Readings from the Book of Exile Pádraig Ó Tuama, 2013-01-03 One of the most intriguing and engaging voices in contemporary Christianity is that of the Irish poet, Pádraig Ó Tuama and this is his first, long-awaited poetry collection. Hailing from the Ikon community in Belfast and working closely with its founder, the bestselling writer Pete Rollins, Pádraig's poetry interweaves parable, poetry, art, activism and philosophy into an original and striking expression of faith. Pádraig's poems are accessible, memorable profound and challenging. They emerge powerfully from a context of struggle and conflict and yet are filled with hope.

Lit! Tony Reinke, 2011-09-09 I love to read. I hate to read. I don't have time to read. I only read Christian books. I'm not good at reading. There's too much to read. Chances are, you've thought or said one of these exact phrases before because reading is important and in many ways unavoidable. Learn how to better read, what to read, when to read, and why you should read with this helpful guide from accomplished reader Tony Reinke. Offered here is a theology for reading and practical suggestions for reading widely, reading well, and for making it all worthwhile.

The Catechism of the Catholic Church is a positive, coherent and contemporary map for our spiritual journey toward transformation.

Reading the Book of Revelation David L. Barr, 2003-10-01 The Apocalypse lends itself to multivalent readings, and this volume fills a gap for students and scholars by discussing how different methods apply to readings. Using historical, literary, and social analysis in combination with strategies such as social-conflict theory, philosophy, women's studies, ethics, history of religions, postcolonial studies, and popular culture, the essays in this volume focus on specific texts and show not only how each helps interpret the text but also how diverse methods produce divergent readings of a text. Developed as a classroom resource for undergraduates, this work will also prove useful to graduate students, religious leaders, and others who wish to explore how methods shape our understandings of various texts, including Revelation.

Readings in Database Systems Joseph M. Hellerstein,Michael Stonebraker,2005

The latest edition of a popular text and reference on database research, with substantial new material and revision; covers classical literature and recent hot topics. Lessons from database research have been applied in academic fields ranging from bioinformatics to next-generation Internet architecture and in industrial uses including Web-based e-commerce and search engines. The core ideas in the field have become increasingly influential. This text provides both students and professionals with a grounding in database research and a technical context for understanding recent innovations in the field. The readings included treat the most important issues in the database area--the basic material for any DBMS professional. This fourth edition has been substantially updated and revised, with 21 of the 48 papers new to the edition, four of them published for the first time. Many of the sections have been newly organized, and each section includes a new or substantially revised introduction that discusses the context, motivation, and controversies in a particular area, placing it in the broader perspective of database research. Two introductory articles, never before published, provide an organized, current introduction to basic knowledge of the field; one discusses the history of data models and query languages and the other offers an architectural overview of a database system. The remaining articles range from the classical literature on database research to treatments of current hot topics, including a paper on search engine architecture and a paper on application servers, both written expressly for this edition. The result is a collection of papers that are seminal and also accessible to a reader who has a basic familiarity with database systems.

On Rereading Patricia Meyer Spacks, 2013-11-18 After retiring from a lifetime of teaching literature, Patricia Meyer Spacks embarked on a year-long project of rereading dozens of novels: childhood favorites, fiction first encountered in young adulthood and never before revisited, books frequently reread, canonical works of literature she was supposed to have liked but didn't, guilty pleasures (books she oughtn't to have liked but did), and stories reread for fun vs. those read for the classroom. *On Rereading* records the sometimes surprising, always fascinating, results of her personal experiment. Spacks addresses a number of intriguing questions raised by the purposeful act of rereading: Why do we reread novels when, in many instances, we can remember the plot? Why, for example, do some lovers of Jane Austen's fiction reread her novels every year (or oftener)? Why do young children love to hear the same story read aloud every night at bedtime? And why, as adults, do we return to childhood favorites such as *The Hobbit*, *Alice in Wonderland*, and the *Harry Potter* novels? What pleasures does rereading bring? What psychological needs does it answer? What guilt does it induce when life is short and there are so many other things to do (and so many other books to read)? Rereading, Spacks discovers, helps us to make sense of

ourselves. It brings us sharply in contact with how we, like the books we reread, have both changed and remained the same.
