Efficiency in the Public Sector Kevin J. Fox, 2013-04-17
Regardless of where we live, the management of the public sector impacts on our lives. Hence, we all have an interest, one way or another, in the achievement of efficiency and productivity improvements in the activities of the public sector. For a government agency that provides a public service, striving for unreasonable benchmark targets for efficiency may lead to a deterioration of service quality, along with an increase in stress and job dissatisfaction for public sector employees. Slack performance targets may lead to gross inefficiency, poor quality of service, and low self-esteem for employees. In the case of regulation, inappropriate policies can lead to unprecedented disasters. Examples include the decimation of fish stocks through mismanagement of fisheries, and power blackouts through inappropriate restrictions on electricity generators and distributors. Efficient taxation policies minimise the tax bill for citizens. In all of these cases, efficient management is required, although it is often unclear how to assess this efficiency. In this volume, several authors consider various aspects and contexts of performance measurement. Hence, this volume represents a unique collection of advances in efficiency assessment for the public sector by leading researchers in the field. Efficiency in the Public Sector is divided into two sections. The first is titled Issues in Public Sector Efficiency Evaluation and comprises of chapters 1-4. The second section is titled Efficiency Analysis in the Public Sector - Advances in Theory and Practice. This division is somewhat arbitrary, in the sense there are

significant overlapping themes in both sections. However, it serves to separate chapters that can be characterised as dealing with broader issues (Section I), from chapters that can be characterised as focusing on specific theoretical problems and empirical cases (Section II).

**QUALITY OF WORK LIFE- A COMPARATIVE STUDY ON
PUBLIC AND PRIVATE SECTOR ENTERPRISES IN KERALA**
AMBILY A.S.,

Civil Society, the Third Sector and Social Enterprise Jean-Louis Laville, Dennis R. Young, Philippe Eynaud, 2015-04-24 If the twentieth century was only focused on the complementarity and the opposition of market and state, the twenty-first century has now to deal with the prominence of the third sector, the emergence of social enterprises and other solidarity hybrid forms. The concept of civil society organisations (CSOs) spans this diversity and addresses this new complexity. The first part of the book highlights the organizational dimensions of CSOs and analyses the growing role of management models and their limits. Too often, the study of CSO governance has been centered on the role of the board and has not sufficiently taken into account the different types of accountability environments. Thus, the conversation about CSO governance rises to the level of networks rather than simple organizations per se, and the role of these networks in setting the agenda in a democratic society. In this perspective, the second part emphasizes the institutional dimensions of CSO governance by opening new avenues on democracy. First, the work of Ostrom about governing the commons provides us new insights to think community self-governance. Second, the work of Habermas and Fraser opens the question of deliberative governance and the role of public sphere to enlarge our vision of CSO governance. Third, the concepts of substantive rationality and economy proposed respectively by

Ramos and Polanyi reframe the context in which the question can be addressed. Lastly, this book argues for a stronger intercultural approach useful for the renewal of paradigms in CSOs research. This book has for objective to present a unique collective work in bringing together 33 authors coming from 11 countries to share perspectives on civil society governance and will be of interest to an international audience of researchers and policy-makers.

Power Sector Reform in SubSaharan Africa J. Turkson, 2000-03-02 As part of the wave of liberalisation sweeping most parts of the world, power sectors around the globe are coming under intense scrutiny, with some being restructured. This book presents six-country-case studies to examine the process and implementation experiences of power sector reform in Subsaharan Africa.

Canadian Public-Sector Financial Management

Andrew Graham, 2014-10-01 It's not your money - it belongs to the people. Taking this simple axiom seriously creates unique challenges for the management of public funds. Andrew Graham outlines all aspects of public sector financial management, addressing how funds are obtained, what rules of accountability and accounting are applied, who controls public funds, what constitutes effective budget management at the operational level, and how accountability and oversight are dealt with. The skills demanded of public sector managers in financial management are becoming increasingly onerous and complex. *Canadian Public Sector Financial Management* will be of great help to practitioners in the public sector who wish to better understand their financial responsibilities

as well as to students of public administration and the general reader concerned with public financial management issues. The second edition of Canadian Public-Sector Financial Management updates the widely used text, reflecting on the developments in public financial management over the past six years. Developments in financial reporting and the widespread need for governments to constrain growth and manage their finances more closely are looked at. It remains focused on the practitioner and manager in the public sector.

Governance and sector outcomes Anna

Wetterberg, Derick W. Brinkerhoff, 2018-09-27 A critical issue in international development is how donor-funded programs can support sustainable and long-lasting changes in assisted countries. Among the factors associated with sustainability is improved governance. However, many donor-funded initiatives are focused on achieving results in specific sectors, such as health, education, and agriculture. How can governance interventions contribute to achieving sector-specific results? This brief explores this question and discusses how international development practice has incorporated recognition of the links between governance and sector outcomes. The brief develops a stylized continuum of how governance elements relate to sector interventions and contribute to expected outcomes. We discuss factors that either impede or impel governance integration and close with some observations regarding prospects for integrated programming. The audience for the brief is the international development policy and practitioner communities, and secondarily, academics with an interest in the topic. Key take-aways include: (1) there is ample evidence of positive contributions from improved governance to sector-specific outcomes, but few guideposts exist for practical and effective governance integration; (2) barriers to integration include

urgent sector priorities that overshadow governance concerns, requirements to demonstrate progress towards ambitious sector targets, and complex choices related to measurement; and (3) sustainability and self-reliance are major drivers for integration and are facilitated by the flexibility and adaptation that governance integration enables.

