Handbook of Automated Scoring Duanli Yan,André A. Rupp,Peter W. Foltz,2020-02-26 Automated scoring engines […] require a careful balancing of the contributions of technology, NLP, psychometrics, artificial intelligence, and the learning sciences. The present handbook is evidence that the theories, methodologies, and underlying technology that surround automated scoring have reached maturity, and that there is a growing acceptance of these technologies among experts and the public. From the Foreword by Alina von Davier, ACTNext Senior Vice President Handbook of Automated Scoring: Theory into Practice provides a scientifically grounded overview of the key research efforts required to move automated scoring systems into operational practice. It examines the field of automated scoring from the viewpoint of related scientific fields serving as its foundation, the latest developments of computational methodologies utilized in automated scoring, and several large-scale real-world applications of automated scoring for complex learning and assessment systems. The book is organized into three parts that cover (1) theoretical foundations, (2) operational methodologies, and (3) practical illustrations, each with a commentary. In addition, the handbook includes an introduction and synthesis chapter as well as a cross-chapter glossary.

Early Holistic Scoring of Writing Richard Haswell,Norbert Elliot,2019-11-01 What is the most fair and efficient way to assess the writing performance of students? Although the question gained importance during the US educational accountability movement of the 1980s and 1990s, the issue had preoccupied international language experts and evaluators long before. One answer to the question, the assessment method known as holistic scoring, is central to understanding writing in academic settings. Early Holistic Scoring of Writing addresses the history of holistic essay assessment in the United Kingdom and the United States from the mid-1930s to the mid-1980s—and newly conceptualizes holistic scoring by philosophically and reflectively reinterpreting the genre's origin, development, and significance. The book chronicles holistic scoring from its initial origin in the United Kingdom to the beginning of its heyday in the United States. Chapters cover little-known history, from the holistic scoring of school certificate examination essays written by Blitz evacuee children in Devon during WWII to teacher adaptations of holistic scoring in California schools during the 1970s. Chapters detail the complications, challenges, and successes of holistic scoring from British high-stakes admissions examinations to foundational pedagogical research by Bay Area Writing Project scholars. The book concludes with lessons learned, providing a guide for continued efforts to assess student writing through evidence models. Exploring the possibility of actionable history, Early Holistic Scoring of Writing reconceptualizes writing assessment. Here is a new history that retells the origins of our present body of knowledge in writing studies.

Automated Essay Scoring Beata Beigman Klebanov,Nitin Madnani,2021-11-12 This book discusses the state of the art of automated essay scoring, its challenges and its potential. One of the earliest applications of artificial intelligence to language data (along with machine translation and speech

recognition), automated essay scoring has evolved to become both a revenue-generating industry and a vast field of research, with many subfields and connections to other NLP tasks. In this book, we review the developments in this field against the backdrop of Elias Page's seminal 1966 paper titled The Imminence of Grading Essays by Computer. Part 1 establishes what automated essay scoring is about, why it exists, where the technology stands, and what are some of the main issues.In Part 2, the book presents guided exercises to illustrate how one would go about building and evaluating a simple automated scoring system, while Part 3 offers readers a survey of the literature on different types of scoring models, the aspects of essay quality studied in prior research, and the implementation and evaluation of a scoring engine. Part 4 offers a broader view of the field inclusive of some neighboring areas, and Part \ref{part5} closes with summary and discussion. This book grew out of a week-long course on automated evaluation of language production at the North American Summer School for Logic, Language, and Information (NASSLLI), attended by advanced undergraduates and early-stage graduate students from a variety of disciplines. Teachers of natural language processing, in particular, will find that the book offers a useful foundation for a supplemental module on automated scoring. Professionals and students in linguistics, applied linguistics, educational technology, and other related disciplines will also find the material here useful.

