Fire Shelters Weaken Transmissions from Hand-held Radios Ted Etter, 2003 Wildland firefighters who try to use their hand-held radios inside fire shelters will be unlikely to communicate with their supervisors and may not even be able to communicate with other firefighters inside fire shelters just 50 feet away. Transmissions from the older VHF (very high frequency, 30 to 300 MHz) Bendix-King radios were not weakened as badly as those from the newer UHF (ultra high frequency, 300 to 3,000 MHz) Motorola Astro XTS 3000 radios. The standard fire shelter being carried by wildland firefighters did not weaken the transmissions as much as the New Generation Fire Shelter that is just beginning to be carried by wildland firefighters. The tech tip includes a table showing exactly how much the transmissions were weakened in different situations. Essentially, firefighters could shout and be heard as far as if they used their new UHF radios inside a fire shelter.

Radio's Second Century John Allen Hendricks, 2020-03-13 Winner of the 2022 Broadcast Education Association Book Award One of the first books to examine the status of broadcasting on its one hundredth anniversary, *Radio's Second Century* investigates both vanguard and perennial topics relevant to radio's past, present, and future. As the radio industry enters its second century of existence, it continues to be a dominant mass medium with almost total listenership saturation despite rapid technological advancements that provide alternatives for consumers. Lasting influences such as on-air personalities, audience behavior, fan relationships, and localism are analyzed as well as contemporary issues including social and digital media. Other essays examine the regulatory

concerns that continue to exist for public radio, commercial radio, and community radio, and discuss the hindrances and challenges posed by government regulation with an emphasis on both American and international perspectives. Radio's impact on cultural hegemony through creative programming content in the areas of religion, ethnic inclusivity, and gender parity is also explored. Taken together, this volume compromises a meaningful insight into the broadcast industry's continuing power to inform and entertain listeners around the world via its oldest mass medium--radio.

Radio Goes to War Gerd Horten, 2002-02-06 Radio Goes to War is the first comprehensive and in-depth look at the role of domestic radio in the United States during the Second World War. As this study convincingly demonstrates, radio broadcasting played a crucial role both in government propaganda and within the context of the broader cultural and political transformations of wartime

America. Gerd Horten's absorbing narrative argues that no medium merged entertainment, propaganda, and advertising more effectively than radio. As a result, America's wartime radio propaganda emphasized an increasingly corporate and privatized vision of America's future, with important repercussions for the war years and the postwar era. Examining radio news programs, government propaganda shows, advertising, soap operas, and comedy programs, Horten situates radio wartime propaganda in the key shift from a Depression-era resentment of big business to the consumer and corporate culture of the postwar period.

Listening in Susan Jeanne Douglas, 1999 Susan Douglas, author of the much praised *Where the Girls Are*, explores how radio -- how we listened, where we listened, and whom we listened to -- has influenced the national psyche.

Boston Radio Donna L. Halper, 2011 Boston's radio history begins with pioneering station 1XE/WGI, one of America's first radio stations, and includes the first station to receive a commercial license, WBZ; the first FM radio network, W1XOJ and W1XER; and one of the first news networks, the

Yankee News Service. Nationally known bandleaders like Joe Rines and Jacques Renard were first heard on Boston radio, as was one of the first weathercasters, E. B. Rideout. The city has been home to a number of legendary announcers, such as Bob and Ray, Arnie Ginsburg, Dick Summer, Dale Dorman, and Charles Laquidara; talk show giants like Jerry Williams and David Brudnoy; and sports talkers like Eddie Andelman and Glenn Ordway. Many Boston radio personalities, such as Curt Gowdy, Big Brother Bob Emery, Don Kent, and Louise Morgan, found fame on television but first established themselves on Boston's airwaves. Since 1920, Boston radio has remained vibrant, proving that live and local stations are as important as ever--Publisher.

Software Defined Radios Sofie Pollin, Michael Timmers, Liesbet Van der Perre, 2013-05-29 Many and ever more mobile users wish to enjoy a variety of multimedia services, in very diverse geographical environments. The growing number of communication options within and across wireless standards is accommodating the growing volume and heterogeneity in wireless wishes. On the other hand, advancement in radio technologies opening much more flexibility, a.o. through Software Defined Radios, opens up the possibility to realize mobile devices featuring multi-mode options at low cost and interesting form factors. It is crucial to manage the new degrees of freedom opened up in radios and standards in a smart way, such that the required service is offered at satisfactory quality as efficiently as possible. Efficiency in energy consumption is clearly primordial for battery powered mobile terminals specifically, and in the context of growing ecological concerns in a broader context. Moreover, efficient usage of the spectrum is a growing prerequisite for wireless systems, and coexistence of different standards puts overall throughput at risk. The management of flexibility risks bringing about intolerable complexity and hamper the desired agility. A systematic approach, consisting of anticipative preparing for smooth operation, allows mastering this challenge. Case

studies show that already today, this approach enables smart operation of radios realizing impressive efficiency gains without hampering Quality-of-Service. In the future wireless communication scenes will be able to profit from the opening of the spectrum. Even smarter and cognitive behavior will become possible and essential.
