This charming celebration of the sea shows children how extraordinary our oceans are and is a reminder that it is up to us to keep it that way. The Sea Book is the coolest educational ebook about the sea, covering a wealth of sea animals, including mammals, fish, invertebrates, and reptiles. It explores the underwater worlds of incredible marine life and their habitats. From up on the ice, down to colorful coral reefs, underwater forests, and right down to the deepest darkest depths where the weird and wonderful lurk - it's sure to delight any ocean obsessed child. Following on from The Bee Book, Charlotte Milner continues to highlight critical environmental issues faced by our planet. This time the focus is on our watery friends and the damaging effects humans are having on our seas. The perfect introduction to ocean conservation packaged in a way that won't leave children (or their parents for that matter) fearing for life on earth. Children will discover what they can do to help, and there are fantastic tips on how to live plastic-free as well. Kids will also get to craft their own recycled shopping bag too! Dive Into A Watery World What lies beneath the waves? Life can be found everywhere in the sea - from the sunlit ocean surface to the darkest depths. The sea is home to a variety of life, which makes it a fascinating, exciting, and significant place. There are more than 33 000 types of fish. Some fish can fly, some can dance, some are flat, and some are long. The sea has forests, ice, and exciting critters too. This adorable kid's ebook is the perfect meet-cute for kids and our beautiful oceans. Discover our oceans in a whole new way, learning about: - Why the sea is important - What lies beneath the waves - Life on the ice - Changing seas and plastic problems - How you can help and much, much more! This delightful book is one of three children's books on conservation for your little ones to enjoy. Try The Bat Book and The Bee Book next!

Paddle-to-the-Sea, 1941 A small canoe carved by an Indian boy makes a journey from Lake Superior all the way to the Atlantic Ocean.

At Sea Emma Fedor,2024-04-02 When Cara and Brendan first meet, she's fresh out of college with a degree in the fine arts, recovering from the recent death of her mother and spending time on Martha's Vineyard while trying to figure out her next steps. She's swept away by Brendan's humor and charm and intoxicated by his thrilling, dangerous secret. He claims -- no, he insists -- that he can breathe underwater. He shows Cara his gills. He dives beneath the waves and doesn't emerge for many minutes at a time. He offers her the most plausible of explanations: that he is a member of the United States Army Special Forces and has undergone top-secret experimental surgery. And Cara, struck by the force of his devotion, by his unstoppable charisma, and most of all, by the casual truth of his claim, believes him. Their summer romance quickly turns serious. And then Cara gets pregnant. She and Brendan move into a house he buys for them, and when their son, Micah, is born, she is sure their happy ending is underway. Still, she is forced to contend with Brendan's dramatic moods, and struggles to overlook his unexplained disappearances and the weight of his dangerous secrets. She knows it must be PTSD. The trauma of war. The desperate, tragic memories that scar all soldiers. Cara is determined to stay strong for her young family, to heal Brendan's psychic wounds, to keep him safe. Until he and baby Micah seemingly vanish into thin air -- or deep water. Five years later, Cara is still struggling to move forward, married to another man and trying to rebuild her life, when a local fisherman announces he's spotted a man and small child treading water in Nantucket Sound. The news rekindles Cara's never-abandoned hope that her child may still be alive. As she fights to untangle delusion from reality, and revisits a past she's worked hard to reconcile, she's determined to learn the truth about her lost love and finally find her son--

The Rising Sea Orrin H. Pilkey, Rob Young, 2010-04-16 On Shishmaref Island in Alaska, homes are being washed into the sea. In the South Pacific, small island nations face annihilation by encroaching waters. In coastal Louisiana, an area the size of a football field disappears every day. For these communities, sea level rise isn't a distant, abstract fear: it's happening now and it's threatening their way of life. In *The Rising Sea*, Orrin H. Pilkey and Rob Young warn that many other coastal areas may be close behind. Prominent scientists predict that the oceans may rise by as much as seven feet in the next hundred years. That means coastal cities will be forced to construct dikes and seawalls or to move buildings, roads, pipelines, and railroads to avert inundation and destruction. The question is no longer whether climate change is causing the oceans to swell, but by how much and how quickly. Pilkey and Young deftly guide readers through the science, explaining the facts and debunking the claims of industry-sponsored "skeptics." They also explore the consequences for fish, wildlife—and people. While rising seas are now inevitable, we are far from helpless. By making hard choices—including uprooting citizens, changing where and how we build, and developing a coordinated national response—we can save property, and ultimately lives. With unassailable research and practical insights, *The Rising Sea* is a critical first step in understanding the threat and keeping our heads above water.

