**Drawn in Stereo** Michael Gillette, 2015-10 Inspired by experience in the music industry and origins as an aspiring pop star, British artist Michael Gillette delivers his greatest hits, demos, and rare cuts of the past three decades in *DRAWN IN STEREO*. Showcasing pieces produced for Beastie Boys, Paul McCartney, MGMT, and Beck--among many others--*DRAWN IN STEREO* focuses on Gillette's ability to channel music into compelling visual art. Gillette shares a curated collection of artistic approaches, including installations, fashion sketches, music video animation stills, and magazine contributions for *Spin* and *The New Yorker*. Filled with selections from more than 20 years of work created in Britain and America, *DRAWN IN STEREO* encompasses a wide spectrum of visual directions and celebrates many key projects. Featuring a foreword by Fred Deakin and interview by *Elastica*'s Justine Frischmann, *DRAWN IN STEREO* reveals an inspired life, ranging from Britpop London and rooming with the Aphex Twin to a decade of creativity in San Francisco. Life needs a backbeat, and that rhythm needs some visuals. So, I'll keep sharpening the pencils, listening for the muse to sing me a new song. --Michael Gillette

*Stereo(TYPE)* Jonah Mixon-Webster, 2021-07-13 A radical, urgent collection of poems about Blackness, the self, and the dismantling of corrupt powers in the fight for freedom. A PEN America Literary Award Winner Jonah Mixon-Webster works at the intersections of space and the body, race and region, sexuality and class. *Stereo(TYPE)*, his debut collection of poetry, is a reckoning and a force, a revision of our most sacred mythologies, and a work of documentary reporting from Mixon-Webster's hometown of Flint, Michigan, where clean tap water remains an uncertainty and the aftermath of racist policies persist. Challenging stereotypes through scenes that scatter with satire, violence, and the extreme vagaries of everyday life, Mixon-Webster invents visual/sonic forms, conceptualizes poems as transcripts and frequently asked questions, and dives into dreamscapes and modern tragedies, deconstructing the very foundations America is built on. Interrogating language and the ways we wield it as both sword and shield, *Stereo(TYPE)* is a one-of-a-kind, rapturous collection of vital and beautiful poems.

Living Stereo Paul Thibierge, Kyle Devine, Tom Everett, 2015-01-29 Stereo is everywhere. The whole culture and industry of music and sound became organized around the principle of stereophony during the twentieth century. But nothing about this--not the invention or acceptance or ubiquity of stereo--was inevitable. Nor did the aesthetic conventions, technological objects, and listening practices required to make sense of stereo emerge fully formed, out of the blue. This groundbreaking book uncovers the vast amount of work that has been required to make stereo seem natural, and which has been necessary to maintain stereo's place as a dominant mode of sound reproduction for over half a century. The essays contained within this book are thematically grouped under (Audio) Positions, Listening Cultures, and Multichannel Sound and Screen Media; the cumulative effect is to advance research in music, sound, and media studies and to build new bridges between the fields. With contributions from leading scholars across several disciplines, *Living Stereo* re-tells the history of twentieth-century aural and musical culture through the lens of stereophonic sound.

*The Perfect Sound* Garrett Hongo, 2022-02-22 A poet's audio obsession, from collecting his earliest vinyl to his quest for the ideal vacuum tubes. A captivating book that "ingeniously mixes personal memoir with cultural history and offers us an indispensable guide for the search of acoustic truth" (Yunte Huang, author of *Charlie Chan*). Garrett Hongo's passion for audio dates back to the Empire 398 turntable his father paired with a Dynakit tube amplifier in their modest tract home in Los Angeles in the early 1960s. But his adult quest begins in the CD-changer era, as he seeks out speakers and amps both powerful and refined enough to honor the top notes of the greatest opera sopranos. In recounting this search, he describes a journey of identity where meaning, fulfillment, and even liberation were often most available to him through music and its astonishingly varied delivery systems. Hongo writes about the sound of surf being his first music as a kid in Hawai'i,

about doo-wop and soul reaching out to him while growing up among Black and Asian classmates in L.A., about Rilke and Joni Mitchell as the twin poets of his adolescence, and about feeling the pulse of John Coltrane's jazz and the rhythmic chords of Billy Joel's piano from his car radio while driving the freeways as a young man trying to become a poet. Journeying further, he visits devoted collectors of decades-old audio gear as well as designers of the latest tube equipment, listens to sublime arias performed at La Scala, hears a ghostly lute at the grave of English Romantic poet John Keats in Rome, drinks in wisdom from blues musicians and a diversity of poetic elders while turning his ear toward the memory-rich strains of the music that has shaped him: Hawaiian steel guitar and canefield songs; Bach and the Band; Mingus, Puccini, and Duke Ellington. And in the decades-long process of perfecting his stereo setup, Hongo also discovers his own now-celebrated poetic voice.

