Institutional Case Studies on Necessity Entrepreneurship Jeremi Brewer, Stephen W. Gibson, 2016-07-27 An estimated one billion individuals in both developed and developing nations can be defined as necessity entrepreneurs; individuals who have no other viable option for licit income than to start a small, income generating activity. However, the emphasis on providing business and leadership training to necessity entrepreneurs is only just gaining traction. This book provides the first-known global analysis dedicated exclusively to organizations from both the public and private sectors that are specifically involved with microenterprise education for necessity entrepreneurs. The authors provide a pragmatic synopsis and evaluate the efficacy of the programs that have been, currently are, or will soon be teaching and/or training necessity entrepreneurs around the globe.

The University, State, and Market Robert A. Rhoads, Carlos Alberto Torres, 2006 This is an examination of the complex relationships among universities, states, and markets in light of the growing influence of globalization.

OECD Studies on SMEs and Entrepreneurship SME and Entrepreneurship Policy in Brazil 2020 OECD, 2020-04-27 This report provides policy recommendations to enhance Brazil's SME and entrepreneurship performance, covering, among others, innovation policy, export support, access to finance, and women's entrepreneurship.

Entrepreneurship Thierry Burger-Helmchen, 2012-03-14 Entrepreneurship is a main driver of economic growth and of social dynamics. However, some basic characteristics like the gender of the entrepreneur, the geographical location, or the social context may have a tremendous impact on the possibility to become an entrepreneur, to create a firm and to prosper. This book is a collection of papers written by an array of international authors interested in the question of entrepreneurship from a gender point of view (male vs female entrepreneurship), a geographical point of view (Africa, Europe, America and Latin America, Asia...) or a specific social context point of view (agricultural economy, farming or family business, etc.).

Global Innovation Index 2017 Cornell University, INSEAD, World Intellectual Property Organization, 2017-06-15 The Global Innovation Index provides detailed metrics about the innovation performance of 127 countries and economies around the world. Its 81 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. This year's report reviews the state of innovation in agriculture and food systems across sectors and geographies. Chapters of the report provide more details on this year's theme from academic, business, and particular country perspectives from leading experts and decision makers.

Circular Economy Suzana Borschiver, Aline Tavares, 2024-03-20 The concept of Circular Economy, which is the central theme of this book, is based on the preservation and increase of natural capital by controlling finite stocks and balancing the flow of renewable resources. Both sustainability and Circular Economy concepts go together and share the objective of mitigating the negative externalities mentioned here. The strategies to find the possible answers go through several actions. An economic model that implies changes in the way of thinking and acting in a society requires the training of people and professionals focused on its application. The publication of this book was a way of delivering the results of this work to the society, placing its individuals as agents of social transformation. In this context, the chapters are varied purposefully, so that topics pertinent to Circular Economy can be discussed, but not consolidated in one work alone so far. If we strive for a more resilient economy, a fairer society, and a healthier environment, walking the path is needed. We hope that this reading can elucidate the subject and awaken a critical sense of what attitudes or strategies can get us started. The book aims to reach from readers specialized in the subject, professors, high school students, undergraduate and graduate students, to the curious, beginners in the world of Circular Economy and new business models.

Quality Innovation: Knowledge, Theory, and Practices Al-Hakim, Latif, 2013-11-30 Internet and social networks play a critical role in the evolution of processes and functional areas that allow businesses to reach a wider base of end-users and achieve competitive advantage in their respective markets. Quality Innovation: Knowledge, Theory, and Practices presents a compilation of recent theoretical frameworks, case studies, and empirical research findings in the area of quality innovation. It highlights the theories, strategies, and potential concerns for organizations engaged in change management designed to address stakeholders' needs. This reference volume serves as a valuable resource for researchers, business professionals, and students in a variety of fields and disciplines.

Advances in Production Management Systems: Innovative and Knowledge-Based Production Management in a Global-Local World Bernard Grabot, Bruno Vallespir, Gomes Samuel, Abdelaziz Bouras, Dimitris Kiritsis, 2014-08-26 The three volumes IFIP AICT 438, 439, and 440 constitute the refereed proceedings of the International IFIP WG 5.7 Conference on Advances in Production Management Systems, APMS 2014, held in Ajaccio, France, in September 2014. The 233 revised full papers were carefully reviewed and selected from 271 submissions. They are organized in 6 parts: knowledge discovery and sharing; knowledge-based planning and scheduling; knowledge-based sustainability; knowledge-based services; knowledge-based performance improvement, and case studies.

