Genuine Plastic Radios of the Mid-Century Ken Jupp,Leslie A. Piña,1998 Table radios made primarily of brightly colored plastics represent a relative newcomer to the radio collecting arena. These icons of American industrial design and popular culture were once plentiful, and today they can be found at flea markets, garage and house sales. With more than 430 color photo plus advertisements and black and white vintage photos, this pioneering book is a must for anyone interested in radios, mid-century industrial design, or popular culture.

Fire Shelters Weaken Transmissions from Hand-held Radios Ted Etter,2003 Wildland firefighters who try to use their hand-held radios inside fire shelters will be unlikely to communicate with their supervisors and may not even be able to communicate with other firefighters inside fire shelters just 50 feet away. Transmissions from the older VHF (very high frequency, 30 to 300 MHz) Bendix-King radios were not weakened as badly as those from the newer UHF (ultra high frequency, 300 to 3,000 MHz) Motorola Astro XTS 3000 radios. The standard fire shelter being carried by wildland firefighters did not weaken the transmissions as much as the New Generation Fire Shelter that is just beginning to be carried by wildland firefighters. The tech tip includes a table showing exactly how much the transmissions were weakened in different situations. Essentially, firefighters could shout and be heard as far as if they used their new UHF radios inside a fire shelter.

The Radio Station Michael C. Keith,2000 Ten years after its original publication, The Radio Station, now in its fifth edition, is considered the standard work on this audio medium. It remains a concise and candid guide to the internal workings of radio stations and the radio industry. A comprehensive blueprint, this book details the functions performed successfully within every well-run station. Not only will readers understand how each job is best performed, they will know how it meshes with those of the rest of the radio station staff. For readers uncertain of career goals, this book provides a solid foundation in who does what, when, and why. The fifth edition updates and expands this classic text acclaimed by radio educators and practitioners from around the United States. New sections on radio and the Internet, AM stereo, cable and satellite radio, niche formats, mergers and consolidation, future prospects, and digital technology, as well as new illustrations, feature boxes and quotes from industry pros bring the reader into the present world of the radio station, providing insight into this ever-changing field.

Radio's Second Century John Allen Hendricks,2020-03-13 Winner of the 2022 Broadcast Education Association Book Award One of the first books to examine the status of broadcasting on its one hundredth anniversary, Radio's Second Century investigates both vanguard and perennial topics relevant to radio's past, present, and future. As the radio industry enters its second century of existence, it continues to be a dominant mass medium with almost total listenership saturation despite rapid technological advancements that provide alternatives for consumers. Lasting influences such as on-air personalities, audience behavior, fan relationships, and localism are analyzed as well as contemporary issues including social and digital media. Other essays examine the regulatory concerns that continue to exist for public radio, commercial radio, and community radio, and discuss the hindrances and challenges posed by government regulation with an emphasis on both American and international perspectives. Radio's impact on cultural hegemony through creative programming content in the areas of religion, ethnic inclusivity, and gender parity is also explored. Taken together, this volume compromises a meaningful insight into the broadcast industry's continuing power to inform and entertain listeners around the world via its oldest mass medium--radio.
