Well-Designed Jon Kolko, 2014-10-28 From *Design Thinking to Design Doing* Innovators today are told to run loose and think lean in order to fail fast and succeed sooner. But in a world obsessed with the new, where cool added features often trump actual customer needs, it's the consumer who suffers. In our quest to be more agile, we end up creating products that underwhelm. So how does a company like Nest, creator of the mundane thermostat, earn accolades like “beautiful” and “revolutionary” and a \$3.2

billion Google buyout? What did Nest do differently to create a household product that people speak of with love? Nest, and companies like it, understand that emotional connection is critical to product development. And they use a clear, repeatable design process that focuses squarely on consumer engagement rather than piling on features for features' sake. In this refreshingly jargon-free and practical book, product design expert Jon Kolko maps out this process, demonstrating how it will help you and your team conceive and build successful, emotionally resonant products again and again. The key, says Kolko, is empathy. You need to deeply understand customer needs and feelings, and this understanding must be reflected in the product. In successive chapters of the book, we see how leading companies use a design process of storytelling and iteration that evokes positive emotions, changes behavior, and creates deep engagement. Here are the four key steps: 1. Determine a product-market fit by seeking signals from communities of users. 2. Identify behavioral insights by conducting ethnographic research. 3. Sketch a product strategy by synthesizing complex research data into simple insights. 4. Polish the product details using visual representations to simplify complex ideas. Kolko walks the reader through each step, sharing eye-opening insights from his fifteen-year career in product design along the way. Whether you're a designer, a product developer, or a marketer thinking about your company's next offering, this book will forever change the way you think about—and create—successful products.

Jaeger, Hal MacFie, 2010-08-30 Experts from around the world present changes in the global marketplace and developments in research methodologies underpinning new product development (NPD) in this essential collection. The business and marketing aspects of NPD, sometimes neglected in books of this type, are addressed alongside methods for product testing. Trends, processes and perspectives in consumer-driven NPD in the food and personal care product industries are addressed in the opening chapters of the book. Specific topics include evolution in food retailing and advances in concept research. Hedonic testing is the focus of the next section. Different viewpoints on consumer research methods and statistics for NPD are reviewed in later chapters. The final part of the book looks towards the future of innovation, covering the implications for NPD of topics such as human genetic variation in taste perception and neuroimaging. Several chapters are not standard scientific articles. Rather they are written records of conversations between two people on a particular topic related to consumer-driven innovation in foods and personal care products. In them the interviewees speak freely about their views and experiences in NPD, providing unique insights. Will It Wow? Chunshik Kim, 2020-07-15 How do successful products approach people to engage? Why do so many new products crash in the market? Product failure is estimated to be at 48% in the book, 'Winning at New Products', and other researchers typically put that number much higher. So, what makes these products tank? This happens for three reasons: failure to understand the consumer, poor product quality, and lack of internal capability. Witnessing countless developers failing to bring their products to market leads us to ask three questions: 1. Who are the consumers today and how do we characterize their reason for a better life? 2. How do great companies develop their product for success? 3. What does a fast-growing company need to do to stay healthy in the market? It is imperative that product developers ask these three questions for a greater chance of product survival in markets that are inundated with competitor products. After 20 years of product development experience, the author realized that there is always a right design process to develop a quality product, which is answered by the 'EFD model'; Embrace, Focus, and Disrupt. The model will help you to work purposefully and save time in the process. This three-step process will also help you to maximize resources that you may already have to reach your business goals. WILL IT WOW? is based on the Author's hands-

on experience in leading corporations and design consultancies. He wrote this book to share insights and motivations and to assist product managers, designers, engineers, marketers, start-up founders, and anyone who seeks to understand how products influence consumers and brands. Chunshik Kim walks readers through: -How embracing the consumer and identifying pain-points reveals opportunities in the market-The impact of quality product experience.-Where market trends go, and how to be the next technology disruptor.

Transformed Marty Cagan, 2024-03-06 Help transform your business and innovate like the world's top tech companies! In INSPIRED, product thought leader Marty Cagan revealed the best practices and techniques used by the top product teams operating in the product model. Next, EMPOWERED shared the best practices and techniques used by the top product leaders to provide their teams with the kind of environment they need to thrive in the product model. Yet, the most common question after reading INSPIRED and EMPOWERED has been: Yes, we want to work this way, but the way we work today is so different, and so deeply ingrained, is it even possible for a company like ours to transform to the product model? TRANSFORMED was written to bridge the gap between where most companies are right now and where they need to be. The leaders of these companies know they must transform to compete in an era of rapidly changing enabling technology, but most of them have never operated this way before. TRANSFORMED has three big goals: First, the book will educate you with a deep understanding of the product operating model, and what it means to work that way. Second, the book will convince you with detailed case studies of successful transformations, that while difficult, it is absolutely possible for you to transform your company to the product operating model. Third, the book will inspire you with truly impressive case studies of product innovation, showing what you too will be capable of doing once you successfully transform. TRANSFORMED is

written for those driving change, including the senior company leaders—starting with the CEO—as well as the senior executives and stakeholders who need to collaborate with the product teams, the product leaders, the members of the product teams, and all those who either support or depend on these product teams. Written by best-selling author Marty Cagan and his partners at the Silicon Valley Product Group, TRANSFORMED is filled with real-world examples and proven, practical advice from their decades of experience helping companies move to the product operating model.

It directs the best way to bring your product to market. It shapes what the world thinks about your product and category. It inspires others to tell your product’s story. Part of the bestselling series including INSPIRED and EMPOWERED, LOVED explains the fundamentals of best-in-class product marketing for product teams, marketers, founders and any leader with a product and a vision.
