Desaparición forzada de personas y equivalencia funcional: Una propuesta de recepción del derecho penal internacional Francisco Javier Dondé Matute,2023-11-22 El presente estudio busca resolver un problema en la aplicación del derecho internacional: la implementación de tipos penales en la ley penal nacional a partir de las obligaciones internacionales. El dilema jurídico consiste en conciliar las obligaciones que tienen los Estados, derivadas de los tratados de represión penal, con las exigencias del derecho penal democrático, previsto en las constituciones y en los derechos humanos. A este ejercicio de equilibrio se le denomina técnica de la equivalencia funcional. Se toma como modelo de aplicación la desaparición forzada de personas por la complejidad del crimen internacional. Su regulación internacional está prevista en diversos tratados, las conductas

son diversas pero entrelazadas y los elementos son diferentes. Así, es un buen caso de estudio para la aplicación de esta técnica. Además, el estudio se realiza con base en la legislación mexicana, que sirve también como modelo de análisis dentro de un marco legal ya existente.

Latin America and international investment law Sufyan Droubi, Cecilia Juliana Flores Elizondo, 2022-04-12 Latin America has been a complex laboratory for the development of international investment law. While some governments and non-state actors have remained true to the Latin American tradition of resistance towards the international investment law regime, other governments and actors have sought to accommodate said regime in the region. Consequently, a profusion of theories and doctrines, too often embedded in clashing narratives, has emerged. In Latin America, the practice of international investment law is the vivid amalgamation of the practice of governments sometimes resisting and sometimes welcoming mainstream approaches; the practice of lawyers assisting foreign investors from outside and within the region; and the practice of civil society, indigenous peoples and other actors in their struggle for human rights and sustainable development. Latin America and international investment law describes the complex roles that governments have played vis-à-vis foreign investors and investments; the refreshing but clashing forces that international organizations, corporations, civil society, and indigenous peoples have brought to the field; and the contribution that Latin America has made to the development of the theory and practice of international investment law, notably in fields in which the Latin American experience has been traumatic: human rights and sustainable development. Latin American scholars have been contributing to the theory of international investment law for over a century; resting on the shoulders of true giants, this volume aims at pushing this contribution a little further.

La innovación es clave para la competitividad y el crecimiento económico de los países, tanto en los niveles micro como macro. Se trata de un complejo concepto, que puede referirse tanto a iniciativas sociales, a la denominada economía colaborativa o a nuevas tecnologías, para tomar nuevas ideas y traducirlas en resultados sociales o económicos que mejoren el bienestar de los consumidores Contenido: Reseña biográfica de los autores.
