Regionalism without Regions Ulrich Schmid,Oksana Myshlovska,2019-08-14 This collective volume shows how Ukraine can best be understood through its regions and how the regions must be considered against the background of the nation. The overarching objective of the book is to challenge the dominance of the nation-state paradigm in the analyses of Ukraine by illustrating the interrelationship between national and regional dynamics of change. The authors—historians, sociologists, anthropologists, economists, literary critics and linguists from Ukraine, Poland, Switzerland, Germany and the USA—explicitly go beyond the perspective of an entity defined by traditional political borders and cultural, economic, historical or religious stereotypes. The research project that led to the composition of the book combined quantitative (statistical surveys conducted across Ukraine) and qualitative (in-depth interviews and focus-group discussion) methods. The authors came to the conclusion that regionalism as a defining phenomenon of Ukraine is more prominent than the regions themselves. This approach regards Ukraine as a construct in flux where different discourses intersect, concur and eventually merge through the lenses of various disciplines and methodologies.

Mapping the Country of Regions Nancy P. Appelbaum,2016-05-18 The nineteenth century was an era of breathtakingly ambitious geographic expeditions across the Americas. The seminal Chorographic Commission of Colombia, which began in 1850 and lasted about a decade, was one of Latin America's most extensive. The commission's mandate was to define and map the young republic and its resources with an eye toward modernization. In this history of the commission, Nancy P. Appelbaum focuses on the geographers' fieldwork practices and visual production as the men traversed the mountains, savannahs, and forests of more than thirty provinces in order to delineate the country's territorial and racial composition. Their assumptions and methods, Appelbaum argues, contributed to a long-lasting national imaginary. What jumps out of the commission's array of reports, maps, sketches, and paintings is a portentous tension between the marked differences that appeared before the eyes of the geographers in the field and the visions of sameness to which they aspired. The commissioners and their patrons believed that a prosperous republic required a unified and racially homogeneous population, but the commission's maps and images paradoxically emphasized diversity and helped create a country of regions. By privileging the whiter inhabitants of the cool Andean highlands over those of the boiling tropical lowlands, the commission left a lasting but problematic legacy for today's Colombians.

American Nations Colin Woodard,2012-09-25 • A New Republic Best Book of the Year • The Globalist Top Books of the Year • Winner of the Maine Literary Award for Non-fiction Particularly relevant in understanding who voted for who during presidential elections, this is an endlessly fascinating look at American regionalism and the eleven “nations” that continue to shape North America According to award-winning journalist and historian Colin Woodard, North America is made up of eleven distinct nations, each with its own unique historical roots. In *American Nations* he takes readers on a journey through the history of our fractured continent, offering a revolutionary and revelatory take on American identity, and how the conflicts between them have shaped our past and continue to mold our future. From the Deep South to the Far West, to Yankeedom to El Norte, Woodard (author of *American Character: A History of the Epic Struggle Between Individual Liberty and the Common Good*) reveals how each region continues to uphold its distinguishing ideals and identities today, with results that can be seen in the composition of the U.S. Congress or on the county-by-county election maps of any hotly contested election in our history.

The Global Competitiveness of Regions Robert Huggins,Hiro Izushi,Daniel Prokop,Piers Thompson,2014-06-27 The aim of this book is to consider theoretically the notion of the global competitiveness of regions, as well as giving attention as to how such competitiveness may be empirically measured. With this in mind, the book has three specific objectives: first, to place the concept of regional competitiveness within the context of regional economic development theory; second, to present a rationale and method for quantifying the global competitiveness of regions; and, third, to undertake the most geographically widespread analysis of regional competitiveness differences across the globe. With regard to the third goal, the analysis incorporates more than 500 regions across Europe, North and South America, Asia-Pacific, the Middle East, and the so-called BRIC economies of Brazil, Russia, India, and China. The importance of the concept of competitiveness has increased rapidly in recent years, with the issues surrounding it becoming, at the same time, more empirically refined and theoretically complex. The focus on regions reflects the growing consensus that they are the primary spatial units that compete to attract investment, and it is at the regional level that knowledge is circulated and transferred, resulting in agglomerations, or clusters, of industrial and service sector enterprises. This growing acknowledgement of the region's role as a key spatial unit of organisation has led to attention turning to competitiveness at a more regional level. The book explores the results of the World Competitiveness Index of Regions (WCIR), covering the rankings and results of the 2014 edition. The WCIR provides a tool for analysing the development of a range of regional economies across the globe. It enables an illustration of the changing patterns of regional competitiveness on the international stage to be generated. In fundamental terms, the WCIR aims to produce an integrated and overall benchmark of the knowledge capacity, capability, and sustainability of each region, and the extent to which this knowledge is translated into economic value and transferred into the wealth of the citizens of each region.