The Global Innovation Index 2018 Cornell University, INSEAD, World Intellectual Property Organization, 2018-07-10 The Global Innovation Index 2018 provides detailed metrics about the innovation performance of 126 countries and economies around the world. Its 80 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. The GII 2018 analyses the energy innovation landscape of the next decade and identifies possible breakthroughs in fields such as energy production, storage, distribution, and consumption. It also looks at how breakthrough innovation occurs at the grassroots level and describes how small-scale renewable systems are on the rise.

Global Innovation Index 2019: Creating Healthy Lives — The Future of Medical Innovation World Intellectual Property Organization, INSEAD, Cornell University, 2019-07-24 The Global Innovation Index 2019 provides detailed metrics about the innovation performance of 129 countries and economies around the world. Its 80 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. The GII 2019 analyzes the medical innovation landscape of the next decade, looking at how technological and non-technological medical innovation will transform the delivery of healthcare worldwide. It also explores the role and dynamics of medical innovation as it shapes the future of healthcare, and the potential influence this may have on economic growth. Chapters of the report provide more details on this year's theme from academic, business, and particular country perspectives from leading experts and decision makers.

Taking the Wheel Caren Addis, 2010-11-01 In this study, the author (whose affiliation is not stated) discusses the auto parts sector as a microcosm of economic development in Brazil. He follows the introduction of a horizontal vision for the industry and the hybrid organizational practices of the Fifties and early Sixties, through the failure of the industry to consolidate, and the subsequent unraveling, and eventual partial reconstruction, of horizontal arrangements. Theoretical implications of the historical vision are also explored, as are the background and strategic ingredients of the industry's strategy for exports and competitiveness. Public incentives in support of R+D and innovation in the Federal State of Espírito Santo, Brazil Daniel Streit, 2004-02-24 Inhaltsangabe: Problemstellung: Die in englischer Sprache verfasste Arbeit gliedert sich in zwei große Abschnitte einen Theoretischen und einen Praktischen. Im theoretischen Teil werden zunächst die Begriffe Forschung & Entwicklung und Innovation definiert sowie die Eigenschaften eines Nationalen Innovationssystems beschrieben. Weiter wird die Frage diskutiert, ob Innovationen beziehungsweise F&E staatliche Unterstützung brauchen, oder ob es angebrachter ist, vorhandene Marktmechanismen die Menge an F&E bestimmen zu lassen. Ein sehr großes Kapitel der Arbeit ist infolge der Beschreibung der einzelnen Instrumente der Innovationspolitik bzw. Innovationsökonomie gewidmet. Hierbei werden nicht nur die

zwölf am häufigsten verwendeten staatlichen Maßnahmen zur Förderung von Innovationen und F&E auf ihre Stärken und Schwächen hin untersucht, sondern es wird auch erläutert welche Instrumente in welcher Art und Weise in der Lage sind, die Innovationstätigkeit in einem Land zu erhöhen. Der praktische Teil der Arbeit befasst sich zunächst mit der wirtschaftlichen Situation des Bundesstaates Espirito Santo und dessen Innovationssystem. Im Anschluss daran erfolgt eine Bestandsaufnahme der in Espirito Santo aktuell verwendeten innovationspolitischen Maßnahmen zur Förderung von Innovationen und F&E. Hierbei wurden Daten verwendet, die bei zahlreichen Interviews mit den zuständigen Stellen vor Ort gesammelt wurden. Darauf aufbauend (und mit Hilfe der Erkenntnisse aus dem theoretischen Teil der Arbeit) werden die innovationspolitischen Maßnahmen des Bundesstaates Espirito Santo evaluiert und vereinzelte Verbesserungsmöglichkeiten in der Innovationspolitik des Bundesstaates aufgezeigt. Ein zweiseitiges summary fasst die wichtigsten Ergebnisse am Ende der Arbeit noch einmal zusammen. Regional Innovation Patrick Dubarle,Yali Woyessa,2016-06-01 “This book provides an excellent analysis of regional innovation policy issues and developments with a wealth of examples, notably from OECD countries. Key policy areas, such as clusters, support services, and higher education institutions, are well documented. The research methodology is founded on the experience accumulated by the authors over several decades in many different countries in the context of a world class international organisation. This allows a good selection of policy relevant examples and an experienced presentation of them.” – Jean-Eric Aubert, Former programme manager, World Bank and OECD

OECD Reviews of Digital Transformation Going Digital in Brazil OECD,2020-10-26 Going Digital in Brazil analyses recent developments in Brazil’s digital economy, reviews policies related to digitalisation and makes recommendations to increase policy coherence in this area.