Scouting and Scoring Christopher Phillips,2021-03-30 An in-depth look at the intersection of judgment and statistics in baseball Scouting and scoring are considered fundamentally different ways of ascertaining value in baseball. Scouting seems to rely on experience and intuition, scoring on performance metrics and statistics. In Scouting and Scoring, Christopher Phillips rejects these simplistic divisions. He shows how both scouts and scorers rely on numbers, bureaucracy, trust, and human labor to make sound judgments about the value of baseball players. Tracing baseball's story from the nineteenth century to today, Phillips explains that the sport was one of the earliest fields to introduce numerical analysis, and new methods of data collection were supposed to enable teams to replace scouting with scoring. But that's not how things turned out. From the invention of official scorers and Statcast to the creation of the Major League Scouting Bureau, Scouting and Scoring reveals the inextricable connections between human expertise and data science, and offers an entirely fresh understanding of baseball.

Understanding Game Scoring Mack Enns,2021-11-21 Understanding Game Scoring explores the unique collaboration between gameplay and composition that defines musical scoring for video games. Using an array of case studies reaching back into the canon of classic video games, this book illuminates the musical flexibility, user interactivity and sound programming that make game scoring so different from traditional modes of composition. Mack Enns explores the collaboration between game scorers and players to produce the final score for a game, through case studies of the Nintendo Entertainment System sound hardware configuration, and game scores, including the canonic scores for Super Mario Bros. (1985) and The Legend of Zelda (1986). This book is recommended reading for students and researchers interested in the composition and production of video game scores, as well as those interested in ludo-musicology.

Advances in Computerized Scoring of Complex Item Formats Brian E. Clauser,2014-07-16 This special issue was motivated by the move from research to operations for computerized delivery and scoring of complex constructed response items. The four papers presented provide an overview of the state of the art for such applications. The issue begins by describing the range of computer delivered formats and computerized scoring systems that are currently in use. The remaining papers provide three views of validity in the context of computer delivered and scoring assessments. It is hoped that together, these articles will provide the reader with both an appreciation of the state of the art for computer-automated scoring systems, as well as a perspective on the issues that must be considered and the evidence that must be collected to produce automated scoring systems that allow for valid inference.

Readings in Credit Scoring L. C. Thomas,David B. Edelman,Jonathan N. Crook,2004 Credit scoring is one of the most successful applications of statistical and management science techniques in finance in the last forty years. This unique collection of recent papers, with comments by experts in the field, provides excellent coverage of recent developments, advances and sims in credit scoring. Aimed at statisticians, economists, operational researchers and mathematicians working in both industry and academia, and to all working on credit scoring and data mining, it is an invaluable source of reference.

Test Scoring David Thissen,Howard Wainer,2001-05 Test Scoring provides a summary of traditional true score test theory and modern item response theory related to scoring tests, as well as novel developments resulting from the integration of these approaches. The background material introduced in the first four chapters builds a foundation for the new developments covered in later chapters. These new methods offer alternative psychometric approaches to scoring complex assessments. Each of the book's contributors draws from the classic literature of traditional test theory, as well as psychometric developments of the past decade. The emphasis is on large-scale educational measurement but the topics and procedures may be applied broadly within many measurement contexts. Numerous graphs and illustrative examples based on real tests and actual data are integrated throughout. This multi-authored volume shows the reader how to combine the coded outcomes on individual test items into a numerical summary about the examinee's performance. This book is intended for researchers and students in education and other social sciences interested in educational assessment and policy, the design and development of tests, and the procedures for test administration and scoring. Prerequisites include an introduction to educational and psychological measurement and basic statistics. Knowledge of differential and integral calculus and matrix algebra is helpful but not required.

Scoring System Improvements to Three Leadership Predictors ,1998 This project sought to examine and improve the reliability of the scoring systems for three instruments which have been used in previous Army leadership research. Review of existing literature and interviews with project staff participating in prior research provided initial information concerning the strengths and weaknesses of the scoring systems for the three instruments. This information was used to recommend modifications to the original scoring systems. Six individuals were trained to use the modified scoring systems. The modified scoring systems were evaluated by rescoring responses randomly selected from the sample which had been scored according to the scoring systems originally developed for the leadership research program. Reliability estimates for the three modified scoring systems

were consistently strong and showed improvements over those obtained through the original scoring systems. Interrater agreement indices were significant for nearly all ratings. Validity estimates provided evidence that each modified instrument was moderately to highly correlated with conceptually similar scores generated through the original scoring scheme. The report recommends use of the revised rating systems in future research to improve the quality of measurement from the three predictors.--DTIC.