Escape From Home (Beyond the Western Sea #1) Avi, 2012-03-01 Avi's suspense-filled, seafaring adventure gets a bold new package! It's 1851. Fifteen-year-old Maura O'Connell and her twelve-year-old brother Patrick are about to set sail on an epic voyage to America to flee the brutal poverty of Ireland and to be reunited with their father. Eleven-year-old Laurence Kinkle, the son of an English lord, runs away from home to escape his cruel older brother and start a new life in a new world. All three children face nothing but obstacles along the way—from stolen money to con men to hunger and fatigue. It seems that none of them will get out of the port city of Liverpool until fate brings them together. Avi's masterful plot-spinning skills create an adventure filled with unexpected twists and turns.

The Wine-Dark Sea (Vol. Book 16) (Aubrey/Maturin Novels) Patrick O'Brian, 2011-12-05 The sixteenth volume in the Aubrey/Maturin series, and Patrick O'Brian's first bestseller in the United States. At the outset of this adventure filled with disaster and delight, Jack Aubrey and Stephen Maturin pursue an American privateer through the Great South Sea. The strange color of the ocean reminds Stephen of Homer's famous description, and portends an underwater volcanic eruption that will create a new island overnight and leave an indelible impression on the reader's imagination. Their ship, the *Surprise*, is now also a privateer, the better to escape diplomatic complications from Stephen's mission, which is to ignite the revolutionary tinder of South America. Jack will survive a desperate open boat journey and come face to face with his illegitimate black son; Stephen, caught up in the aftermath of his failed coup, will flee for his life into the high, frozen wastes of the Andes; and Patrick O'Brian's brilliantly detailed narrative will reunite them at last in a breathtaking chase through stormy seas and icebergs south of Cape Horn, where the hunters suddenly become the hunted.

Sea Wife Amity Gaige, 2020-04-28 A New York Times Notable Book *Sea Wife* is a gripping tale of survival at sea—but that's just the beginning. Amity Gaige also manages, before she's done, to probe the underpinnings of romantic love, marriage, literary ambition, political inclinations in the Trump age, parenthood, and finally, the nature of survival itself in our broken world. Gaige is thrillingly talented, and her novel enchants. —Jennifer Egan "*Sea Wife* brilliantly breathes life not only into the perils of living at sea, but also into the fraught and hidden dangers of domesticity, motherhood, and marriage. What a smart, swift, and thrilling novel." —Lauren Groff From the highly acclaimed author of *Schroder*, a smart, sophisticated page literary page-turner about a young family who escape suburbia for a yearlong sailing trip

that upends all of their lives. Juliet is failing to juggle motherhood and her stalled-out dissertation on confessional poetry when her husband, Michael, informs her that he wants to leave his job and buy a sailboat. With their two kids—Sybil, age seven, and George, age two—Juliet and Michael set off for Panama, where their forty-four foot sailboat awaits them. The initial result is transformative; the marriage is given a gust of energy, Juliet emerges from her depression, and the children quickly embrace the joys of being feral children at sea. Despite the stresses of being novice sailors, the family learns to crew the boat together on the ever-changing sea. The vast horizons and isolated islands offer Juliet and Michael reprieve – until they are tested by the unforeseen. *Sea Wife* is told in gripping dual perspectives: Juliet's first person narration, after the journey, as she struggles to come to terms with the life-changing events that unfolded at sea, and Michael's captain's log, which provides a riveting, slow-motion account of these same inexorable events, a dialogue that reveals the fault lines created by personal history and political divisions. *Sea Wife* is a transporting novel about marriage, family and love in a time of unprecedented turmoil. It is unforgettable in its power and astonishingly perceptive in its portrayal of optimism, disillusionment, and survival.

