Presentation Skills Michael Weiss, 2015-08-03 The popularity of the TED talk has raised the bar for public speaking and presentations. Audiences expect to be educated, inspired and engaged whether they are sitting in a conference room or an auditorium. Yet too often presenters lack the skills to take command and deliver persuasive and entertaining pitches and presentations. The audience is the hero of the story and the presenter is their guide to take them on a journey. Like a one act play, a presentation is not a meeting, it's a performance. And it is the job of the presenter to respect the audiences' wishes, wants and needs. With the advent of smartphone, the job of the presenter to keep the audience's attention on them rather than on the tiny device in their hand has become increasingly more difficult. The purpose of this book is to inspire you to take the next step in your presentation skills and practice.

Presenting for Geeks Dirk Haun, 2016-04-16 A presentation is not about the content or about you - it's about your audience. Your job as a presenter is to take your audience to a place where they know about your topic, understand it and act on it. This book will show you how to achieve this. In their presentations, geeks usually focus on the facts. Which results in presentations that are accurate, cover every aspect of the topic - and tend to overwhelm the audience. As a result, the audience will remember little, if anything, of the actual content. Presenting for Geeks shows a different approach to presentations by putting the audience at the centre of everything. Seeing things from the audience's perspective leads to a more visual and engaging presentation style that helps them better understand and remember the content of the presentation. This approach is covered in three chapters: preparation, slides, presenting. Garr Reynolds, author of Presentation Zen, about this book: If you or someone on your team wants/needs good presentation advice from a fellow technical presenter, then this is the book.
