- How to organize and edit your photos like a pro!
- The pros' top tips for making amazing shots of everything from flowers to product shots, from food photography to travel shots, and everything in between.

**Learn to ask better, more helpful questions of your work so that you can create stronger and more powerful photographs.**

Photographers often look at an image—one they’ve either already created or are in the process of making—and ask themselves a simple question: “Is this a good photograph?” It’s an understandable question, but it’s really not very helpful. How are you supposed to answer that? What does “good” even mean? Is it the same for everyone?

What if you were equipped to ask better, more constructive questions of your work so that you could think more intentionally and creatively, and in doing so, bring more specific action and vision to the act of creating photographs? What if asking stronger questions allowed you to establish a more effective approach to your image-making? In *The Heart of the Photograph: 100 Questions for Making Stronger, More Expressive Photographs*, photographer and author David duChemin helps you learn to ask better questions of your work in order to craft more successful photographs—photographs that express and connect, photographs that are strong and, above all, photographs that are truly yours.

From the big-picture questions—What do I want this image to accomplish?—to the more detail-oriented questions that help you get there—What is the light doing? Where do the lines lead? What can I do about it?—David walks you through his thought process so that you can establish your own. Along the way, he discusses the building blocks from which compelling photographs are made, such as gesture, balance, scale, contrast, perspective, story, memory, symbolism, and much more. *The Heart of the Photograph* is not a theoretical book. It is a practical and useful book that equips you to think more intentionally as a photographer and empowers you to ask more helpful questions of you and your work, so that you can produce images that are not only better than “good,” but as powerful and authentic as you hope them to be.

Photography and Belief David Levi Strauss,2020-10-27 In this exploration of contemporary photography, David Levi Strauss questions the concept that “seeing is believing” Identifying a recent shift in the dominance of photography, David Levi Strauss looks at the power of the medium in the age of Photoshop, smart phones, and the internet, asking important questions about how we look and what we trust. In the first ekphrasis title on photography, Strauss challenges the aura of believability and highlights the potential dangers around this status. He examines how images produced on cameras gradually gained an inordinate power to influence public opinion, prompt action, comfort and assuage, and direct or even create desire. How and why do we believe technical images the way we do? Offering a poignant argument in the era of “fake news,” Strauss draws attention to new changes in the technology of seeing. Some uses of technical images are causing the connection between images and belief (between seeing and believing) to fray and pull apart. How is this shifting our relationship to images? Will this crisis in what we can believe come to threaten our very purchase on the real? This book is an inquiry into the history and future of our belief in images.

Making a Photographer Rebecca A. Senf,2020-02-08 An unprecedented and eye-opening examination of the early career of one of America’s most celebrated photographers One of the most influential photographers of his generation, Ansel Adams (1902-1984) is famous for his dramatic photographs of the American West. Although many of Adams’s images are now iconic, his early work has remained largely unknown. In this first monograph dedicated to the beginnings of Adams’s career, Rebecca A. Senf argues that these early photographs are crucial to understanding Adams’s artistic development and offer new insights into many aspects of the artist’s mature oeuvre. Drawing on copious archival research, Senf traces the first three decades of Adams’s photographic practice—beginning with an amateur album made during his childhood and culminating with his Guggenheim-supported National Parks photography of the 1940s. Highlighting the artist’s persistence in forging a career path and his remarkable ability to learn from experience as he sharpened his image-making skills, this beautifully illustrated volume also looks at the significance of the artist’s environmentalism, including his involvement with the Sierra Club.
