those that are endangered. His message: to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits: from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the prose of veteran wildlife writer Douglas Chadwick, this book presents an argument for saving all the species of our planet.
