Food is Better Medicine than Drugs Patrick Holford,Jerome Burne,2011-02-17 **FOOD IS BETTER MEDICINE THAN DRUGS** is an important and potentially controversial book from top nutritionist Patrick Holford and leading health journalist Jerome Burne. Brilliantly researched and based on solid scientific trials and illuminating case histories, *Food is Better Medicine than Drugs* will revolutionise the way you think about your health and put you back in charge. The authors reveal how modern medicine has become distorted and is now, for reasons largely to do with profit and power, heavily dependent on prescription drugs. They look at common health problems (pain/arthritis, heart, depression, diabetes, memory, hormones, digestion, breathing, infections etc) and compare the effectiveness of nutrition-based approaches with today's potentially harmful commonly used medicines.

Image and Representation Nick Lacey,2018-03-17 *Image and Representation* is a clear and straight-talking introduction to two of the most important concepts in film and media studies. Exploring media language and representation throughout a variety of visual texts, the book offers a balanced, in-depth guide to the essential theories and key issues. The book begins by introducing the basic components of image analysis, including mise en scene, framing and anchorage. It then elaborates on these key ideas to provide the reader with a more advanced understanding of media language and representation. From the contribution of semiotics and debates around authorial intent, to ideas about hegemony and issues around propaganda, Nick Lacey offers approachable explanations of complex ideas and terms. The new edition is also now updated to reflect recent changes in the field, with particular attention paid to new media technologies. Each chapter is packed with memorable examples from a wider range of media and provides greater global perspective on today's media landscape. Gradually building up the reader's knowledge to encourage independent thinking, this is an essential resource for students taking courses in media, cultural, communication and film studies at school, college or university.

A Scanner Darkly Philip K. Dick,1977 Bob Arctor is a dealer of the lethally addictive drug

Substance D. Fred is the police agent assigned to tail and eventually bust him. To do so, Fred takes on the identity of a drug dealer named Bob Arctor. And since Substance D--which Arctor takes in massive doses--gradually splits the user's brain into two distinct, combative entities, Fred doesn't realize he is narking on himself. Caustically funny, eerily accurate in its depiction of junkies, scam artists, and the walking brain-dead, Philip K. Dick's industrial-grade stress test of identity is as unnerving as it is enthralling.

The Gospel according to Science Fiction Gabriel McKee,2007-01-02 In this thorough and engaging book, Gabriel McKee explores the inherent theological nature of science fiction, using illustrations from television shows, literature, and films. Science fiction, he believes, helps us understand not only who we are but who we will become. McKee organizes his chapters around theological themes, using illustrations from authors such as Isaac Asimov and H. G. Wells, television shows such as Star Trek and The Twilight Zone, and films such as The Matrix and Star Wars. With its extensive bibliography

and index, this is a book that all serious science fiction fans--not just those with a theological interest--will appreciate.

The Barbed Coil J. V. Jones, 2000-12-15 Tessa McCamfrey, young and rootless resident of Southern California, has never found much in life that interests her. All of that changes when she stumbles upon a ring that transports her to a distant time and place. There she discovers her unexpected talent: She can create luminous, magical illustrations that have the power to influence others' lives. She becomes involved in the fate of kingdoms when her power is brought to bear against an evil king whose mind has been taken over by a golden crown called the Barbed Coil. As in *The Book of Words* trilogy, J. V. (Julie) Jones imbues every one of her characters with personality, from the dashing mercenary Ravis, who becomes Tessa's protector in this strange new world, to the sailors, innkeepers, soldiers, and others who populate her lush, involving story.

Frank takes his revenge in the most ghastly ways imaginable - but there will be a terrible price to pay once his work is done. Destined to be a cult classic, this tale of corporate horror and demonic retribution will strike a chord with anyone who has ever been disgruntled at work.

Explorer , 2021-01-28 The year is 2065. The end of Earth and all its habitants is imminent. Using the world's greatest technologies, a new generation of highly advanced, autonomous robotic vehicles is developed to explore new lands for human colonization. Inspired by legendary futurists such as Syd Mead (*Blade Runner*), German industrial designer and concept artist Christian Grajewski used his expert knowledge of automotive design and his fascination with animal anatomy to create fifteen stunning, interplanetary vehicles. Each varies in size and technological capabilities, yet they are unified by one overarching goal: to preserve the human race. From the stealth rotorcraft *Hornet* to the massive space transporter *Orca*, the designs of *Explorer* were fueled by Grajewski's deep desire to launch vehicles beyond Earth's solar system. He drew from his professional experience working on the design team at Volkswagen Design Center Potsdam, where he developed concepts for such carmakers as Lamborghini, Audi, and Porsche. *Explorer* compiles Grajewski's early sketches, wondrous renderings, and design reflections that together make a case for historic multinational cooperation and the incredible innovations such collaborations can achieve.