Buried at Sea Paul Garrison, 2014-10-03 Jim Leighton is young, fit, and hungry for excitement—and his dream of adventure is coming true, now that he's been hired as a deckhand and personal trainer to a wealthy investment banker and setting sail for Rio de Janeiro aboard the luxury yacht *Hustle*. But Jim's enigmatic employer is not what he seems. With all his money, charm, and seafaring tales, Will Sparks is a man who's guarding a terrifying, potentially lethal secret. And in the middle of the Atlantic Ocean, Sparks makes a startling announcement: They are changing course for Africa because someone is pursuing them. Someone who wants them dead. With no previous sailing experience—far from the sanctuary of land and in the company of a stranger who is possibly delusional and certainly dangerous—Jim is suddenly trapped in a harrowing race for survival across the vast waters of the globe, fleeing a faceless threat that inexplicably knows where they are and where they are going. And when destiny places him alone at the helm, Jim's options are reduced to two: sail or die, because the terror relentlessly approaching at breakneck speed will not be shaken off or deterred—nor will it rest until *Hustle* and Jim Leighton both lie broken and lifeless on the ocean floor.

Sea Sick Alanna Mitchell, 2011-05-18 All life — whether on land or in the sea — depends on the oceans for two things: • Oxygen. Most of Earth's oxygen is produced by phytoplankton in the sea. These humble, one-celled organisms, rather than the spectacular rain forests, are the true lungs of the planet. • Climate control. Our climate is regulated by the ocean's currents, winds, and water-cycle activity. *Sea Sick* is the first book to examine the current state of the world's oceans — the great unexamined ecological crisis of the planet — and the fact that we are altering everything about them; temperature, salinity, acidity, ice cover, volume, circulation, and, of course, the life within them. Alanna Mitchell joins the crews of leading scientists in nine of the global ocean's hotspots to see firsthand what is really happening around the world. Whether it's the impact of coral reef bleaching, the puzzle of the oxygen-less dead zones such as the one in the Gulf of Mexico, or the shocking implications of the changing pH balance of the sea, Mitchell explains the science behind the story to create an engaging, accessible yet authoritative account.

Sea Around Us Rachel Carson, 1992-04 The story of the earth's ocean from its gray beginnings to today with emphasis on ocean life past and present.

The Extreme Life of the Sea Anthony R. Palumbi, Stephen R. Palumbi, 2021-10-26 A thrilling tour of the sea's most extreme species, coauthored by one of the world's leading marine scientists The ocean teems with life that thrives under difficult situations in unusual environments. *The Extreme Life of the Sea* takes readers to the absolute limits of the ocean world—the fastest and deepest, the hottest and oldest creatures of

the oceans. It dives into the icy Arctic and boiling hydrothermal vents—and exposes the eternal darkness of the deepest undersea trenches—to show how marine life thrives against the odds. This thrilling book brings to life the sea's most extreme species, and tells their stories as characters in the drama of the oceans. Coauthored by Stephen Palumbi, one of today's leading marine scientists, *The Extreme Life of the Sea* tells the unforgettable tales of some of the most marvelous life forms on Earth, and the challenges they overcome to survive. Modern science and a fluid narrative style give every reader a deep look at the lives of these species. *The Extreme Life of the Sea* shows you the world's oldest living species. It describes how flying fish strain to escape their predators, how predatory deep-sea fish use red searchlights only they can see to find and attack food, and how, at the end of her life, a mother octopus dedicates herself to raising her batch of young. This wide-ranging and highly accessible book also shows how ocean adaptations can inspire innovative commercial products—such as fan blades modeled on the flippers of humpback whales—and how future extremes created by human changes to the oceans might push some of these amazing species over the edge.