Tom Smith's Cricket Umpiring And Scoring Tom Smith,2012-04-05 Tom Smith first wrote his guide for umpires and scorers in 1980. Since then, his indispensable guide has gone through six fully-revised editions. The 'new' Tom Smith is the first to be fully redesigned and updated for the 21st century. Its publication coincides with international recognition that there should be one universal standard for the training of umpires whatever country they operate in. The 'new' Tom Smith incorporates the full 2000 Code of the Laws of Cricket with subsequent amendments as ratified by the MCC and international and national cricket bodies. The freshly drawn diagrams are easy to follow and will be of value not only to umpires and scorers, but to all lovers of the game of cricket. As Richie Benaud, the great Australian cricketer and commentator, has said, he never goes without his copy of 'Tom Smith'. Nor should any spectator who wishes to feel fully qualified in discussing the application of the Laws of Cricket to the game. David Lloyd says, 'Tom Smith is just as valuable a piece of kit as Hawkeye, Snicko and Hotspot in the Sky Sports commentary box, its interpretation of the Laws of the game is the first thing we turn to regarding decisions. it's a must-have alongside the Laws of cricket.'

Scoring the Rorschach Robert F. Bornstein,Joseph M. Masling,2005-03-23 Exner's Comprehensive System has attracted so much attention in recent years that many clinicians and personality researchers are unaware that alternative Rorschach scoring systems exist. This is unfortunate, because some of these systems have tremendous clinical value. Scoring the Rorschach: Seven Validated Systems provides detailed reviews of the best-validated alternative approaches, and points to promising new paths towards the continued growth and refinement of Rorschach interpretation. The editors set the stage with an extended introduction to historical controversies and cutting-edge empirical methods for Rorschach validation. Each chapter presents a different Rorschach scoring system. A brief history is followed by detailed information on scoring and interpretation, a comprehensive summary of evidence bearing on construct validity, and discussion of clinical applications, empirical limitations, and future directions. A user-friendly scoring manual for each system offers readers practical guidance. The systems tap a broad array of content areas including ego defenses, thought disorder, mental representations of self and others, implicit motives, personality traits, and potential for psychotherapy. All psychologists seriously engaged in the work of personality assessment will find in this book welcome additions to their professional toolkits.

GUIDE TO THE QUALITATIVE SCORING SYSTEM FOR THE MODIFIED VERSION OF THE BENDER-GESTALT TEST Gary G. Brannigan,Nancy A. Brunner,2002-01-01 With increased interest in predicting and ultimately preventing academic failure in children comes the need for effective preschool and primary school assessment. The first step in developing an effective assessment program is to select tests that will yield data needed for individual decision making. One factor that has been shown to contribute to the prediction of children's academic achievement is visual-motor-integration skill. The Qualitative Scoring System for the Modified Version of the Bender-Gestalt Test was developed in the 1980s to measure visual-motor-integration skill in preschool and early elementary school children. The assessment instrument utilizes six of the nine Bender-Gestalt Test designs, which are copied by the child. It may be administered in either individual or group format. The scoring system involves a six-point scale used to judge the overall quality of each design. Examiners will find the assessment instrument easy to administer, score, and interpret. Further, research has shown that the assessment instrument is a reliable and valid predictor of school achievement. This book will describe the development and refinement of the Qualitative Scoring System for the Modified Version of the Bender-Gestalt Test. In addition, it will provide detailed information and

guidelines for administering, scoring, and interpreting the test. Specifically, there are separate chapters on administration and scoring, standardization and norming, reliability and validity, and interpretation. In short, the book contains everything psychologists and educational specialists need to know to use the Qualitative Scoring System for the Modified Version of the Bender-Gestalt Test.