The Chronoliths Robert Charles Wilson, 2014-05-06 Scott Warden is a man haunted by the past--and soon to be haunted by the future. In early-twenty-first-century Thailand, Scott is an expatriate slacker. Then, one day, he inadvertently witnesses an impossible event: the violent appearance of a 200-foot stone pillar in the forested interior. Its arrival collapses trees for a quarter mile around its base, freezing ice out of the air and emitting a burst of ionizing radiation. It appears to be composed of an exotic form of matter. And the inscription chiseled into it commemorates a military victory--sixteen years in the future. Shortly afterwards, another, larger pillar arrives in the center of Bangkok--obliterating the city and killing thousands. Over the next several years, human society is transformed by these mysterious arrivals from, seemingly, our own near future. Who is the warlord Kuin whose victories they note? Scott wants only to rebuild his life. But some strange loop of causality keeps drawing him in, to the central mystery and a final battle with the future. *The Chronoliths* by Robert Charles Wilson is a 2002 Hugo Award Nominee for Best Novel and the winner of the 2002 John W. Campbell Memorial Award. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Eifelheim Michael Flynn, 2006-10-17 The alien world of medieval Europe lives again, transformed by the physics of the future, by a winner of the Heinlein Award. Over the centuries, one small town in Germany has disappeared and never been resettled. Tom, a historian, and his theoretical physicist girlfriend Sharon, become interested. By all logic, the town should have survived. What's so special about Eifelheim? Father Dietrich is the village priest of Eifelheim, in the year 1348, when the Black Death is gathering strength but is still not nearby. Dietrich is an educated man, and to his astonishment becomes the first contact person between humanity and an alien race from a distant star, when their ship crashes in the nearby forest. It is a time of wonders, in the shadow of the plague. Flynn gives us the full richness and strangeness of medieval life, as well as some terrific aliens. Tom and Sharon, and Father Deitrich have a strange destiny of tragedy and triumph in Eifelheim, the brilliant science fiction novel by Michael Flynn. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Icehenge Kim Stanley Robinson, 2014-01-07 An early novel from Science Fiction legend Kim Stanley Robinson, now available for the first time in decades: *Icehenge*. On the North Pole of Pluto there stands an enigma: a huge circle of standing blocks of ice, built on the pattern of Earth's Stonehenge--but ten times the size, standing alone at the farthest reaches of the Solar System. What is it? Who came there to build it? The secret lies, perhaps, in the chaotic decades of the Martian

Revolution, in the lost memories of those who have lived for centuries. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

There Will Come Soft Rains Ray Bradbury,1989-01-01

The Green Brain Frank Herbert,2002-09-16 In an overpopulated world seeking living room in the jungles, the International Ecological Organization was systematically exterminating the voracious insects which made these areas uninhabitable. Using deadly foamal bombs and newly developed vibration weapons, men like Joao Martinho and his co-workers fought to clear the green hell of the Mato Grosso. But somehow those areas which had been completely cleared were becoming reinfested, despite the impenetrable vibration barriers. And tales came out of the jungles . . . of insects mutated to incredible sizes . . . of creatures who seemed to be men, but whose eyes gleamed with the chitinous sheen of insects. . . . A fascinating examination of the fragile balance between consciousness, man and insect from one of the best-loved science fiction creators of all time. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Mission Of Gravity Hal Clement,2014-12-11 Mesklin is a vast, inhospitable, disc-shaped planet, so cold that its oceans are liquid methane and its snows are frozen ammonia. It is a world spinning dizzyingly, a world where gravity can be a crushing 700 times greater than Earth's, a world too hostile for human explorers. But the planet holds secrets of inestimable value, and an unmanned probe that has crashed close to one of its poles must be recovered. Only the Mesklinites, the small creatures so bizarrely adapted to their harsh environment, can help. And so Barlennan, the resourceful and courageous captain of the Mesklinite ship Bree, sets out on an heroic and appalling journey into the terrible unknown. For him and his people, the prize to be gained is as great as that for mankind... Hal Clement's MISSION OF GRAVITY is universally regarded as one of the most important and best loved novels in the genre. The remarkable and sympathetic depiction of an alien species and the plausible and scientifically based realisation of the strange world they inhabit make it a major landmark in the history of hard SF.

The World Inside Robert A. Silverberg,2004-09 Earth 2381: The hordes of humanity have withdrawn into isolated 1000-story Urbmons, comfortably controlled multicity-buildings which perpetuate an open culture of free sex and unrestricted population growth. Nearly all of Earth's 75 billion live in the hundreds of monolithic structures scattered across the globe, with the exception of the small agricultural communes that supply the Urbmons with food. When a restless Urbmon computer engineer begins to think unblessworthy thoughts of making a trip outside, he risks being labeled a

flippo, for whom there is only one punishment.
