*Screenshots* Paul Frosh, 2019-11-21 Je mehr die Welt der Sozialen Medien zu einem zweiten öffentlichen Raum wird, in dem vieles 'live' stattfindet, desto wichtiger wird es, nachträglich noch sehen zu können, was man verpasst hat. Dazu dienen Screenshots. Sie dokumentieren die oft flüchtigen Texte und Bilder und werden so zum Medium von Zeugenschaft und Erinnerung. Aber erfüllen sie damit nicht dieselben Funktionen, die lange Zeit der Fotografie zukam? Diese Frage steht im Zentrum von Paul Froshs Analyse des Screenshots, die damit zugleich zu einem inspirierenden Gang durch die Geschichte der Fototheorie wird.

*Cognitive Processing Routes in Consecutive Interpreting* Xiaodong Liu, 2021-09-13 This book addresses a controversial issue regarding SL-TL transfer in the translation process, namely the question as to the dominant route in English-Chinese and Chinese-English professional consecutive interpretations, respectively: the form-based processing route or meaning-based processing route. It presents a corpus-assisted product study, in which the interpreting processing patterns of culture-

specific items (CSIs) are analyzed. The study reveals that the dominant route in English vs. Chinese consecutive interpreting varies under different circumstances. Four factors are proposed to account for such differences: linguistic variables (e.g., grammatical complexity of the unit), type of CSI, language direction, and extra-linguistic variables (e.g., multilateral or bilateral settings). In summary, the book systematically introduces a corpus-assisted approach to translation process research, which will benefit all readers who are interested in translation process research but cannot employ neuroscientific measures.

**Search Engine Marketing for the Chinese Market** Anita Gerstmayr, 2014-06-03 Bachelor Thesis from the year 2013 in the subject Communications - Public Relations, Advertising, Marketing, Social Media, grade: 1, FH OÖ Standort Steyr, course: Marketing & E-Business, language: English, abstract: Globalization has brought new opportunities to developing countries, and within the last few decades, especially the People's Republic of China transformed itself from a developing nation behind the bamboo curtain to one of the most influential nations on the world market. China's online

population is growing very fast and counted already more than 560 million users in 2012, with a share of more than 70% of mobile Internet users. The Internet has become an indispensable tool for finding information quickly using a search engine. Therefore, for companies trading in China, their website will undoubtedly be vital in enhancing their public image and increasing sales volumes, and improving this website through search engine marketing (SEM) will be crucial to succeed. Due to huge cultural differences and governmental censorship of the Internet in mainland China, doing online business in this country is definitely different as in the Western world. To find out what is necessary for launching an international company website in China successfully, this paper describes and critically analyses the basic knowledge about China's online users and its online media world as well as search engines available in China and the challenges Chinese internet users face because of The Great Firewall. Aiming to provide key input for effective search engine marketing, this thesis combines theoretical background from various literary sources with the results of the author's online survey and interviews with four online marketing experts, who give an insight into their in-depth know-how of China's online marketing world and to provide advice on effective SEM for China's leading search engine Baidu. Clearly, as this paper shows, practising successful SEO depends on the combination of many different factors and actions. Writing original content, proper usage of keywords, incoming links from authoritative sites and other Baidu-sites are just some issues to be considered. Furthermore a Chinese ISP and content written in well-articulated "Simplified Chinese" are other keys to success. Doing SEA for Baidu is quite challenging, especially for foreigners, because it requires experience with SEA, cultural understanding and perfect knowledge of Chinese to find the right keywords and handle Baidu's SEA and Analytics tool. Nevertheless, understanding China's culture and language is an important factor achieving good online visibility in China.

How the Other Half Looks Sara Blair, 2018-06-05 How New York's Lower East Side inspired new ways of seeing America New York City's Lower East Side, long viewed as the space of what Jacob Riis notoriously called the other half, was also a crucible for experimentation in photography, film, literature, and visual technologies. This book takes an unprecedented look at the practices of observation that emerged from this critical site of encounter, showing how they have informed literary and everyday narratives of America, its citizens, and its possible futures. Taking readers from the mid-nineteenth century to the present, Sara Blair traces the career of the Lower East Side as a place where image-makers, writers, and social reformers tested new techniques for apprehending America—and their subjects looked back, confronting the means used to represent them. This dynamic shaped the birth of American photojournalism, the writings of Stephen Crane and Abraham Cahan, and the forms of early cinema. During the 1930s, the emptying ghetto opened contested views of the modern city, animating the work of such writers and photographers as Henry Roth, Walker Evans, and Ben Shahn. After World War II, the Lower East Side became a key resource for imagining poetic revolution, as in the work of Allen Ginsberg and LeRoi Jones, and exploring dystopian futures, from Cold War atomic strikes to the death of print culture and the threat of climate change. How the Other Half Looks reveals how the Lower East Side has inspired new ways of looking—and looking back—that have shaped literary and popular expression as well as American modernity.

**Screen Shots** Rebecca L. Stein,2021-06-01 In the last two decades, amid the global spread of smartphones, state killings of civilians have increasingly been captured on the cameras of both

bystanders and police. Screen Shots studies this phenomenon from the vantage point of the Israeli occupation of Palestinian territories. Here, cameras have proliferated as political tools in the hands of a broad range of actors and institutions, including Palestinian activists, Israeli soldiers, Jewish settlers, and human rights workers. All trained their lens on Israeli state violence, propelled by a shared dream: that advances in digital photography—closer, sharper, faster—would advance their respective political agendas. Most would be let down. Drawing on ethnographic work, Rebecca L. Stein chronicles Palestinian video-activists seeking justice, Israeli soldiers laboring to perfect the military's image, and Zionist conspiracy theorists accusing Palestinians of playing dead. Writing against techno-optimism, Stein investigates what camera dreams and disillusionment across these political divides reveal about the Israeli and Palestinian colonial present, and the shifting terms of power and struggle in the smartphone age.

**Shigeru Miyamoto** Jennifer deWinter, 2015-05-21 Video games are considered by many to be just entertainment--essentially void of skillful, artistic intervention. You may have never heard Shigeru Miyamoto's name, but you've probably spent many a lazy afternoon absorbed in his work. Joining Nintendo as a video game designer in the late 1970s, Miyamoto created the powerhouse franchises Super Mario Bros., The Legend of Zelda, and Donkey Kong--games so ubiquitous that Miyamoto was named one of TIME's 100 Most Influential People in 2007. Combining critical essays with interviews, bibliographies, and striking visuals, Shigeru Miyamoto unveils the artist behind thousands of glowing gaming screens, tracing out his design decisions, aesthetic preferences, and the material conditions that shaped his work. With this incredible (and incredibly unknown) figure, series editors Jennifer DeWinter and Carly Kocurek launch the Influential Video Game Designers series, at last giving these artists the recognition they deserve.