Creative Regions Philip Cooke,Dafna Schwartz,2008-03-25 This unique book focuses on regional creativity, analysing the different factors that can affect creativity and innovation process within regions in the knowledge economy. Approaching creativity from technological, organizational and regional viewpoints, it attempts to break down the influence of oppositional approaches and take account of multi-level interactions in economy and policy. The variety of papers presented looks at: how regions can be creative and competitive how research and development is outsourced and the scientific knowledge and technology transferred what types of technology based cultural activities can operate the relevant financing and development of knowledge entrepreneurship. Whilst many of these aspects are driven by market forces *Creative Regions* demonstrates that the regional and national public sectors have a significant role to play and is essential reading on how to generate a competitive advantage for regions in the knowledge economy in the global market.

World Regions in Global Context: Peoples, Places, and Environments Sallie A. Marston,Paul L. Knox,Diana M. Liverman,Vincent Del Casino Jr.,Paul F. Robbins,2013-10-03 World Regions in Global Context presents a strong global sensibility and an emphasis on current concerns, with models of interdependent development, spatial and social inequality, and questions of spatial justice. The authors maintain that regions are the outcomes of a set of twin forces of globalisation and regionalisation. Therefore, each regional chapter stresses the global systems of connection that drive unique regional processes, making regions different. By studying regions, students not only learn the critical elements of different places, but also come to understand the fundamental processes that drive change. The 5th Edition discusses geographies of emerging regions, incorporates cutting-edge data visualisations and infographics, including Quick Response codes linking to online media, features a completely modernised cartography program, and much more. Regions and Powers Barry Buzan,Ole Wæver,2003-12-04 This book develops the idea that since decolonisation, regional patterns of security have become more prominent in international politics. The authors combine an operational theory of regional security with an empirical application across the whole of the international system. Individual chapters cover Africa, the Balkans, CIS Europe, East Asia, EU Europe, the Middle East, North America, South America, and South Asia. The main focus is on the post-Cold War period, but the history of each regional security complex is traced back to its beginnings. By relating the regional dynamics of security to current debates about the global power structure, the authors unfold a distinctive interpretation of post-Cold War international security, avoiding both the extreme oversimplifications of the unipolar view, and the extreme deterritorialisations of many globalist visions of a new world disorder. Their framework brings out the radical diversity of security dynamics in different parts of the world.

European Regions, 1870 - 2020 Jordi Martí-Henneberg,2021-08-20 This volume explains the national and regional border modifications that took place in Europe from 1870 to 2020. It provides insights that allow us to understand boundary changes for several different levels of territorial organization. The text describes the state formation process related to the regional-administrative structures in each European country, and offers insight into the degree of centralization historically by describing the extent of legislative autonomy at different administrative levels and the competences reserved for each of them. The book sheds light on the complex regional organization of Europe and the difficulties its reform has faced. The main audience will be academics and PhD/Masters students working in a variety of geography fields, and the maps included in each chapter will also be of interest to a broader audience including undergraduate and secondary-school students wishing to better understand the political history of Europe.

Regional Worlds: Advancing the Geography of Regions Martin Jones,Anssi Paasi,2017-10-02 A key concern in the debate and empirical research on the geography of regions is the evolution of the conceptualizations and practical uses of the idea of 'region'. This idea prioritises both the intellectual and the practical development of regional studies. This book drives the discussion further. It stresses the complex forms of agency/advocacy involved in the production and reproduction of regional spaces and space of regionalism as well as the importance of geohistory and context. The book moves beyond the territorial/relational divide that has characterized debates on regions and regional borders since the 1990s. The contributors answer key questions from different conceptual and concrete-contextual angles and to motivate readers to reflect on the perpetual significance of regional concepts and how they are mobilized by various actors to maintain or transform the contested spatialities of societal power relations. This book was based on a special issue of Regional Studies.

The Rise of the Networking Region Are Vegard Haug,2016-02-17 How regions and cities adapt to a Network Society and a globalized environment, the policies they pursue and how structures of governance are transformed in the pursuit of those policies are major themes in this volume. These issues are addressed with specific reference to the Nordic regions of Europe. Covering the four Nordic countries of Denmark, Finland, Norway, and Sweden plus the Faroe Islands, this volume charts the changes in networking activities and related development initiatives that have taken place over the last ten years. This means analysing regions in their pursuit of new policies, partnerships and styles of representation. Through this process regions are becoming partners and players in European integration and a movement of integrative regionalism is taking shape which is different from inward looking identity regionalism or self-centred competitive regionalism and takes regions beyond lobbying in Brussels.
