Public Citizens: The Attack on Big Government and the Remaking of American Liberalism Paul Sabin, 2021-08-10 The story of the dramatic postwar struggle over the proper role of citizens and government in American society. In the 1960s and 1970s, an insurgent attack on traditional liberalism took shape in America. It was built on new ideals of citizen advocacy and the public interest. Environmentalists, social critics, and consumer advocates like Rachel Carson, Jane Jacobs, and Ralph Nader crusaded against what they saw as a misguided and often corrupt government. Drawing energy from civil rights protests and opposition to the Vietnam War, the new citizens' movement drew legions of followers and scored major victories. Citizen advocates disrupted government plans for urban highways and new hydroelectric dams and got Congress to pass tough legislation to protect clean air and clean water. They helped lead a revolution in safety that forced companies and governments to better protect consumers and workers from dangerous products and hazardous work conditions. And yet, in the process, citizen advocates also helped to undermine big government liberalism—the powerful alliance between government, business, and labor that dominated the United States politically in the decades following the New Deal and World War II. Public interest advocates exposed that alliance's secret bargains and unintended consequences. They showed how government power often was used to advance private interests rather than restrain them. In the process of attacking government for its failings and its dangers, the public interest movement struggled to replace traditional liberalism with a new approach to governing. The citizen critique of government power instead helped clear the way for their antagonists: Reagan-era conservatives seeking to slash regulations and enrich corporations. *Public Citizens* traces the history of the public interest movement and explores its tangled legacy, showing the ways in which American liberalism has been at war with itself. The book forces us to reckon with the challenges of regaining our faith in government's ability to advance the common good.

The Collector of Treasures and Other Botswana Village Tales Bessie Head, 2013-10-09 "Bessie Head's short stories have an extraordinary simplicity and breadth of vision," heralded a review in *The Tribune* after publication of Head's first collection of short stories, *The Collector of Treasures*. Regarded today as one of Africa's best-known woman writers in English, Head draws on the rich oral tradition of southern Africa and masterfully applies storytelling's language and imagery. Carefully sequenced, the anthology gives special focus to village people from independence-era Botswana and the status, position, and plight of African women.

Parenting in Public Donna Haig Friedman, 2000-09-08 When parents must rely on public assistance and family shelters to provide for their

children's most basic needs, they lose autonomy. Within a system of public assistance that already stigmatizes and isolates its beneficiaries, their family lives become subject to public scrutiny and criticism. They are parenting in public. This book is an in-depth examination of the realities of life for parents and their children in family shelters. The author uses the Massachusetts family shelter system to explore the impact of asset and deficit-oriented help-giving approaches as they are experienced by mothers and service providers. The format of the book is unique. Following each chapter are the reflections of a mother who has parented in a shelter, a front-line worker, and a shelter director. The author and contributors propose a Power With policy and practice framework that runs counter to the prevailing Power Over cultural policy trends. Contributors include Rosa Clark, Brenda Farrell, Deborah Gray, Michele Kahan, Margaret A. Leonard, Mary T. Lewis, Nancy Schwoyer, and Elizabeth Ward.

Public Finance and Public Choice James M. Buchanan, Richard A. Musgrave, 1999-10-12 In this volume, based on a week-long symposium at the University of Munich's Center for Economic Studies, two leading scholars of governmental economics debate their divergent perspectives on the role of government and its fiscal functions. James M. Buchanan, who was influential in developing the research program in public choice, concentrates on the imperfections of the political process and stresses the need for rules to restrain governmental interference. Richard A. Musgrave, a founder of modern public finance, points to market failures and inequities that call for corrective public policies. They apply their differing economic and political philosophies to a variety of key issues. Each presentation is followed by a response and general discussion.

The New Public Service Janet V. Denhardt, Robert B. Denhardt, 2015-03-12 The New Public Service: Serving, not Steering provides a framework for the many voices calling for the reaffirmation of democratic values, citizenship, and service in the public interest. It is organized around a set of seven core principles: (1) serve citizens, not customers; (2) seek the public interest; (3) value citizenship and public service above entrepreneurship; (4) think strategically, act democratically; (5) recognize that accountability isn't simple; (6) serve, rather than steer; and (7) value people, not just productivity. The New Public Service asks us to think carefully and critically about what public service is, why it is important, and what values ought to guide what we do and how we do it. It celebrates what is distinctive, important, and meaningful about public service and considers how we might better live up to those ideals and values. The revised fourth edition includes a new chapter that examines how the role and significance of these New Public Service values have expanded in practice and research over the past 15 years. Although the debate about governance will surely continue for many years, this compact, clearly written volume both provides an important framework for a public service based on citizen discourse and the public interest and demonstrates how these values have been put into practice. It is essential reading for students and serious practitioners in public administration and public policy.

Political Public Relations Jesper Stromback, Spiro Kiouisis, 2011-05-18 Political Public Relations maps and defines this emerging field, bringing together scholars from various disciplines—political communication, public relations and political science—to explore the area in detail. The volume connects differing schools of thought, bringing together theoretical and empirical investigations, and defines a field that is becoming increasingly important and prominent. It offers an international orientation, as the field of political public relations must be studied in the context of various

political and communication systems to be fully understood. As a singular contribution to scholarship in public relations and political communication, this work fills a significant gap in the existing literature, and is certain to influence future theory and research.

