HIV Prevention Kenneth H. Mayer,H.F. Pizer,2009-03-13 HIV/AIDS continues to be the pandemic of our times and there has not been a comprehensive medically based AIDS prevention book published in the last 5 years. It is estimated that 36 to 45 million people including 2-3 million children already are infected worldwide and an additional 4-7 million more are infected each year. There are about 6,000 new infections daily and about 12 million AIDS orphans. People receiving AIDS treatments feel well and have no detectable viral load, but still can infect others. And even when a vaccine is found, it will take many years before it can be administered across the developing world. \* Discusses all aspects of AIDS prevention, from epidemiology, molecular immunology and virology to the principles of broad-based public health prevention interventions. \* Special focus on the array of interventions that have been proven effective through rigorous study \* Identifies new trends in HIV/AID epidemiology and their impact on creating and implementing prevention interventions \* Incorporates virology, biology, infectious diseases, vaccinology, microbicides and research methodologies into AIDS prevention

**Evidence-Based Prevention** Katherine Raczyński,Michael Waldo,Jonathan P. Schwartz,Arthur M. Horne,2012-12-20 This sixth book in the Prevention Practice Kit provides an introduction to evidence-based prevention in psychology. Counselors, psychologists and mental health workers in schools, government agencies, community settings, and in private practice are increasingly expected to select evidence-based practices and programs, and to document the effectiveness of the care they provide. The book addresses the types of questions that may be most pertinent to counselors, psychologists, and other mental health workers who are engaged in prevention and interested in understanding evidence-based programs.

**Injury Prevention and Public Health** Tom Christoffel,Susan Scavo Gallagher,1999 This text provides students with the practical skills and strategies necessary to effectively plan, promote, implement, and operate effective public health injury prevention programs. The prevention of unintentional injuries, especially childhood and adolescent injuries, is emphasized as the major focus of public health agency injury prevention efforts. (Injury ranks third among causes of death overall, and it constitutes the second most costly health problem in the U.S., after heart disease.)

**Prevention Is Primary** Larry Cohen,Vivian Chavez,Sana Chehimi,2010-09-07 The new edition of Prevention Is Primary provides models, methods, and approaches for building health and equity in communities. This comprehensive book includes the theory, concepts, and models needed to harness social justice and practice primary prevention of unnecessary illness and injury. Ideal for students as well as practitioners, this thoroughly revised and updated second edition combines an overview of advances in the field with effective approaches in the current economic and health care climate. With contributions from noted experts, Prevention Is Primary shows practical applications of intervention science to social and health problems and issues facing at-risk and vulnerable groups. The book describes the overarching framework and principles guiding prevention efforts, including a focus on social justice and health equity, and community resilience. It explores the transition from prevention theory to implementation and practice and from interdisciplinary collaboration to evaluation. Highlighting the book's usefulness as a teaching and learning tool, Prevention Is Primary has real world examples, learning objectives, and review questions for each chapter.

**Technology Applications in Prevention** Steven Godin,2014-03-18 Control health care costs with these cost-effective, technology-based prevention/intervention techniques! In 2001, Americans spent \$1.4 trillion on health care services. By 2010, health care costs are forecasted to approach 20% of the United States' Gross National Product. Technology Applications in Prevention highlights much-needed technology-based prevention/intervention methods that can help contain health costs. "Efficient and Effective Uses of Technology in Community Research" provides the information that future prevention researchers and program evaluators will need to be effective in electronic data collection, management, and cost analysis. "Community Building with Technology: The Development of Collaborative Community Technology Initiatives" presents a case example showing how Web sites can function as regional clearinghouses of useful information and provide convenient forums where agency staff can update their prevention skills. "Applying Web-Based Survey Design Standards" addresses a question critical to professionals in e-data collection: How reliable is Web-based needs assessment and/or outcome data? This chapter suggests standards that should be adhered to in Internet-based data collection. "Assessing Quality Assurance of Self-Help Sites on the Internet" and "The

Quality of Spanish Health Information Web Sites: An Emerging Disparity” address the current lack of quality in the health and mental health information available on the World Wide Web. “A Participatory Internet Initiative in an African-American Neighborhood” explores health disparity concerns regarding the use of the Internet. This chapter discusses several ways to empower those who are on the dark side of the “digital divide”—and shows how to ensure that Web-based material is culturally relevant and appropriate for those it is intended to help. “Alcohol Abuse Prevention Among High-Risk Youth” presents a case example of a life-skills based CD-ROM intervention designed to discourage kids from abusing alcohol. “Constructing Better Futures Via Video” looks at video-based futures planning, which combines self-modeling and “feedforward” to forecast a student’s future capabilities. This technique helps teenagers find meaning in their current educational setting and prepare for adulthood. This chapter also explains how to train school-based personnel to encourage positive attitudes and support the life skills of their students via carefully planned and edited—yet inexpensive—video productions. Why is the information in this book so essential? In 2000, approximately 20% of U.S. employers changed their health insurance plans as a cost savings strategy. American companies and their employees must new deal with new insurance plans that have reduced the breadth of their coverage and/or increased employee deductibles. The need for cost-effective preventive strategies is becoming increasingly more urgent as employers and insurance companies scramble to provide affordable health care coverage. New technologies have opened the door to better, more economical modes of preventive care. This book presents a vital cross-section of the current state of the art in the application of technology to prevention and intervention. Make it a part of your professional/teaching collection today!
