Making of a Therapist Louis J. Cozolino, 2004-06-29 Lessons from the personal experience and reflections of a therapist. The difficulty and cost of training psychotherapists properly is well known. It is far easier to provide a series of classes while ignoring the more challenging personal components of training. Despite the fact that the therapist's self-insight, emotional maturity, and calm centeredness are critical for successful psychotherapy, rote knowledge and technical skills are the focus of most training programs. As a result, the therapist's personal growth is either marginalized or ignored. The Making of a Therapist counters this trend by offering graduate students and beginning therapists a personal account of this important inner journey. Cozolino provides a unique look inside the mind and heart of an experienced therapist. Readers will find an exciting and privileged window into the experience of the therapist who, like themselves, is just starting out. In addition, The Making of a Therapist contains the practical advice, common-sense wisdom, and self-disclosure that practicing professionals have found to be the most helpful during their own training. The first part of the book, 'Getting Through Your First Sessions,' takes readers through the often-perilous days and weeks of conducting initial sessions with real clients. Cozolino addresses such basic concerns as: Do I need to be completely healthy myself before I can help others? What do I do if someone comes to me with an issue or problem I can't handle? What should I do if I have trouble listening to my clients? What if a client scares me? The second section of the book, 'Getting to Know Your Clients,' delves into the routine of therapy and the subsequent stages in which you continue to work with clients and help them. In this context, Cozolino presents the notion of the 'good enough' therapist, one who can surrender to his or her own imperfections while still guiding the therapeutic relationship to a positive outcome. The final section, 'Getting to Know Yourself,' goes to the core of the therapist's relation to him- or herself, addressing such issues as: How to turn your weaknesses into strengths, and how to deal with the complicated issues of pathological caretaking, countertransference, and self-care. Both an excellent introduction to the field as well as a valuable refresher for the experienced clinician, The Making of a Therapist offers readers the tools and insight that make the journey of becoming a therapist a rich and rewarding experience.

Addiction and the Making of Professional Careers Griffith Edwards, Thomas F. Babor, 2012-03-15
The misuse of drugs continues to cause suffering and worldwide economic turmoil. In response to these problems, many have devoted their lives to preventing the misuse of mind-altering substances. *Addiction and the Making of Professional Careers* focuses on the need for enhanced understanding of professional careers in the addiction field. The spectrum of professionals involved is wide and includes treatment personnel of every kind. Some of the questions examined here include: Why do some people decide to dedicate their lives to responding to drug problems? How do and should we select, train, mentor, support, inspire, and nurture the young career aspirant? What makes for the most effective use of talent? Is every personal case different or can general conclusions be reached? After a foreword by William Miller and an introduction by Griffith Edwards, the book includes interviews with Joseph Brady, Louis Harris, Conan Kornetsky, and Robert DuPont, all of whom were pioneers in the behavioral pharmacological analysis of addiction. Commentary chapters are written by Kerstin Stenius, Ilana Crome, Peter Anderson, and Jonathan Chick.

Peer Coaching to Enrich Professional Practice, School Culture, and Student Learning

Pam Robbins, 2015-05-19 How can educators work together more effectively to improve professional practice in a way that enhances student performance? The answer, says author Pam Robbins, involves combining collaborative activities and peer coaching—teachers supporting teachers. This book describes how any school can implement these proven practices and experience positive changes in teaching, school culture, and learning. Robbins explains how to develop a collaborative, learning-focused culture and build trust among colleagues; offers strategies for participating in difficult conversations that yield useful feedback; clarifies how to develop, sustain, and evaluate peer coaching efforts; and showcases exemplary peer coaching practices used in real schools. She also includes coaching tools, scenarios, process guidelines, and reflection questions that make it easier to transfer these ideas into a school setting. Peer coaching offers a job-embedded learning strategy; it's a valuable structure for supporting schoolwide and districtwide priorities such as analyzing data, improving instruction, integrating technology, and implementing standards. In short, it creates an effective way to support the growth of every teacher and enrich learning processes in any school. Pam Robbins is a former teacher, coach, director of professional development, and school leader. She consults with high-performing and low-performing districts and designs and conducts workshops on leadership, school culture, organizational change, mentoring, and peer coaching.

The Army's Professional Military Ethic in an Era of Persistent Conflict Don M. Snider, 2009 This essay offers a proposal for the missing constructs and language with which we can more precisely think about and examine the Army's Professional Military Ethic, starting with its macro context which is the profession's culture. We examine three major long-term influences on that culture and its core ethos, thus describing how they evolve over time. We contend that in the present era of persistent conflict, we are witnessing dynamic changes within these three influences. In order to analyze these changes, we introduce a more detailed framework which divides the Ethic into its legal and moral components, then divide each of these into their institutional and individual manifestations. Turning from description to analysis, we also examine to what extent, if any, recent doctrinal adaptations by the Army (FM 3-0, 3-24, and 6-22, etc.) indicate true evolution in the essential nature of the profession's Ethic. Then, we present what we believe to be the most significant ethical challenge facing the Army profession -- the moral development of Army leaders, moving them from 'values to virtues' in order that they, as Army professionals, can consistently achieve the high quality of moral character necessary to apply effectively and, in a trustworthy manner, their renowned military-technical competencies.--P. x