A Public Empire Ekaterina Pravilova, 2018-05-22 Property rights and Russia do not usually belong in the same sentence. Rather, our general image of the nation is of insecurity of private ownership and defenselessness in the face of the state. Many scholars have attributed Russia's long-term development problems to a failure to advance property rights for the modern age and blamed Russian intellectuals for their indifference to the issues of ownership. *A Public Empire* refutes this widely shared conventional wisdom and analyzes the emergence of Russian property regimes from the time of Catherine the Great through World War I and the revolutions of 1917. Most importantly, *A Public Empire* shows the emergence of the new practices of owning public things in imperial Russia and the attempts of Russian intellectuals to reconcile the security of property with the ideals of the common good. The book analyzes how the belief that certain objects—rivers, forests, minerals, historical monuments, icons, and Russian literary classics—should accede to some kind of public status developed in Russia in the mid-nineteenth century. Professional experts and liberal politicians advocated for a property reform that aimed at exempting public things from private ownership, while the tsars and the imperial government employed the rhetoric of protecting the sanctity of private property and resisted attempts at its limitation. Exploring the Russian ways of thinking about property, *A Public Empire* looks at problems of state reform and the formation of civil society, which, as the book argues, should be rethought as a process of constructing the public through the reform of property rights.

Public Relations and Social Theory Øyvind Ihlen, Magnus Fredriksson, 2018-04-17 *Public Relations and Social Theory: Key Figures, Concepts and Developments* broadens the theoretical scope of public relations studies by applying the work of a group of prominent social theorists to make sense of the practice. The volume focuses on the work of key social theorists, including Max Weber, Karl Marx, John Dewey, Jürgen Habermas, Niklas Luhmann, Michel Foucault, Ulrich Beck, Pierre Bourdieu, Anthony Giddens, Robert Putnam, Erving Goffman, Peter L. Berger, Gayatri Chakravorty Spivak, Bruno Latour, Dorothy Smith, Zygmunt Bauman, Harrison White, John W. Meyer, Luc Boltanski and Chantal Mouffe. Each chapter is devoted to an individual theorist, providing an overview of that theorist's key concepts and contributions, and exploring how these can be applied to public relations as a practice. Each chapter also includes a box giving a short and concise presentation of the theorist, along with recommendation of key works and secondary literature.

Museums and Public Value Carol A. Scott, 2016-04-22 *Public Value* speaks to our time - to the role that museums can play in creating civil societies, to the challenges involved in using limited assets strategically, to the demand for results that make a difference and to the imperative that we build the kind of engagement that sustains our futures. This book assists museum leaders to implement a Public Value approach in their management, planning, programming and relationship building. The benefits are long term public engagement and support, which can be used to

demonstrate that valuable returns result from public investment in museums. A range of authors from around the world unpack the concept of Public Value and examine its implications for museums. They situate Public Value within current management theory and practice, offer tools for implementation, highlight examples of successful practice and examine the evidence of Public Value that governments seek to inform policy and funding decisions. The book will be required reading for senior professionals in museums, as well as museum and heritage studies students.

Public Relations, Cooperation, and Justice Charles Marsh, 2017-04-21 Modern approaches to public relations cluster into three camps along a continuum: conflict-oriented egoism, e.g. forms of contingency theory that focus almost exclusively on the wellbeing of an entity; redressed egoism, e.g. subsidies to redress PR's egoistic nature; and forms of self-interested cooperation, e.g. fully functioning society theory. Public Relations, Cooperation, and Justice draws upon interdisciplinary research from evolutionary biology, philosophy, and rhetoric to establish that relationships built on cooperation and justice are more productive than those built on conflict and egoistic competition. Just as important, this innovative book shuns normative, utopian appeals, offering instead only empirical, materialistic evidence for its conclusions. This is a powerful, multidisciplinary, and well-documented analysis, including specific strategies for the enactment of PR as a quest for cooperation and justice, which aligns the discipline of public relations with basic human nature. It will be of interest to scholars and advanced students of public relations and communication ethics.

The Domestic Dimension of Public Diplomacy Katarzyna Pisarska, 2016-10-15 This book explores new grounds that public diplomacy is entering today, as domestic publics come to the forefront of the policy - acting both as foreign policy constituencies and public diplomacy actors cooperating with their foreign counterparts. The author discusses the phenomena of public diplomacy's domestic dimension described as government's ability to engage its own society in foreign policy practices through information, cooperation and identity-defining. By analysing data from over 80 recorded interviews with Australian, Norwegian and American public diplomacy practitioners, this volume illustrates both successful and unsuccessful models of such cooperation. From Norwegian Peace Diplomacy, through Australia's ambivalent engagement with Asia, to U.S. Government-sponsored exchange programs, the author argues that governments around the world are slowly accepting a paradigm shift in diplomatic practice from monological/dialogical to a more collaborative public diplomacy. This book is an essential resource for students, scholars, experts and diplomats interested in world's best-practices of engaging domestic civil society actors in foreign policy statecraft.