The Public Sector in an Age of Austerity Bryan M. Evans, Carlo Fanelli, 2018-07-23 Following the 2008 global financial crisis, Canada appeared to escape the austerity implemented elsewhere, but this was spin hiding the reality. A closer look reveals that the provinces – responsible for delivering essential public and social services such as education and healthcare – shouldered the burden. *The Public Sector in an Age of Austerity* examines public-sector austerity in the provinces and territories, specifically addressing how austerity was implemented, what forms austerity agendas took (from regressive taxes and new user fees to public-sector layoffs and privatization schemes), and what, if any, political responses resulted. Contributors focus on the period from 2007 to 2015, the global financial crisis and the period of fiscal consolidation that followed, while also providing a longer historical context – austerity is not a new phenomenon. A granular examination of each jurisdiction identifies how changing fiscal conditions have affected the delivery of public services and restructured public finances, highlighting the consequences such changes have had for public-sector workers and users of public services. The first book of its kind in Canada, *The Public Sector in an Age of Austerity* challenges conventional wisdom by showing that Canada did not escape post-crisis austerity, and that its recovery has been vastly overstated.

Defining the Nonprofit Sector Lester M.

Salamon, Helmut K. Anheier, 1997 The growth of the non-profit, voluntary or third sector has been widely recognized throughout the world. This text seeks to provide a definition and a common classification of the non-profit sector, while recognizing the great diversity of voluntarism internationally.

Third-sector Development Christopher Eaton Gunn, 2004 The third sector -- Third-sector scope, scale, and purpose -- Development and the third sector -- Food -- Housing -- Financial services -- Health care -- The arts -- Other basic needs -- Support organizations -- Public policy for third-sector development -- Developing a future.

The Private Sector and Organized Crime Yuliya Zabyelina, Kimberley L. Thachuk, 2022-09-02 This book contributes to the literature on organized crime by providing a detailed account of the various nuances of what happens when criminal organizations misuse or penetrate legitimate businesses. It advances the existing scholarship on attacks, infiltration, and capture of legal businesses by organized crime and sheds light on the important role the private sector can play to fight back. It considers a range of industries from bars and restaurants to labour-intensive enterprises such as construction and waste management, to sectors susceptible to illicit activities including transportation, wholesale and retail trade, and businesses controlled by fragmented legislation such as gambling. Organized criminal groups capitalize on legitimate businesses beleaguered by economic downturns, government regulations, natural disasters, societal conflict, and the COVID-19 pandemic. To survive, some private companies have even become the willing partners of criminal organizations. Thus, the relationships between licit businesses and organized crime are highly varied and can range from victimization of businesses to willing

collusion and even exploitation of organized crime by the private sector - albeit with arrangements that typically allow plausible deniability. In other words, these relationships are highly diverse and create a complex reality which is the focus of the articles presented here. This book will appeal to students, academics, and policy practitioners with an interest in organized crime. It will also provide important supplementary reading for undergraduate and graduate courses on topics such as transnational security issues, transnational organized crime, international criminal justice, criminal finance, non-state actors, international affairs, comparative politics, and economics and business courses.

From Macroeconomic Correction to Public Sector Reform Eduardo Wiesner Durán, 1993-01-01 This paper explains why tough public sector reform and a sound macroeconomy are essential to sustained growth. It provides a strategy to help countries evaluate how well their governments' policies work. Decisionmakers will learn ways to build an evaluations program that can make governments more accountable and improve their performance. Some options could include making central banks independent, eliminating earmarked funds, and balancing the national budget. The author suggests which government offices should oversee and develop evaluation policies to get the best results, and explains why evaluation results must be linked with all budget decisions. He describes the political and economic environment that allows the evaluation process to develop freely. Also discussed is the role that the World Bank and other institutions should play in supporting evaluation programs. The study examines how sound evaluation can lead to more consistent international policies and better international governance.

Data Uses in the Private Sector , 1974

The architecture of the Sudanese agricultural sector and its contribution to the economy between 1990 and 2021 Alhelo, Alzaki, Siddig, Khalid, Kirui, Oliver K., 2023-06-07 The paper reviews the performance of the Sudanese agricultural sector over the last three decades (1990 through 2021) and examines the drivers of that performance. Key findings show that the sector's contribution to gross domestic product was greater during the 1990-1999 period than during the other two decades; agricultural productivity as well was higher in that decade than in the subsequent two decades. The sector has remained a major source of employment and livelihood. During the last decade reviewed (2010-2021), the sector regained its leading position as a generator of foreign currency. Public investment in agriculture and government spending allocated to the sector were lower than in other countries in the region. Political elites have generally lacked commitment to development plans in the sector. Political developments in Sudan have disrupted more recent efforts to revitalize the sector. Climate change, as manifested in rising temperature, declining rainfall, and drought, is a substantial determinant currently affecting the sector. The paper discusses some broad recommendations for improving the performance of the Sudanese agricultural sector.

