Roumyana Slabakova

The World in a Second Isabel Minhós Martins, 2015 A story inspired by the question, What are people doing right at this moment on the other side of the world? depicts natural and human events happening all over the world—from New York and Turkey to South Africa and Greece—at the same second.

A Tenth of a Second Jimena Canales, 2010-01-15 In the late fifteenth century, clocks acquired minute hands. A century later, second hands appeared. But it wasn't until the 1850s that instruments could recognize a tenth of a second, and, once they did, the impact on modern science and society was profound. Revealing the history behind this infinitesimal interval, *A Tenth of a Second* sheds new light on modernity and illuminates the work of important thinkers of the last two centuries. Tracing debates about the nature of time, causality, and free will, as well as the introduction of modern technologies—telegraphy, photography, cinematography—Jimena Canales locates the reverberations of this “perceptual moment” throughout culture. Once scientists associated the tenth of a second with the speed of thought, they developed reaction time experiments with lasting implications for experimental psychology, physiology, and optics. Astronomers and physicists struggled to control the profound consequences of results that were a tenth of a second off. And references to the interval were part of a general inquiry into time, consciousness, and sensory experience that involved rethinking the contributions of Descartes and Kant. Considering its impact on much longer time periods and featuring appearances by Henri Bergson, Walter Benjamin, and Albert Einstein, among others, *A Tenth of a Second* is ultimately an important contribution to history and a novel perspective on modernity.

Second Philosophy Penelope Maddy, 2007-04-19 Many philosophers these days consider

themselves naturalists, but it's doubtful any two of them intend the same position by the term. In this book, Penelope Maddy describes and practises a particularly austere form of naturalism called 'Second Philosophy'. Without a definitive criterion for what counts as 'science' and what doesn't, Second Philosophy can't be specified directly - 'trust only the methods of science!' or some such thing - so Maddy proceeds instead by illustrating the behaviours of an idealized inquirer she calls the 'Second Philosopher'. This Second Philosopher begins from perceptual common sense and progresses from there to systematic observation, active experimentation, theory formation and testing, working all the while to assess, correct and improve her methods as she goes. Second Philosophy is then the result of the Second Philosopher's investigations. Maddy delineates the Second Philosopher's approach by tracing her reactions to various familiar skeptical and transcendental views (Descartes, Kant, Carnap, late Putnam, van Fraassen), comparing her methods to those of other self-described naturalists (especially Quine), and examining a prominent contemporary debate (between disquotationalists and correspondence theorists in the theory of truth) to extract a properly second-philosophical line of thought. She then undertakes to practise Second Philosophy in her reflections on the ground of logical truth, the methodology, ontology and epistemology of mathematics, and the general prospects for metaphysics naturalized.

Second Language Acquisition Roumyana Slabakova, 2016 This textbook approaches second language acquisition from the perspective of generative linguistics. Roumyana Slabakova reviews and discusses paradigms and findings from the last thirty years of research in the field, focussing in particular on how the second or additional language is represented in the mind and how it is used in communication. The adoption and analysis of a specific model of acquisition, the Bottleneck Hypothesis, provides a unifying perspective. The book assumes some non-technical knowledge of linguistics, but important concepts are clearly introduced and defined throughout, making it a valuable resource not only for undergraduate and graduate students of linguistics, but also for researchers in cognitive science and language teachers.

Peer Interaction and Second Language Learning Masatoshi Sato, Susan Ballinger, 2016-03-10 This volume represents the first collection of empirical studies focusing on peer interaction for L2 learning. These studies aim to unveil the impact of mediating variables such as task type, mode of interaction, and social relationships on learners' interactional behaviors and language development in this unique and pedagogically powerful learning context. To examine these issues, contributors employed quantitative, qualitative, and mixed-methods designs as well as cognitive, social, and sociocognitive theoretical frameworks. The majority of the studies are classroom based and were conducted in a rich array of settings covering five continents and encompassing a wide range of learner L1s and target languages. These settings include second and foreign language classrooms from primary to university level, content-based programs, online contexts, and after-school programs.

To span the divide between research and practice, each study includes a section suggesting pedagogical implications.