Pollution in the Black Sea Konstantin Pokazeev, Elena Sovga, Tatiana Chaplina, 2020-11-19 This book provides information on the causes, consequences, and possible solutions to modern environmental problems associated with ocean pollution with a particular focus on the Black Sea. The oceans are a vast but fragile complex. In recent decades, it has become especially manifest when ocean pollution has reached an unparalleled situation. Meanwhile, not only the well-being of ecosystems depends on the state of ocean waters, but human civilization largely depends on the oceans as a consequence of environmental dependence. This book examines the consequences of pollutants such as oil and hydrocarbon products (including plastics and microplastics), water acidification, sewage, wastewaters discharge into the ocean, thermal pollution, nuclear pollution, and biological pollution. Beyond the types of pollutants and their consequences, this book outlines the state of the art of the legal situation internationally regarding ocean pollution. The authors also show the current pollution of the inland seas, taking as an example of the Black Sea (anthropogenic and natural sources of pollution, its shelf, and shallow waters as well as international legislation). A part of the book analyzes the main types of environmental monitoring of the oceans and their role in solving ocean pollution problems with a particular interest in the Black Sea. The book is of interest to specialists in ocean pollution, ecologists, oceanologists, students, and graduate students studying oceanography, marine ecology, current methods of environmental monitoring, and legal problems related to the oceans and seas pollution, as well as to anyone interested in modern problems of the oceans.

Fatal Forecast Michael J. Tougias, 2007-07-17 A true story of catastrophe and survival at sea, *Fatal Forecast* is a spellbinding moment-by-moment account of seventy-two hours in the lives of eight young fishermen, some of whom would never set foot on dry land again. On the morning of November 21, 1980, two small Massachusetts lobster boats set out for Georges Bank, a bountiful but perilous fishing ground 130 miles off the coast of Cape Cod. The National Weather Service had forecast typical fall weather, and the young, rugged crewmen aboard the *Sea Fever* and the *Fair Wind* had made dozens of similar trips that season. They had no reason to expect that this trip would be any different. But the only weather buoy on Georges Bank was malfunctioning, and the National Weather Service had failed to share this fact with the fishermen who depended on its forecasts. As the two small boats headed out to sea, a colossal storm was brewing to the southeast, a furious maelstrom the National Weather Service did not accurately locate until the boats were already caught in the storm's grip, trapped in the treacherous waters of Georges Bank. Battered by sixty-foot waves and hurricane-force winds, the crews of the *Fair Wind* and the *Sea Fever* (captained by Peter Brown, whose father owned the *Andrea Gail* of *Perfect Storm* fame) struggled heroically to keep their vessels afloat. But the storm soon severely crippled one boat and overturned the other, trapping its crew inside. Meticulously researched and vividly told, *Fatal Forecast* is first and foremost a tale of miraculous survival. Most amazing is the story of Ernie Hazzard, who managed to crawl inside a tiny inflatable life raft and then spent more than fifty terrifying hours adrift on the stormy open sea. By turns tragic, thrilling, and inspiring, Ernie's story deserves a place among the greatest survival tales ever told. Equally riveting are the stories of the brave men and women from the Coast Guard and the crew of a nearby fishing boat who imperiled their own lives that day in order to save the lives of others. As gripping and harrowing as *The Perfect Storm* - but with a miracle ending - *Fatal Forecast* is an unforgettable true story about the collision of two spectacular forces: the brutality of nature and the human will to survive.

The Sea in the Greek Imagination Marie-Claire Beaulieu, 2016 In *The Sea in the Greek Imagination*, Marie-Claire Beaulieu unifies the multifarious representations of the sea and sea-crossing in Greek myth and imagery by positing the sea as a cosmological boundary between the worlds of the living, the dead, and the gods, or between reality and imagination.

Coves of Departure John Seibert Farnsworth, 2018-11-15 In a book that has been called a love song to nature, the author documents the latest decade of his explorations of the Baja peninsula and the Sea of Cortez. While much of the book narrates his experience as a writing professor taking undergraduates on sea kayak expeditions to the Isla Espiritu Santo archipelago each year during spring break, the book also reflects on experiences with a condor restoration project in the Sierra San Pedro Martir, and an altogether different teaching experience based in a field station on Bahia de los Angeles. While the author's intent is to evoke Baja ecologies in fresh ways, the reader comes to realize that he's also describing how education can become

a transformational experience. A retired scuba instructor who turned to academics and went on to receive his college's highest teaching award, Dr. Farnsworth believes that education should be a lifelong adventure, and that explorations of the natural world should be animated by reverence and delight.
