Reading Tourism Texts Sabrina Francesconi, 2014-02-24 This volume explores the relationship between tourism and travel texts and contemporary society, and how each is shaped by the other. A multimodal analysis is used to consider a variety of texts including novels, brochures, blogs, websites, radio commercials, videos, postcards and authentic tourist pictures and their meaning-making dynamics within the tourism discourse. The book looks at the ways in which these different texts have influenced how tourists and travellers have been viewed over time and how we envision ourselves as tourists or travellers. It puts forward multimodal analysis as the best framework for exploring the semiotic potential of these texts. Including examples from the UK, Malta, Canada, New Zealand, India, Jamaica and South Africa, this volume will be useful for researchers and students in tourism studies, communication and media studies and applied linguistics.

Validated Designs for Object-oriented Systems John Fitzgerald, 2005-02-03 This book provides an introduction to practical formal modelling techniques in the context of object-oriented system design. It is aimed at both practising software engineers with some prior experience of object-oriented design/programming and at intermediate or advanced students studying object-oriented design or modelling in a short course. The following features make this book particularly attractive to potential instructors: \$ The relationship with UML and object-oriented programming makes it easy to integrate with the mainstream computing curriculum. Although the book is about formal methods, it does not have to be treated as a specialist topic. \$ The use of tools and an accessible modelling language improves student

motivation. \$ The industry-based examples and case studies add to the credibility of the approach. \$ The light touch approach means that the material appeals to students with a wider range of abilities than is the case in a conventional formal methods text. \$ Support materials as listed above.

Measuring Up Christopher Thomas,Milton Ospina,2004 Publisher Description

Microaggressions and Philosophy Lauren Freeman,Jeanine Weekes Schroer,2020-04-03 This is the first book to offer a philosophical engagement with microaggressions. It aims to provide an intersectional analysis of microaggressions that cuts across multiple dimensions of oppression and marginalization, and to engage a variety of perspectives that have been sidelined within the discipline of philosophy. The volume gathers a diverse group of contributors: philosophers of color, philosophers with disabilities, philosophers of various nationalities and ethnicities, and philosophers of several gender identities. Their unique frames of analysis articulate both how the concept of microaggressions can be used to clarify and sharpen our understanding of subtler aspects of oppression and how analysis, expansion, and reconceiving the notion of a microaggression can deepen and extend its explanatory power. The essays in the volume seek to defend microaggressions from common critiques and to explain their impact beyond the context of college students. Some of the guiding questions that this volume explores include, but are not limited to, the following: Can microaggressions be established as a viable scientific concept? What roles do microaggressions play in other oppressive phenomena like transphobia, fat phobia, and ableism? How can epistemological challenges around microaggressions be addressed via feminist theory, critical race theory, disability theory, or epistemologies of ignorance? What insights can be gleaned from intersectional analyses of microaggressions? Are there domain-specific analyses of microaggressions that would give insight to features of that domain, i.e. microaggressions related to sexuality, athletics, immigration status, national origin, body type, or ability. Microaggressions and Philosophy features cutting-edge research on an important topic that will appeal to a wide range of students and scholars across disciplines. It includes perspectives from philosophy of psychology, empirically informed philosophy, feminist philosophy, critical race theory, disability theory, philosophy of language, philosophy of science, and social and political philosophy.
