The Power Book Joelle Avelino, 2019-10-01 With this inspiring and brightly illustrated guide to power, learn about the different types of power, what it means to have power, and what you can do with your own power to create positive change in the world, no matter who or how old you are. What makes you the boss of me? What makes a king a king, or a queen a queen? Why can some people vote for their leaders, but other people can't? Does having lots of money make you powerful? Why are there fewer female scientists, leaders, and artists than men in history books? These are things that kids wonder about. The Power Book answers these and other questions in a relatable way for young people, including thought-provoking discussions on challenging topics, like war, bullying, racism, sexism, and homophobia. You will gain an understanding of your place in your family, your school, and the world, and will discover ways in which you can use your own power to shape the future. As you explore the many aspects of power, thinking points pose questions that spark self-reflection and quotes and stories from some of the greatest change-makers--such as Gandhi, Martin Luther King Jr., Emmeline Pankhurst, Rosa Parks, Malala Yousafzai, and Stephen Hawking--provide historical context and inspiration. Find more opportunities for learning at the back with a glossary of terms and suggestions for further reading. Gain a greater understanding of how power works, then learn how to harness it for good with The Power Book.

New Power Jeremy Heimans, Henry Timms, 2018-04-03 From two influential and visionary thinkers comes a big idea that is changing the way movements catch fire and ideas spread in our highly connected world. For the vast majority of human history, power has been held by the few. Old power is closed, inaccessible, and leader-driven. Once gained, it is jealously guarded, and the powerful spend it carefully, like currency. But the technological revolution of the past two decades has made possible a new form of power, one that operates differently, like a current. New power is made by many; it is open, participatory, often leaderless, and peer-driven. Like water or electricity, it is most forceful when it surges. The goal with new power is not to hoard it, but to channel it. New power is behind the rise of participatory communities like Facebook and YouTube, sharing services like Uber and Airbnb, and rapid-fire social movements like Brexit and #BlackLivesMatter. It explains the unlikely success of Barack Obama's 2008 campaign and the unlikelier victory of Donald Trump in 2016. And it gives ISIS its power to propagate its brand and distribute its violence. Even old power institutions like the Papacy, NASA, and LEGO have tapped into the strength of the crowd to stage improbable reinventions. In New Power, the business leaders/social visionaries Jeremy Heimans and Henry Timms provide the tools for using new power to successfully spread an idea or lead a movement in the twenty-first century. Drawing on examples from business, politics, and social justice, they explain the new world we live in--a world where connectivity has made change shocking and swift and a world in which everyone expects to participate.

Revolutionary Power Shalanda Baker, 2021-01-14 In September 2017, Hurricane Maria hit Puerto Rico, completely upending the energy grid of the small island. The nearly year-long power outage that followed vividly shows how the new climate reality intersects with race and access to energy. The island is home to brown and black US citizens who lack the political power of those living in the continental US. As the world continues to warm and storms like Maria become more commonplace, it is critical that we rethink our current energy system to enable reliable, locally produced, and locally controlled energy without replicating the current structures of power and control. In Revolutionary Power, Shalanda Baker arms those made most vulnerable by our current energy system with the tools they need to remake the system in the service of their humanity. She argues that people of color, poor people, and indigenous people must engage in the creation of the new energy system in order to upend the unequal power dynamics of the current system. Revolutionary Power is a playbook for the energy transformation complete with a step-by-step analysis of the key energy policy areas that are ripe for intervention. Baker tells the stories of those who have been left behind in our current system and those who are working to be architects of a more just system. She draws from her experience as an energy-justice advocate, a lawyer, and a queer woman of color to inspire activists working to build our new energy system. Climate change will force us to rethink the way we generate and distribute energy and regulate the system. But how much are we willing to change the system? This unique moment in history provides an unprecedented opening for a deeper transformation of the energy system, and thus, an opportunity to transform society. Revolutionary Power shows us how.

Sources of Power Gary A. Klein, 1999-02-18 Anyone who watches the television news has seen images of firefighters rescuing people from burning buildings and paramedics treating bombing victims. How do these individuals make the split-second decisions that save lives? Most studies of decision making, based on artificial tasks assigned in laboratory settings, view people as biased and unskilled. Gary Klein is one of the developers of the naturalistic decision making approach, which views people as inherently skilled and experienced. It documents human strengths and capabilities that so far have been downplayed or ignored. Since 1985, Klein has conducted fieldwork to find out how people tackle challenges in difficult, nonroutine situations. Sources of Power is based on observations of humans acting under such real-life constraints as time pressure, high stakes, personal responsibility, and shifting conditions. The professionals studied include firefighters, critical care nurses, pilots, nuclear power plant operators, battle planners, and chess masters. Each chapter builds on key incidents and examples to make the description of the methodology and phenomena more vivid. In addition to providing information that can be used by professionals in management, psychology, engineering, and other fields, the book presents an overview of the research approach of naturalistic decision making and expands our knowledge of the strengths people bring to difficult tasks.

