Presentation Zen Garr Reynolds, 2009-04-15 FOREWORD BY GUY KAWASAKI Presentation designer and internationally acclaimed communications expert Garr Reynolds, creator of the most popular Web site on presentation design and delivery on the Net — presentationzen.com — shares his experience in a provocative mix of illumination, inspiration, education, and guidance that will change the way you think about making presentations with PowerPoint or Keynote. Presentation Zen challenges the conventional wisdom of making slide presentations in today's world and encourages you to think differently and more creatively about the preparation, design, and delivery of your presentations. Garr shares lessons and perspectives that draw upon practical advice from the fields of communication and business. Combining solid principles of design with the tenets of Zen simplicity, this book will help you along the path to simpler, more effective presentations.

Presenting Medical Statistics from Proposal to Publication Janet L. Peacock, Sally M. Kerry, Raymond R. Balise, 2017-07-25 As many medical and healthcare researchers have a love-hate relationship with statistics, the second edition of this practical reference book may make all the difference. Using practical examples, mainly from the authors' own research, the book explains how

to make sense of statistics, turn statistical computer output into coherent information, and help decide which pieces of information to report and how to present them. The book takes you through all the stages of the research process, from the initial research proposal, through ethical approval and data analysis, to reporting on and publishing the findings. Helpful tips and information boxes, offer clear guidance throughout, including easily followed instructions on how to: -develop a quantitative research proposal for ethical/institutional approval or research funding -write up the statistical aspects of a paper for publication -choose and perform simple and more advanced statistical analyses - describe the statistical methods and present the results of an analysis. This new edition covers a wider range of statistical programs - SAS, STATA, R, and SPSS, and shows the commands needed to obtain the analyses and how to present it, whichever program you are using. Each specific example is annotated to indicate other scenarios that can be analysed using the same methods, allowing you to easily transpose the knowledge gained from the book to your own research. The principles of good presentation are also covered in detail, from translating relevant results into suitable extracts, through to randomised controlled trials, and how to present a meta-analysis. An added ingredient is the inclusion of code and datasets for all analyses shown in the book on our website (<http://medical-statistics.info>). Written by three experienced biostatisticians based in the UK and US, this is a step-by-step guide that will be invaluable to researchers and postgraduate students in medicine, those working in the professions allied to medicine, and statisticians in consultancy roles.

Speech, Writing, and Thought Presentation in 19th-Century Narrative Fiction Beatrix Busse,2020-07-07 Reference to or quotation from someone's speech, thoughts, or writing is a key component of narrative. These reports further a narrative, make it more interesting, natural, and vivid, ask the reader to engage with it, and reflect historical cultural understandings of modes of discourse presentation. To a large extent, the way we perceive a story depends on the ways it

presents discourse, and along with it, speech, writing, and thought. In this book, Beatrix Busse investigates speech, writing, and thought presentation in a corpus of 19th-century narrative fiction including *Frankenstein*, *Jane Eyre*, *Wuthering Heights*, *Oliver Twist*, and many others. At the intersection between corpus linguistics and stylistics, this book develops a new corpus-stylistic approach for systematically analyzing the different narrative strategies of discourse presentation in key pieces of 19th-century narrative fiction. *Speech, Writing, and Thought Presentation in 19th-Century Narrative Fiction* identifies diachronic patterns as well as unique authorial styles, and places them within their cultural-historical context. It also suggests ways for automatically identifying forms of discourse presentation, and shows that the presentation of characters' minds reflects an ideological as well as an epistemological concern about what cannot be reported, portrayed, or narrated. Through insightful interdisciplinary analysis, Busse demonstrates that discourse presentation fulfills the function of prospection and encapsulation, marks narrative progression, and shapes readers' expectations.

Academic Presenting and Presentations Averil Bolster, Peter Levrai, 2016-08-01 This Teacher's Book is the companion to Academic Presenting and Presentations (ISBN 978-3-7347-8367-8), a training course designed to help students cultivate academic presentation skills and deal with the various presentation tasks they may be required to fulfil during the course of their university studies. The material is suitable for a global audience and can be used in a wide range of contexts in the fields of Communication Skills, English Language Teaching and English for Academic Purposes. In addition to providing valuable notes on each unit, the Teacher's Book contains key information on the underlying principles, concept and structure of the course and sets out the rationale behind its design. Teachers, and through them their students, can benefit from the depth of the insights presented here, making the classroom experience a rewarding and enjoyable one. Academic presentations can be particularly challenging for non-native English speakers and consequently, the print material and the accompanying video recordings dovetail neatly to provide linguistic support and guidance as well as enhancing presentation skills and providing a forum for practice, feedback and ongoing improvement. However, broader topics of interest appropriate to a

study-oriented context, such as research and plagiarism, are also dealt with in a unique balance of content that goes beyond the treatment of discrete language points and emphasises high-level task achievement whilst at the same time focusing attention on the specific requirements of addressing an audience in an academic environment.