Globalization and Its Managerial Implications C. Rao,2000-11-30 Globalization is a force with a strong, analyzable impact on management practices. Rao and his contributors explore its implications and show how globalization's impacts differ by sector and region of the world. Taking a comprehensive and integrated approach to the managerial implications of globalization, they report research on six groups of critical issues: the environmental, micromanagerial, the exporter-importer interaction, market communications, sectoral management, and regional management. Academicians and executive policy makers concerned with the internationalization of business will find the book of special importance. It may also be used as a text supplement in graduate courses in international business and marketing. Rao's contributors focus primarily on the managerial implications of the globalization process that are of most concern to management today. Combining conceptualization with empirical research, they show how pervasive is the environmental force of globalization, and focus on such up-to-date concerns as relationship marketing and the complex issues of importer-exporter interaction. The result is a useful insight into the interaction processes that govern international trading. The contributors focus too on the unique impacts of globalization on information technologies, the services industry, and small and medium-sized firms. They also investigate the phenomena of newly emerging markets struggling to embrace free market systems and identify the challenges and opportunities these markets offer and how distinctly different they are from one market to another.

Small Scale Sport Tourism Events and Local Sustainable Development Ricardo Melo,Claude Sobry,Derek Van Rheenen,2021-04-10 This book outlines the impacts of small scale sport tourism events on local sustainable development in different countries. Using half marathons organized in small and medium sized cities as an example, the chapters are robust case studies, applying a unified methodology in order to provide a clear overview of the sport tourism system in each country. The book begins with a description of the methodologies used and an overview of the countries studied. The country chapters focus on several dimensions of sport tourism in each city, including but not limited to the history of past sport tourism events in the municipality, the characteristics of the city hosting the event, the demographic profile of participants in the event, and the quantifiable economic, environmental, and sociocultural impacts of the event. Each chapter concludes with analysis and policy recommendations for holding future events that contribute to local sustainable development. The book concludes by summarizing and comparing the main results across different countries, and presenting main conclusions and overarching recommendations. Written by international experts in sports tourism, this book is geared towards academic researchers and students, interested in sport tourism, sports economics, management, and sustainable development, as well as policy makers and professionals tasked with bringing such events to their cities.

The role of the CSR policies focused on local content actions in host countries faced with governance gaps and mining operations Luis Bustos,2015-04-01 The idea that a private enterprise has a social function and some obligations to all stakeholders is not something that has always existed. Concepts like sustainable development and shared value appeared only after a long process of trial and error. Understanding the origins of the theory of corporate social responsibility and its evolution will allow us to be ever closer to solving the mystery of what should be the role of private capital in society. It will also help us determine its importance when facing significant challenges due to government absence or weakness over certain territories.

Coffee researches Decio Zylbersztajn,Samuel Ribeiro Giordano,Christiane Leles Rezende,2021-02-19 The Università del Caffè Brazil was born in March of 2000 as a result of a partnership between PENSA (Agribusiness Knowledge Center - FEA/USP and FIA) and illycaffè. The mission, since the beginning, has being the generation and dissemination of knowledge to the coffee system. To celebrate 18 years of activities we publish this collection of research conducted between 2013 and 2017. During these years of activity the UdC Brazil team, in close harmony with Illycaffè, has conducted courses to coffee growers and technicians covering technical and managerial aspects. There were more than 9 thousand participations in seminars, short courses and five editions of Specialization Course in the Coffee Agribusiness. In tune with the needs of coffee growers and illycaffè, since 2014 the UdC Brazil courses are held at a distance through the portal universidadedocafe.com. Aligned with its mission, the University of Caffè Brazil generates knowledge through the production of research. This book intends to support the dissemination of the knowledge to the community of the coffee agribusiness, adding value to all its participants.