The Second Bride Katharine Swartz, Kate Hewitt, 2017-02-17 Ellen Tyson is living the perfect village life in Goswell. But when her stepdaughter moves in, her fragile idyll is fractured. At seventeen, Annabelle is surly, withdrawn, and adamant that she isn't, and never will be, part of her father's second family. As Ellen battles with Annabelle, new tensions arise with her husband Alex, shattering the happiness she'd once so carelessly enjoyed. Then Ellen finds a death certificate from the 1870s hidden under the floorboards, and its few stark lines awaken a curiosity in her. Ellen tries to involve Annabelle in her search for answers. But as they dig deeper into the circumstances of Sarah

Mills' untimely death, truths both poignant and shocking come to light - about the present as well as the past. Interlacing the lives of Ellen Tyson and Sarah Mills, *The Second Bride* is a captivating and moving story about what it means to be a family, and the lengths we will go to for the people we love.

The Second Birth Tilo Schabert, 2015-11-20 Most scholars link the origin of politics to the formation of human societies, but in this innovative work, Tilo Schabert takes it even further back: to our very births. Drawing on mythical, philosophical, religious, and political thought from around the globe—including America, Europe, the Middle East, and China—*The Second Birth* proposes a transhistorical and transcultural theory of politics rooted in political cosmology. With impressive erudition, Schabert explores the physical fundamentals of political life, unveiling a profound new insight: our bodies actually teach us politics. Schabert traces different figurations of power inherent to our singular existence, things such as numbers, time, thought, and desire, showing how they render our lives political ones—and, thus, how politics exists in us individually, long before it plays a role in the establishment of societies and institutions. Through these figurations of power, Schabert argues, we learn how to institute our own government within the political forces that already surround us—to create our own world within the one into which we have been born. In a stunning vision of human agency, this book ultimately sketches a political cosmos in which we are all builders, in which we can be at once political and free.

Second Language Literacy Practices and Language Learning Outside the Classroom Miho

Inaba,2018-11-21 This book presents a comprehensive and detailed study of literacy practices and language use outside of the classroom by university students of Japanese. It investigates both tasks related to classes (e.g. homework and preparation for classes) and voluntary activities in the target language (e.g. watching TV and writing emails) and discusses how values, motivations and types of activities differ between the two contexts. It employs sociocultural perspectives to observe reading and writing activities within and under the influence of individual and social contexts, such as learner motives, peer networks and the language classroom, and contributes to the related research areas in the field of second language acquisition, such as motivation, autonomous language learning and language learning strategies. Crucially, the book not only documents out-of-class literacy activities, but also examines which teaching practices facilitate and promote such out-of-class language learning and use. It considers which literacy activities in the target language students undertake out-of-class, which factors encourage or discourage such out-of-class activity and how and with which tools they undertake these activities. As such the book provides guidance for classroom teaching and suggests that slight changes to teaching practices in the classroom may enhance autonomous learning outside the classroom.

An Introduction to Logic - Second Edition Richard T.W. Arthur, 2016-11-30 In lively and readable prose, Arthur presents a new approach to the study of logic, one that seeks to integrate methods of argument analysis developed in modern "informal logic" with natural deduction techniques. The dry bones of logic are given flesh by unusual attention to the history of the subject, from Pythagoras, the Stoics, and Indian Buddhist logic, through Lewis Carroll, Venn, and Boole, to Russell, Frege, and Monty Python. A previous edition of this book appeared under the title *Natural Deduction*. This new edition

adds clarifications of the notions of explanation, validity and formal validity, a more detailed discussion of derivation strategies, and another rule of inference, Reiteration.

Human Development and Faith (Second Edition) Felicity B. Kelcourse, 2015-07-28 This book, now in its second edition, brings together the best available understandings of human development from a multidisciplinary perspective. Uniquely inclusive of the moral and faith dimensions of context and life-cycle development, Human Development and Faith examines the interplay of mind, body, family, community, and soul at every stage of development. It addresses two central questions: What are the good-enough conditions of parenting, family, and community in each phase of life, from birth to death, that support growth and development? What gives life adequate meaning as development proceeds? If human development describes the normative and hoped-for passages of life, then faith provides the necessary component of meaning. Throughout the various perspectives offered in this volume is the premise that faith is that quality of living that makes it possible to fully live. The Journal of Pastoral Theology called the first edition of Human Development and Faith an excellent text for pastoral theology courses, because it fulfills its ambitious goal of bringing a holistic faith perspective to the usual topics of development. This second edition includes a new chapter on infancy, updates reflecting our growing awareness of cultural diversity, and a new preface.
