Advanced PowerPoint Wei-Chieh Wayne Yu,2018-11-14 PowerPoint is a comprehensive software application that has a variety of uses beyond presentations because of its advanced features, flexibility, and coding capabilities. The many advanced features not presented in textbooks, combined with the VBA coding capability, make PowerPoint an excellent software application for developing more advanced and interactive presentations, training and instructional materials, games and apps. This book does not require users to have VBA coding experience. The coding needed to complete applications is gradually integrated, step-by-step, throughout the text. Users learn to write basic code, and to understand and modify more complex code, thus greatly expanding the capabilities of this media application. Most users already know PowerPoint; however, most of them have no idea of the capabilities of this software application, and do not see it as an application for more than presentations.