Regulating the Privately Rented Housing Sector

Jill Stewart, Russell Moffatt, 2022-03-10 This book explores theory and practice in the complex policy area of privately rented housing in England, with a particular focus on environmental and public health. Bringing together a range of both academic and practicing experts in the field, it responds to the rapid growth and changing nature of the sector and considers the range of options available to local authorities in ensuring more effective regulation strategies. This book:

Creates a key, up-to-date professional resource for housing regulation based on road-tested academic course material. Breaks down strategies and practices to an implementational level. Provides impetus to leaders, practitioners, and students to both deliver and reflect on improved regulation. Explores responses to various stakeholder needs through the lens of protecting and supporting tenants. This book will interest professionals working in public health, housing, and local authorities, as well as environmental health and housing academia. Students across environmental health, social work, nursing, and other disciplines will also find this appealing.

Addressing the water challenges in the agriculture sector in Near East and North Africa Elmahdi, A., Badawy, A., Alejandro Paltan Lopez, H., 2022-06-27 The background paper entitled "Addressing the water challenges in the agriculture sector in Near East and North Africa (NENA)" is part of a series of background papers that supported the production of the regional publication State of Land and Water Resources for Food and Agriculture (SOLAW) in the Near East and North Africa Region. The paper reports on the issues, responses and monitoring progress in relation to supporting the region to maintain local agricultural production with less water.

The Sector Strategist Timothy J. McIntosh, 2012-04-03 Using Asset Allocation to Reduce Risk and Boost Investing Returns Presenting a revolutionary new investment philosophy that redefines how we view sector investing, The Sector Strategist challenges long held ideas about how this unique area of finance operates. Misconceptions, such as the belief that international stocks provide diversification, are preventing investors from making the most of the opportunities for financial growth that sectors provide, and the book presents practical,

applicable evidence that a better, more profitable option is available. Additionally, the book hopes to give readers an opportunity to improve returns and protect retirement assets by providing a wide range of techniques and tools designed to optimize wealth that the author has developed over the last decade. Designed to help investors avoid the often inaccurate assumptions made by experts which promote typical asset allocation Written by Timothy McIntosh, investment expert and founder of SIPCO/Strategic Investment Partners, whose firm's stock portfolio has earned five-star returns from Morningstar annually since 2003 Contains easy-to-apply tools for wealth protection and growth that have been proven successful during the market fluctuations of 2002 and 2008 The history and opportunities afforded by sectors have been written about at length, but no book has broken with tradition so radically, and with such success, as The Sector Strategist.

Disaster Management and Private Sectors Takako Izumi, Rajib Shaw, 2015-02-13 This book draws upon case studies and practices of different types of DRR involvement by the private sector from all over the world. The book comprises two parts, Part I: Overview and Regional Cases; and Part II: Country Cases. The regional cases include those from Africa, Asia, Europe, and Central America, and the country cases include ones from India, Japan, the United States, Vietnam, Thailand, Bangladesh, Malaysia, and Nepal. DRR at the international level is discussed from the perspective of the United Nations International Strategy for Disaster Reduction (UNISDR). The perspective of the Asia-Pacific Economic Cooperation (APEC) is presented in the discussion of DRR at the societal level. The private sector is becoming more active in disaster management and plays an important role in distributing relief items and sending search and rescue teams in the

response phase. However, once the response stage is over, private sector involvement tends to fade. While a number of disaster risk reduction (DRR) initiatives by the private sector are documented, they remain limited. The private sector can contribute enormously to DRR by developing business continuity plans, innovating technology for early warning systems, and providing and sharing technical knowledge, skills, and resources in the field of disaster preparedness. To strengthen DRR capacity, it is crucial to involve the private sector as major actors in DRR. The primary target groups for this book are students and researchers in the fields of disaster management and DRR studies. Another target group comprises practitioners and policy makers, who will be able to apply the collective knowledge from this work to policy and decision making. The book provides an overview of the current research trends and furnishes basic knowledge on this important topic.

Agriculture Sector Programs Nwanze

Okidegbe, 1998-01-01 This sourcebook provides practical guidance to policymakers and program planners in countries and to development agencies on how to carry out or support an agricultural sector program—from initial discussions, to developing the program concept, to securing broad stakeholder involvement, to implementation. It explains the reasons why countries may wish to undertake a sector or subsector program and describes the conditions which can help ensure the program's success; provides details on how to formulate a sector strategy and bring about institutional reforms; focuses on core public sector activities based on a detailed expenditure review; and suggests ways of encouraging donors to work together under the leadership of the partner country government.
