Managing Natural Resources for Development in Africa Washington Odongo Ochola, P. C. Sanginga, Isaac Bekalo, 2010 The complex and dynamic interlinks between natural resource management (NRM) and development have long been recognized by national and international research and development organizations and have generated voluminous literature. However, much of what is available in the form of university course books, practical learning manuals and reference materials in NRM is based on experiences from outside Africa. Managing Natural Resources for Development in Africa: A Resource Book provides an understanding of the various levels at which NRM issues occur and are being addressed scientifically, economically, socially and politically. The book's nine chapters present state-of-the-art perspectives within a holistic African context. The book systematically navigates the tricky landscape of integrated NRM, with special reference to Eastern and Southern Africa, against the backdrop of prevailing local, national, regional and global social, economic and environmental challenges. The authors' wide experience, the rich references made to emerging challenges and opportunities, and the presentation of different tools, principles, approaches, case studies and processes make the book a rich and valuable one-stop resource for postgraduate students, researchers, policymakers and NRM practitioners. The book is designed to help the reader grasp in-depth NRM perspectives and presents innovative guidance for research design and problem solving, including review questions, learning activities and recommended further reading. The book was developed through a writeshop process by a multi-disciplinary team of lecturers from the University of Nairobi, Egerton University, Kenyatta University, the University of Zimbabwe, the University of Malawi, Makerere University and the University of Dar es Salam. In addition, selected NRM experts from regional and international research organizations including the World Agroforestry Center (ICRAF), the Africa Forest Forum, RUFORUM, IIRR and the International Development Research Centre (IDRC) participated in the writeshop and contributed material to the book.

Unnatural Resources Mindy Uhrlaub, 2020-11-30 When her Congolese village is destroyed by an invading militia group, eleven-year-old Therese is injured and outcast. Stranded with only her little brother's best friend in a war-torn jungle, she is forced to make a choice: lie down and become another victim of the war or stand up and survive. Desperate to find her mother and beloved brother, Felix, she uses her greatest gift, her knowledge of English, to navigate the vast web of humanitarian aid groups. Along the way, she meets the charismatic one-legged teenager, Robert, who takes her on an adventure with a film crew which becomes her lifeline back home. Luna, Therese's mother, has been taken as a slave and concubine to the handsome and evil leader of the militia, The General. In a harrowing act of bravery, she uses her own knowledge of languages to make the difficult choice to escape into the mountainous jungle. In her struggle to reunite with Therese and Felix, some of the least likely people become her friends. With its themes of women's empowerment, Unnatural Resources is a stunning and unflinchingly brutal redefinition of the meaning of family. This book tells the story of a young Congolese girl who becomes a symbol of hope in the worst place in the world to be female.

Access and Benefit Sharing of Genetic Resources, Information and Traditional Knowledge Charles Lawson,Michelle Rourke,Fran Humphries,2022-10-14 Addressing the management of genetic resources, this book offers a new assessment of the contemporary Access and Benefit Sharing (ABS) regime. Debates about ABS have moved on. The initial focus on the legal obligations established by international agreements like the United Nations Convention on Biological Diversity and the form of obligations for collecting physical biological materials have now shifted into a far more complex series of disputes and challenges about the ways ABS should be implemented and enforced. These now cover a wide range of issues, including: digital sequence information, the repatriation of resources, technology transfer, traditional knowledge and cultural expressions, open access to information and knowledge, naming conventions, farmers’ rights, new schemes for accessing pandemic viruses sharing DNA sequences, and so on. Drawing together perspectives from an interdisciplinary range of leading and emerging international scholars, this book offers a new approach to the ABS landscape; as it breaks from the standard regulatory analyses in order to explore alternative solutions to the intractable issues for the Access and Benefit Sharing of genetic resources. Addressing these modern legal debates from a perspective that will appeal to both ABS scholars and those with broader legal concerns in the areas of intellectual property, food, governance, Indigenous issues, and so on, this book will be a useful resource for scholars and students as well as those in government and in international institutions working in relevant areas.
