Scientific Computation with Automatic Result Verification Ulrich Kulisch,Hans J. Stetter,2012-12-06 Scientific Computation with Result Verification has been a persevering research topic at the Institute for Applied Mathematics of Karlsruhe University for many years. A good number of meetings have been devoted to this area. The latest of these meetings was held from 30 September to 2 October, 1987, in Karlsruhe; it was co-sponsored by the GAMM Committee on Computer Arithmetic and Scientific Computation. - - This volume combines edited versions of selected papers presented at this conference, including a few which were presented at a similar meeting one year earlier. The selection was made on the basis of relevance to the topic chosen for this volume. All papers are original contributions. In an appendix, we have supplied a short account of the Fortran-SC language which permits the programming of algorithms with result verification in a natural manner. The editors hope that the publication of this material as a Supplementum of Computing will further stimulate the interest of the scientific community in this important tool for Scientific Computation. In particular, we would like to make application scientists aware of its potential. The papers in the second chapter of this volume should convince them that automatic result verification may help them to design more reliable software for their particular tasks. We wish to thank all contributors for adapting their manuscripts to the goals of this volume. We are also grateful to the Publisher, Springer-Verlag of Vienna, for an efficient and quick production.

What Self-Made Millionaires Do That Most People Don't Ann Marie Sabath,2018 Confucius said that a thousand-mile journey begins with one step. The same principle applies to becoming a self-made millionaire except this journey consists of 52 common sense practices. Debt free or not, this book will assist you in recognizing that you are closer to becoming a self-made millionaire than you imagine. You will be astonished to see how anyone can achieve this status when you create the right mindset. You will learn how white-collar professionals, blue-collar workers, small business owners, even teenagers alike have joined this million dollar net worth rank by methodically and consistently putting into practice the self-made millionaire game plan revealed in this book.

Teaching for Results Findley B. Edge,1999-01-01 In this revised edition Findley B. Edge explains that many Sunday school teachers fail to achieve better results because 'their teaching aims are too general and often vague.' The solution, he says, is for the teacher to focus on a single objective for each lesson and 'work toward that aim with singleness of purpose.'

The Ideal Result Jack Hipple,2012-06-26 The Ideal Final Result introduces the TRIZ Inventive Problem Solving Process in a way that allows readers to make immediate use of its most basic concepts. The Ideal Final Result reviews the basics of this left brained, but at the same time, very creative process for problem solving that uses a basic algorithm developed through the study of millions of patents. As opposed to psychologically based tools relying on the generation of hundreds of ideas to be sorted through to find the few of value, TRIZ rigorously defines the problem and assists the problem owner in identifying the existing inventive principles that are already known to solve that class of problems. This book reviews the most basic of the TRIZ algorithm tools and provides templates for readers to use in analyzing their difficult problems and provides a mental framework for their solution. It also describes TRIZ techniques for basic strategic planning in a business sense.