The Inventor of Stereo Robert Alexander, 2013-04-11 This book is the definitive study of the life and works of one of Britain's most important inventors who, due to a cruel set of circumstances, has all but been overlooked by history. Alan Dower Blumlein led an extraordinary life in which his inventive output rate easily surpassed that of Edison, but whose early death during the darkest days of World War Two led to a shroud of secrecy which has covered his life and achievements ever since. His 1931 Patent for a Binaural Recording system was so revolutionary that most of his contemporaries regarded it as more than 20 years ahead of its time. Even years after his death, the full magnitude of its detail had not been fully utilized. Among his 128 Patents are the principle electronic circuits critical to the development of the world's first electronic television system. During his short working life, Blumlein produced patent after patent breaking entirely new ground in electronic and audio engineering. During the Second World War, Alan Blumlein was deeply engaged in the very secret work of radar development and contributed enormously to the system eventually to become 'H2S'- blind bombing radar. Tragically, during an experimental H2S flight in June 1942, the Halifax bomber in which Blumlein and several colleagues were flying, crashed and all aboard were killed. He was just days short of his 39th birthday. For many years there have been rumours about a biography of Alan Blumlein, yet none has been forthcoming. This is the world's first study of a man whose achievements should rank among those of the greatest Britain has produced. This book provides detailed knowledge of every one of his patents and the process behind them, while giving an in depth study of the life and times of this quite extraordinary man.

Personal Stereo Rebecca Tuhus-Dubrow, 2017-09-07 Rebecca Tuhus-Dubrow investigates the Walkman's influence on public space, our relationship to electronic personal devices, and the fears and exhilaration induced by new technologies (as well as the nostalgia attached to old ones).

**Destiny's Stereo** R. Antonio Matta, 2014-08-07 Destiny's Stereo is a unique, literary blend of poetry and narrative writing telling the story of a man's struggle with a debilitating, mental illness, Schizoaffective Disorder. With delusions, hallucinations and paranoia of a schizophrenic and erratic mood shifts, as if swinging on the emotional pendulum of Bipolar, Sapieus Holmes fights to maintain

healthy relationships with those closest to him. He desperately tries to return to earlier states of sanity and spirituality-when love was all he needed, all he knew and all he had to keep him from living with a false sense of reality.

*Active Computer Vision by Cooperative Focus and Stereo* Eric P. Krotkov,2012-12-06 This book addresses an area of perception engineering which deals with constructive processes. A model of the environment is analyzed using the information acquired from multiple viewpoints of multiple disparate sensors at multiple time instants. Although the role of successive model building and active exploration of the environment, as is discussed in this book, is of great importance, only a few researchers of machine perception have thus far addressed the problem in these directions. Krotkov's book, which is a modification and continuation of his highly successful dissertation, focuses on active exploratory sensing in the context of spatial layout perception. He uses stereo and focus to obtain distance By information, and to eventually develop cooperative combining techniques. means of a stereo system with verging cameras, it is demonstrated that the distance measurements can be significantly improved by combining two sources. In addition, the problem of merging information from the multiple views is discussed in detail. As the field of perception engineering seems to be of growing scientific and applied importance, both practitioners and researchers in machine perception will find this book a valuable addition to their libraries. RameshJain Series Editor Acknowledgements I would like to thank Professor Ruzena Bajcsy for her constant encouragement and guidance during the five years of research leading to the dissertation upon which this book is based. Without her help in all matters, this work would never have been possible.

*Cape Ann in Stereo Views* Carolyn Thompson,Jim Thompson,2000 The years that followed the bloody Great War, which divided the nation, up through the start of the twentieth century were a remarkable era of growth and prosperity for the towns and villages of Cape Ann. Swift-sailing schooners manned by hardy and able seamen from the fisheries of Gloucester ranged far out into the Atlantic. Millions of tons of granite laboriously cut from the bountiful quarries of Rockport were shipped to ports near and far. Essex shipyards, fueled by the demands of the Gloucester fisheries and the Rockport granite industries, turned out new and larger ships in even greater numbers. Tourism became a major industry, as dozens of the famous and grand North shore hotels were erected along the shores of Gloucester, Rockport, Magnolia, and Manchester-by-the-Sea. Coincidentally, the years from 1865 to the early twentieth century were a time when stereo photography and stereoscopic images, especially stereoview cards, enjoyed immense popularity. Cape Ann was fortunate to have several outstanding stereo photographers and publishers during this grand era, and they produced many excellent views of the Cape's natural wonders, its commercial activities, and the life and times of its industrious townspeople.

3D Dynamic Scene Analysis Zhengyou Zhang, Olivier Faugeras, 2012-12-06 The problem of analyzing sequences of images to extract three-dimensional motion and structure has been at the heart of the research in computer vision for many years. It is very important since its success or failure will determine whether or not vision can be used as a sensory process in reactive systems. The considerable research interest in this field has been motivated at least by the following two points: 1. The redundancy of information contained in time-varying images can overcome several difficulties encountered in interpreting a single image. 2. There are a lot of important applications including automatic vehicle driving, traffic control, aerial surveillance, medical inspection and global model construction. However, there are many new problems which should be solved: how to efficiently process the abundant information contained in time-varying images, how to model the change between images, how to model the uncertainty inherently associated with the imaging system and how to solve inverse problems which are generally ill-posed. There are of course many possibilities for attacking these problems and many more remain to be explored. We discuss a few of them in this book based on work carried out during the last five years in the Computer Vision and Robotics Group at INRIA (Institut National de Recherche en Informatique et en Automatique).

**Stereo Photo Guide for Estimating Canopy Fuel Characteristics in Conifer Stands** Joe H. Scott, 2005 Stereo photographs, hemispherical photographs, and stand data are presented with associated biomass and canopy fuel characteristics for five Interior West conifer stands. Canopy bulk density, canopy base height, canopy biomass by component, available canopy fuel load, and vertical distribution of canopy fuel are presented for each plot at several stages of sampling, each corresponding to a level of simulated low thinning (100, 75, 50, and 25 percent of the initial basal area). This guide will help fuel managers estimate canopy fuel characteristics in similar forest conditions.
