Rapid Viz Kurt Hanks,Larry Belliston,2006 Rapid Viz, Third Edition: A New Method for the Rapid Visualization of Ideas provides hands-on instruction on quick sketching skills and techniques that allow you to picture your ideas mentally, and then quickly convert those thoughts into visual reality on a piece of paper. The method is not designed to help you become a master illustrator, but rather a visual thinker and communicator. Emphasizing speed and simplicity, the Rapid Viz method breaks down drawing to the essentials, teaching the fundamental techniques of graphic art and design using only the simplest of tools: felt-tip pens or pencils and paper. Using a minimum amount of time, trouble, and effort, Rapid Viz enables you to nail down your ideas onto paper, rapidly converting your thoughts while they are still fresh, and then polish them for clear visual communication with others.

Rapid Transformation Behnam N. Tabrizi,2007 Shows you how to accomplish successful transformational change in your firm in just 90 days. Based on ten years of research into more than 500 leading companies - including 3M, IBM, GE, Nissan, Apple, Bay Networks, Verisign, HP and Best Buy - this book demystifies fast, effective change and lays out a roadmap for achieving it.

Rapid Testing Robert Culbertson,Chris Brown,Gary Cobb,2002 Rapid Testing addresses the growing need for constant, early, and efficient testing in today's fast-paced software development environment. Covers all aspects of testing, including bug tracking and reporting, verification and validation, test planning, test design and development, metrics, effort estimation, and reporting.

Rapid Application Development James Martin,1991 Describes techniques for the rapid building of the information system applications essential for large enterprises, using existing development software.

Rapid On-site Evaluation (ROSE) Guoping Cai,Adebowale J. Adeniran,2019-09-25 This book introduces basic ROSE techniques and resources required to set up ROSE service. It reviews the cytomorphologic features that are recognizable during ROSE, including those important for sample adequacy, specimen triage, preliminary interpretation, and potential diagnostic pitfalls. Economic and regulatory aspects are discussed as well as the pros and cons of telecytology. The book is formatted for clinical settings, simulating the ROSE process that occurs in the ultrasound room, CT room, bronchoscopy suite, and endoscopy suite. Each chapter focuses on the cytomorphologic clues and pitfalls of the entities specific to that clinical setting. Rapid On-Site Evaluation: A Practical Guide will be a valuable resource for pathologists, cytotechnologists, physicians who perform biopsies and/or ROSE evaluation, and trainees for utilizing ROSE and improving diagnostic performance of biopsies.

Rapid Cure Composites Nishar Hameed,Mazhar Peerzada,Nisa Salim,Jyotishkumar Parameswaranpillai,2023-05-17 Rapid Cure Composites: Materials, Processing and Manufacturing presents up-to-date information on the design criteria to formulate matrix systems for rapid curing. Emphasis is placed on the role different materials [resin compound and fiber reinforcement] play in developing fast curing composites, assessment of current and novel manufacturing techniques for adapting fast curing processes, the comparison between conventional curing and rapid curing, and different applications in various industrial sectors [e.g., aerospace, automotive, renewables and marine]. The book will be an essential reference resource for academic and industrial researchers working in the field of composite materials, processing and manufacturing organizations, materials scientists, and more. Polymer composites are widely used in several industries, including aerospace, automobile, spray and coatings, and electronics due to their lightweight and superior mechanical properties. However, one of the dominant hurdles towards their growth in commercial industries is the long curing cycle and slow production. Comprehensively addresses the scientific and technological development of rapid cured epoxy composites Covers, in detail, the chemistry, processing, structure and performance of rapid cured epoxy composites Provides detailed comparisons of how/why rapid cure composites are different to conventional composites Discusses the challenges of the existing technology and future trends

Rapid Health Assessment Protocols for Emergencies World Health Organization,1999 This book provides a collection of ten protocols for conducting rapid health assessments in the immediate aftermath of different types of emergencies. Noting the vital importance of rapid and accurate information in the earliest stage of an emergency, the protocols respond to the urgent need for common standardized technical tools for assessing damage, gauging health risks, and gathering the information immediately needed by decision-makers at the national and international level. The protocols were prepared by WHO in collaboration with a large number of international agencies and experts with broad experience in the field of emergency management. Although all protocols follow a common format, each is specific to the circumstances, potential hazards, and immediate information needs that characterize a distinct type of emergency. Emphasis is placed on the exact information needed, the best sources of data and methods for rapid collection, and the specific questions that need to be answered in order to draw initial conclusions and direct immediate actions. Although the advantages of using experienced assessments teams are stressed, the book also explains how the protocols can be used to train general health workers as part of emergency preparedness. The book opens with an introductory protocol covering the aims and methods, responsibilities, complexities, and inherent difficulties of rapid health assessments. Addressed to health authorities as well as assessment teams, the chapter also includes abundant advice on preparedness for emergencies. Details range from the comparative need for speed in different types of emergencies, through a suggested format for presenting the results of assessments, to a list of common logistic, organizational, and technical errors. Advice on the best working practices, including ways to avoid being an emergency tourist, is also provided. Against this background, the additional nine protocols are presented according to a common format which covers the purpose of the assessment, preparedness, the steps to follow during the assessment, assessing the impact on health, assessing local response capacity and immediate needs, and presenting results. A general protocol on epidemics of infectious origin is followed by protocols specific to meningitis outbreaks, outbreaks of viral haemorrhagic fever, including yellow fever, and outbreaks of acute diarrhoeal disease, with information specific to dysentery and cholera. Sudden-impact natural disasters are covered in the next protocol, which includes a day-by-day list of information priorities for different stages of the disaster. A protocol dealing with sudden population displacements offers guidelines for conducting rapid health assessments in all emergencies caused by sudden displacement of refugees or population groups within a country. Included are a sample checklist for rapid assessments and a sample form for weekly reports on morbidity and mortality. Subsequent protocols deal with the special situations of nutritional emergencies and chemical emergencies, including those caused by food contaminated with chemicals or toxins. The final protocol addresses the difficult task of conducting assessments in complex emergencies in which the cause of the emergency, as well as the assistance to the afflicted, is complicated by intense levels of political considerations. The protocol includes a form which has recently been used for rapid health assessment at local level in Bosnia and Herzegovina. The book concludes with a brief summary of survey techniques, followed by a tabular presentation of reference values for assessing needs, hazards, and logistic requirements in developing countries.

Rapid Prototyping Technology Md Enamul Hoque,2011-09-26 Modern engineering often deals with customized design that requires easy, low-cost and rapid fabrication. Rapid prototyping (RP) is a popular technology that enables quick and easy fabrication of customized forms/objects directly from computer aided design (CAD) model. The needs for quick product development, decreased time to market, and highly customized and low quantity parts are driving the demand for RP technology. Today, RP technology also known as solid freeform fabrication (SFF) or desktop manufacturing (DM) or layer manufacturing (LM) is regarded as an efficient tool to bring the product concept into the product realization rapidly. Though all the RP technologies are additive they are still different from each other in the way of building layers and/or nature of building materials. This book delivers up-to-date information about RP technology focusing on the overview of the principles, functional requirements, design constraints etc. of specific technology.