Total Power Vince Flynn, Kyle Mills, 2020-09-15 "One of the best thriller writers on the planet." --The Real Book Spy In the next thriller in the #1 New York Times bestselling Mitch Rapp series, it's a race against the clock when ISIS takes out the entire US power grid and throws the country into chaos. When Mitch Rapp captures ISIS's top technology expert, he reveals that he was on his way to meet a man who claims to have the ability to bring down America's power grid. Rapp is determined to eliminate this shadowy figure, but the CIA's trap fails. The Agency is still trying to determine what went wrong when ISIS operatives help this cyber terrorist do what he said he could--plunge the country into darkness. With no concept of how this unprecedented act was accomplished, the task of getting the power back on could take months. Perhaps even years. Rapp and his team embark on a desperate search for the only people who know how to repair the damage--the ones responsible. But his operating environment is like nothing he's experienced before. Computers and communication networks are down, fuel can no longer be pumped from gas stations, water and sanitation systems are on the brink of collapse, and the supply of food is running out. Can Rapp get the lights back on before America descends irretrievably into chaos? This compulsive thriller proves once again that the Mitch Rapp series is "the best of the best when it comes to the world of special ops" (Booklist, starred review).

The Education of an Idealist Samantha Power, 2019-09-10 A NEW YORK TIMES, WALL STREET JOURNAL, AND USA TODAY BESTSELLER An intimate, powerful, and galvanizing memoir by Pulitzer Prize winner, human rights advocate, and former US Ambassador to the UN Samantha Power. Named one of the best books of the year: The New York Times • National Public Radio • Time • The Economist • The Washington Post • Vanity Fair • Christian Science Monitor • Publishers Weekly • Audible “Her highly personal and reflective memoir . . . is a must-read for anyone who cares about our role in a changing world.”—President Barack Obama Includes an updated afterword Tracing her distinctly American journey from immigrant to war correspondent to presidential Cabinet official, Samantha Power’s acclaimed memoir is a unique blend of suspenseful storytelling, vivid character portraits, and shrewd political insight. After her critiques of US foreign policy caught the eye of Senator Barack Obama, he invited her to work with him on Capitol Hill and then on his presidential campaign. When Obama won the presidency, Power went from being an activist outsider to serving as his human rights adviser and, in 2013, becoming the youngest-ever US Ambassador to the United Nations. Power transports us from her childhood in Dublin to the streets of war-torn Bosnia to the White House Situation Room and the world of high-stakes diplomacy, offering a compelling and deeply honest look at navigating the halls of power while trying to put one’s ideals into practice. Along the way, she lays bare the searing battles and defining moments of her life, shows how she juggled the demands of a 24/7 national security job with raising two young children, and makes the case for how we each can advance the cause of human dignity. This is an unforgettable account of the power of idealism—and of one person’s fierce determination to make a difference. “This is a wonderful book. A Question of Power Robert Bryce, 2020-03-10 An acclaimed author and celebrated journalist breaks down the history of electricity and the impact of global energy use on the world and the environment. Global demand for power is doubling every two decades, but electricity remains one of the most difficult forms of energy to supply and do so reliably. Today, some three billion people live in places where per-capita electricity use is less than what's used by an average American refrigerator. How we close the colossal gap between the electricity rich and the electricity poor will determine our success in addressing issues like women's rights, inequality, and climate change. In *A Question of Power*, veteran journalist Robert Bryce tells the human story of electricity, the world's most important form of energy. Through onsite reporting from India, Iceland, Lebanon, Puerto Rico, New York, and Colorado, he shows how our cities, our money--our very lives--depend on reliable flows of electricity. He highlights the factors needed for successful electrification and explains why so many people are still stuck in the dark. With vivid writing and incisive analysis, he powerfully debunks the notion that our energy needs can be met solely with renewables and demonstrates why--if we are serious about addressing climate change--nuclear energy must play a much bigger role. Electricity has fueled a new epoch in the history of civilization. *A Question of*

