Professional studio design is a specialized science, with more than a touch of black magic thrown in. Over the past few years, Sound on Sound magazine has made one trip each month to a reader's studio. These visits have demonstrated that it is fairly simple to make a huge improvement to an untreated project-studio room, without spending a fortune. However, they've also proven that beginners' attempts at DIY acoustic treatments often

cause more problems than they solve. Utilizing knowledge from dozens of visits to readers' home and project studios, the SOS team imparts easy-to-understand, organized troubleshooting advice. Learn how to rid yourself of monitoring problems and get an accurate monitoring system, how to enhance the sound of your recording space, and how to perfect your instrumental and vocal recordings. Decrease the time you spend re-recording and mixing, simply by improving your room with advice from the guys who have seen it all when it comes to make-do small studios. Contains: A structured look at the problems that most often plague small studios, with individual studio case studies addressing each issue Real solutions that you can both afford and implement; no thousand-dollar investments or idealized studio designs that don't work with your space! Case studies that look at small studios' specific problems, with additional break-outs tips that address quick fixes to common problems

Inside the Painter's Studio Joe Fig,2012-06-19 Inside an art gallery, it is easy to forget that the paintings there are the end products of a process involving not only creative inspiration, but also plenty of physical and logistical details. It is these cruder, more mundane aspects of a painter's daily routine that motivated Brooklyn artist Joe Fig to embark almost ten years ago on a highly unorthodox, multilayered exploration of the working life of the professional artist. Determined to ground his research in the physical world, Fig began constructing a series of diorama-like miniature reproductions of the studios of modern art's most legendary painters, such as Jackson Pollock and Willem de Kooning. A desire for firsthand references led Fig to approach contemporary artists for

access to their studios. Armed with a camera and a self-made Artist's Questionnaire, Fig began a journey through the workspaces of some of today's most exciting contemporary artists.

Shoebox Studio Stéphane Coutelle, Camille Saint-Jacques, 2012 *Shoebox Studio* records a moment in a fashion model's career that is rarely seen by a wider public: the model's first getting-acquainted photoshoot, in which no attempt is made to beautify or exaggerate her face, pose or expression. Having produced photo campaigns for some of the world's premier beauty clients (Lancôme, L'Oréal, Revlon), French photographer and painter Stéphane Coutelle is ideally placed to make these portraits of vulnerability and aspiration: his *Shoebox Studio* sees an unending parade of young women, newly arrived from all over the world and pursuing their first career. His first meeting with a model aims to establish their character and psychology, before professional reflexes take hold, and before complicity is established between photographer and model. *Shoebox Studio* gathers portraits of aspiring models taken between 2006 and 2010.

In the Studio Todd Hignite, 2007-09-21 Nine critically acclaimed cartoonists and graphic novelists invite us into their studios to discuss their art and inspirations These studio visits with some of today's most popular and innovative comic artists present an unparalleled look at the cutting edge of the comic medium. The artists, some of whom rarely grant interviews, offer insights into the creative process, their influences and personal sources of inspiration, and the history of comics. The interviews amount to private gallery tours, with the artists commenting, now thoughtfully, now passionately, on their own work as well as the works of others. The book is generously illustrated with full-color reproductions of the artists' works, including some that have been published and

others not originally intended for publication, such as sketchbooks and personal projects. Additional illustrations show behind-the-scenes working processes of the cartoonists and particular works by others that have influenced or inspired them. Through the eyes of these artists, we see with a new clarity the achievement of contemporary cartoonists and the extraordinary possibilities of comic art.

Cézanne in the Studio Carol Armstrong, 2004-11-01 In the last years of his life Paul Cézanne produced a stunning series of watercolors, many of them still lifes. Still Life with Blue Pot is one of these late masterpieces that is now in the collection of the Getty Museum. In *Cézanne in the Studio: Still Life in Watercolors*, Carol Armstrong places this great painting within the context of Cézanne's artistic and psychological development and of the history of the genre of still life in France. Still life—like the medium of watercolor—was traditionally considered to be “low” in the hierarchy of French academic paintings. Cézanne chose to ignore this hierarchy, creating monumental still-life watercolors that contained echoes of grand landscapes and even historical paintings in the manner of Poussin—the “highest” of classical art forms. In so doing he changed his still lifes with new meanings, both in terms of his own notoriously difficult personality and in the way he used the genre to explore the very process of looking at, and creating, art. Carol Armstrong's study is a fascinating exploration of the brilliant watercolor paintings that brought Cézanne's career to a complex, and triumphant, conclusion. The book includes new photographic studies of the Getty's painting that allow the reader to encounter this great watercolor as never before, in all of its richness and detail.

Studio Studies Ignacio Farías, Alex Wilkie, 2015-10-14 Consider the vast array of things around you, from the building you are in, the lights illuminating the interior, the computational devices mediating your life, the music in the background, even the crockery, furniture and glassware you are in the presence of. Common to all these objects is that their concrete, visual and technological forms were invariably conceived, modelled, finished and tested in sites characterised as studios. Remarkably, the studio remains a peculiar lacuna in our understanding of how cultural artefacts are brought into being and how 'creativity' operates as a located practice. Studio Studies is an agenda setting volume that presents a set of empirical case studies that explore and examine the studio as a key setting for aesthetic and material production. As such, Studio Studies responds to three contemporary concerns in social and cultural thought: first, how to account for the

situated nature of creative and cultural production; second, the challenge of reimagining creativity as a socio-materially distributed practice rather than the cognitive privilege of the individual; and finally, to unravel the parallels, contrasts and interconnections between studios and other sites of cultural-aesthetic and technoscientific production, notably laboratories. By enquiring into the operations, topologies and displacements that shape and format studios, this volume aims to demarcate a novel and important object of analysis for empirical social and cultural research as well to develop new conceptual repertoires to unpack the multiple ways studio processes shape our everyday lives.
