## **Learn to ask better, more helpful questions of your work so that you can create stronger and more powerful photographs.**

Photographers often look at an image—one they've either already created or are in the process of making—and ask themselves a simple question: "Is this a good photograph?" It's an understandable question, but it's really not very helpful. How are you supposed to answer that? What does "good" even mean? Is it the same for everyone?

What if you were equipped to ask better, more constructive questions of your work so that you could think more intentionally and creatively, and in doing so, bring more specific action and vision to the act of creating photographs? What if asking stronger questions allowed you to establish a more effective approach to your image-making? In *The Heart of the Photograph: 100 Questions for Making Stronger, More Expressive Photographs*, photographer and author David duChemin helps you learn to ask better questions of your work in order to craft more successful photographs—photographs that express and connect, photographs that are strong and, above all, photographs that are truly yours.

From the big-picture questions—What do I want this image to accomplish?—to the more detail-oriented questions that help you get there—What is the light doing? Where do the lines lead? What can I do about it?—David walks you through his thought process so that you can establish your own. Along the way, he discusses the building blocks from which compelling photographs are made, such as gesture, balance, scale, contrast, perspective, story, memory, symbolism, and much more. *The Heart of the Photograph* is not a theoretical book. It is a practical and useful book that equips you to think more intentionally as a photographer and empowers you to ask more helpful questions of you and your work, so that you can produce images that are not only better than "good," but as powerful and authentic as you hope them to be.

The Art of Photography, 2nd Edition Bruce Barnbaum, 2017-04-12 This is an updated and newly revised edition of the classic book *The Art of Photography: An Approach to Personal Expression*. Originally published in 1994 and first revised in 2010, *The Art of Photography* has sold well over 100,000 copies and has firmly established itself as the most readable, understandable, and complete textbook on photography. Featuring nearly 200 beautiful photographs in both black-and-white and color, as well as numerous charts, graphs, and tables, this book presents the world of photography to beginner, intermediate, and advanced photographers who seek to make a personal statement through the medium of photography. Without talking down to anyone or talking over anyone's head, renowned photographer, teacher, and author Bruce Barnbaum presents how-to techniques for both traditional and digital approaches. In this newest edition of the book, Barnbaum has included many new images and has completely revised the text, with particular focus on two crucial chapters covering digital photography: he revised a chapter covering the digital zone system, and includes a brand-new chapter on image adjustments using digital tools. There is also a new chapter discussing the concepts of "art versus technique" and "traditional versus digital" approaches to photography. Throughout the book, Barnbaum goes well beyond the technical, as he delves deeply into the philosophical, expressive, and creative aspects of photography so often avoided in other books. Barnbaum is recognized as one of the world's finest landscape and architectural photographers, and for decades has been considered one of the best instructors in the field of photography. This latest incarnation of his textbook—which has evolved, grown, and been refined over the past 45 years—will prove to be an ongoing, invaluable photographic reference for years to come. It is truly the resource of choice for the thinking photographer. Topics include: • Elements of Composition • Visualization • Light and Color • Filters • Black-and-White • The Digital Zone System • The Zone System for Film • Printing and Presentation • Exploding Photographic Myths • Artistic Integrity • Realism, Abstraction, and Art • Creativity and Intuition • A Personal Philosophy • And much, much more...

*Photography and Belief* David Levi Strauss, 2020-10-27 In this exploration of contemporary photography, David Levi Strauss questions the concept that "seeing is believing" Identifying a recent shift in the dominance of photography, David Levi Strauss looks at the power of the medium in the age of Photoshop, smart phones, and the internet, asking important questions about how we look and what we trust. In the first ekphrasis title on photography, Strauss challenges the aura of believability and highlights the potential dangers around this status. He examines how images produced on cameras gradually gained an inordinate power to influence public opinion, prompt action, comfort and assuage, and direct or even create desire. How and why do we believe technical images the way we do? Offering a poignant argument in the era of "fake news," Strauss draws attention to new changes in the technology of seeing. Some uses of technical images are causing the

connection between images and belief (between seeing and believing) to fray and pull apart. How is this shifting our relationship to images? Will this crisis in what we can believe come to threaten our very purchase on the real? This book is an inquiry into the history and future of our belief in images.

**Making a Photographer** Rebecca A. Senf, 2020-02-08 An unprecedented and eye-opening examination of the early career of one of America's most celebrated photographers One of the most influential photographers of his generation, Ansel Adams (1902-1984) is famous for his dramatic photographs of the American West. Although many of Adams's images are now iconic, his early work has remained largely unknown. In this first monograph dedicated to the beginnings of Adams's career, Rebecca A. Senf argues that these early photographs are crucial to understanding Adams's artistic development and offer new insights into many aspects of the artist's mature oeuvre. Drawing on copious archival research, Senf traces the first three decades of Adams's photographic practice—beginning with an amateur album made during his childhood and culminating with his Guggenheim-supported National Parks photography of the 1940s. Highlighting the artist's persistence in forging a career path and his remarkable ability to learn from experience as he sharpened his image-making skills, this beautifully illustrated volume also looks at the significance of the artist's environmentalism, including his involvement with the Sierra Club.

**Forget Photography** Andrew Dewdney, 2021-10-19 Why we must forget photography and reject the frame of reality it prescribes and delineates. The central paradox this book explores is that at the moment of photography's replacement by the algorithm and data flow, photographic cultures proliferate as never before. The afterlife of photography, residual as it may technically be, maintains a powerful cultural and representational hold on reality, which is important to understand in relationship to the new conditions. Forgetting photography is a strategy to reveal the redundant historicity of the photographic constellation and the cultural immobility of its epicenter. It attempts to liberate the image from these historic shackles, forged by art history and photographic theory. More important, perhaps, forgetting photography also entails rejecting the frame of reality it prescribes and delineates, and in doing so opens up other relationships between bodies, times, events, materials, memory, representation and the image. Forgetting photography attempts to develop a systematic method for revealing the limits and prescriptions of thinking with photography, which no amount of revisionism of post-photographic theory can get beyond. The world urgently needs to unthink photography and go beyond it in order to understand the present constitution of the image as well as the reality or world it shows. Forgetting photography will require a different way of organizing knowledge about the visual in culture that involves crossing different knowledges of visual culture, technologies, and mediums. It will also involve thinking differently about routine and creative labor and its knowledge practices within the institutions and organization of visual reproduction.