The Future of Power Joseph S Nye Jr,2011-02-01 The Future of Power examines what it means to be forceful and effective in a world in which the traditional ideas of state power have been upended by technology, and rogue actors. Joseph S. Nye, Jr., a longtime analyst of power and a hands-on practitioner in government, delivers a new power narrative that considers the shifts, innovations, bold technologies, and new relationships that are defining the twenty-first century. He shows how power resources are adapting to the digital age and how smart power strategies must include more than a country's military strength. At the beginning of the twenty-first century, unsurpassed in military strength and ownership of world resources, the United States was indisputably the most powerful nation in the world. Today, China, Russia, India, and others are increasing their share of world power resources. Information once reserved for the government is now available for mass consumption. The Internet has literally put power at the fingertips of nonstate agents, allowing them to launch cyberattacks from their homes. The cyberage has created a new power frontier among states, ripe with opportunity for developing countries. To remain at the pinnacle of world power, the United States must adopt a strategy that designed for a global information age.

Real Power Janet O. Hagberg,2002-09-02 Janet O. Hagberg has written a dynamic book about power -real, personal power- for forward-looking people and organizations who want to harness their own power for the common good. I wrote this book, says Hagberg, to transform the way we think about power and leadership. It takes people on a journey beyond achievement and sucess to a stance in which power comes from their inner core and they lead from their souls. There is no doubt that the world is ready for a new model of leadership. In this third edition, Janet Hagberg addresses much that she has learned from her readers. The result is a deepening of the descriptions of each stage, a new way to think about the dark side of each stage, new stories of each stage derived from her readers, a connection to the spirituality expressed at each stage, as well a description of The Wall between Stages Four and Five. Throughout the book, the author adds more of her personal story to illustrate her experiences and observations of each of the stages of power.

On Power Gene Simmons,2017-11-14 YOU DESERVE TO HAVE POWER. IT IS YOURS FOR THE TAKING. GENE SIMMONS IS HERE TO UNLOCK THE DOORS TO THE TEMPLE. Gene Simmons, KISS front-man, multi-hyphenate entrepreneur, and master of self-invention, shares his philosophy on power-how to attain it, how to keep it, and how to harness it as a driving force in business and in life. As co-founder of KISS, America's #1 gold record-award-winning group of all time, Simmons knows the thrill and seduction of power firsthand. But gold records alone don't equal power. The decisions you make once you attain a certain level of success are what separate the pretenders from the pantheon. Inspired by Niccolo Machiavelli's The Prince, Simmons offers his unique take on the dynamics of power in every realm of life, from the bedroom to the boardroom, to the world of rock, celebrity, and social media, to politics. With one-of-a-kind anecdotes from his life and career, as well as stories from historical and contemporary masters of power, including Winston Churchill, Napoleon Bonaparte, Warren Buffett, Michael Jordon, Oprah, and Elon Musk, Simmons crafts a persuasive and provocative theory on how the pursuit of power drives civilization and defines our lives. The rules of power are changing in today's fast-paced, hyper-connected world in a way that Machiavelli never could have imagined, and we all need to learn to adapt. Simmons tells readers: Ignore the negatives. Be unrelenting. Rise above the rest. You are the architect of your success.

The Power of Sound Edmund Gurney,1880

Star Power Alain Bécoulet,2023-09-19 A concise and accessible explanation of the science and technology behind the domestication of nuclear fusion energy. Nuclear fusion research tells us that the Sun uses one gram of hydrogen to make as much energy as can be obtained by burning eight tons of petroleum. If nuclear fusion-the process that makes the stars shine-could be domesticated for commercial energy production, the world would gain an inexhaustible source of energy that neither depletes natural resources nor produces greenhouse gases. In Star Power, Alan Bécoulet offers a concise and accessible primer on fusion energy, explaining the science and technology of nuclear fusion and describing the massive international scientific effort to achieve commercially viable fusion energy. Bécoulet draws on his work as Head of Engineering at ITER (International Thermonuclear Experimental Reactor) to explain how scientists are trying to "put the sun in a box." He surveys the history of nuclear power, beginning with post-World War II efforts to use atoms for peaceful purposes and describes how energy is derived from fusion, explaining that the essential principle of fusion is based on the capacity of nucleons (protons and neutrons) to assemble and form structures (atomic nuclei) in spite of electrical repulsion between protons, which all have a positive charge. He traces the evolution of fusion research and development, mapping the generation of electric current though fusion. The ITER project marks a giant step in the development of fusion energy, with the potential to demonstrate the feasibility of a nuclear fusion reactor. Star Power offers an introduction to what may be the future of energy production.
