**Note to Self** Connor Franta,2017-04-18 In his New York Times bestselling memoir, *A Work in Progress*, Connor Franta shared his journey from small-town Midwestern boy to full-fledged Internet sensation. Exploring his past with humor and astounding insight, Connor reminded his fans of why they first fell in love with him on YouTube—and revealed to newcomers how he relates to his millions of dedicated followers. Now, two years later, Connor is ready to bring to light a side of himself he’s rarely shown on or off camera. In this diary-like look at his life since *A Work In Progress*, Connor talks about his battles with clinical depression, social anxiety, self-love, and acceptance; his desire to maintain an authentic self in a world that values shares and likes over true connections; his struggles with love and loss; and his renewed efforts to be in the moment—with others and himself. Told through short essays, letters to his past and future selves, poetry, and original photography, *Note to Self* is a raw, in-the-moment look at the fascinating interior life of a young creator turning inward in order to move forward.

**Self-Compassion** Dr. Kristin Neff,2011-04-19 Kristin Neff, Ph.D., says that it’s time to “stop beating yourself up and leave insecurity behind.” *Self-Compassion: Stop Beating Yourself Up and Leave Insecurity Behind* offers expert advice on how to limit self-criticism and offset its negative effects, enabling you to achieve your highest potential and a more contented, fulfilled life. More and more, psychologists are turning away from an emphasis on self-esteem and moving toward self-compassion in the treatment of their patients—and Dr. Neff’s extraordinary book offers exercises and action plans for dealing with every emotionally debilitating struggle, be it parenting, weight loss, or any of the numerous trials of everyday living.

**Self** Barry Dainton,2014-04-24 In the third in a new series of short, provoking books of original philosophy, acclaimed thinker Barry Dainton takes us through the nature of Self When you think 'What am I?', what's actually doing the thinking? Is it a soul, or some other kind of mental entity separate from your body, or are 'you' just a collection of nerve-endings and narratives? In the third in a new series of short, provoking books of original philosophy, acclaimed thinker Barry Dainton takes us through the nature of Self and its relation to the rest of reality. Starting his journey with Descartes' claim that we are non-physical beings (even if it seems otherwise), and Locke's view that a person is self-conscious matter (though not necessarily in human form), Dainton explores how today's rapid movement of people, and information affects our understanding of self. When technology re-configures our minds, will it remake us, or kill us? If teleportation becomes possible, would it be rational to use it? Could we achieve immortality by uploading ourselves into virtual worlds? Far-reaching and witty, *Self* is a spirited exploration of the idea that in a constantly-changing world, we and our bodies can go their separate ways.

**The Quantified Self** Deborah Lupton,2016-09-07 With the advent of digital devices and software, self-tracking practices have gained new adherents and have spread into a wide array of social domains. The Quantified Self movement has emerged to promote 'self-knowledge through numbers'. In this groundbreaking book Deborah Lupton critically analyses the social, cultural and political dimensions of contemporary self-tracking and identifies the concepts of selfhood and human embodiment and the value of the data that underpin them. The book incorporates discussion of the consolations and frustrations of self-tracking, as well as about the proliferating ways in which people's personal data are now used beyond their private rationales. Lupton outlines how the information that is generated through self-tracking is taken up and repurposed for commercial, governmental, managerial and research purposes. In the relationship between personal data practices and big data politics, the implications of self-tracking are becoming ever more crucial.

**Self Psychology and Diagnostic Assessment** Marshall L. Silverstein,1999 The self psychology of Heinz Kohut has been an important force in contemporary psychoanalytic thought and its ramifications for therapy have been extensively explored. Now, Marshall Silverstein offers the first analysis of the application of self psychology to projective diagnostic assessment. Differentiating the self psychological approach from an ego psychological interpretation of classical drive theory, he clearly outlines the principal contributions of Kohut, including the concepts of selfobject functions, empathy, transmuting internalization, and compensatory structure. Providing numerous clinical examples, he shows how the major selfobject functions of mirroring, idealization, and twinship can be identified on projective tests. Silverstein then demonstrates how conventional assessment approaches to grandiosity, self-esteem, and idealization can be reconceptualized within the framework of self psychology, and he also contrasts ego psychological interpretations with self psychological interpretations. This book makes a strong case for the importance of the clinical identification of self states. It will help practitioners understand their patients' varied attempts to repair an injury to the self to restore self-esteem (compensatory structure) and the clinical consequences of self-disorders, including disintegration products such as narcissistic rage and affect states characterized by empty depression, chronic boredom, and lack of zest.

**Self Matters** Phillip C. McGraw,2001-11-14 In *Self Matters*, Dr. Phillip C. McGraw helps you to demystify your self-concept, and learn how to reclaim your authentic self. What if there is a You that has never seen the light of day, has never got to say, Hey, what about me? What if there is a You that you have never even met and certainly never permitted to just be, without fear of judgment or condemnation? What if you live your life on the sidelines in constant fear of failing to please those who forever seem to stand in judgment of you and your life? What if you discovered that you had settled for what life has served up instead of what you really wanted and needed? What if you really think and feel things you have never allowed to come out, and certainly never acted on? What if your marriage is not at all what you really emotionally want and need, but you silently stay the course anyway, selling out your hope to be happy? What if you are allowing days to turn into weeks and weeks to turn into months and months to turn into years, all adding up to a lifetime of being what some nameless, faceless world has assigned you to be? If any of these What ifs are true, then it's time to step back and reevaluate your life. There's some good news and bad news. The bad news is you are making the choices that have put you in this life circumstance; the good news is you are making the choices that have put you in this life circumstance. Now is the time to make the biggest choice of your life. Through *Self Matters*, Dr. Phil will help you do just that.

**From Self to Self** Leo Hartong,2005-09-18 A compilation of expressions, questions and answers that came about in response to Leo's highly praised first book *Awakening to the Dream*. Leo writes with characteristic insight and uses metaphor to illuminate the paradoxical and apparently confusing nature of non-dual reality. His original writing is reinforced by a vast knowledge of non-duality in other spiritual traditions and he weaves these together with his own direct path to present clear pointers to contemporary seekers. An appropriately chosen quotation taken from various sources appears at the end of each short chapter. Also included at the end of the book is the full text of the Hsin-hsin Ming by the third Chan patriarch Seng-ts'an. “The words in this book repeatedly point to the essence which knows the reading as it takes place. Rather than an encouragement to follow a lengthy path, it is an invitation to step off the path. It does not point to 'your' awareness, but to Awareness itself in which the idea of 'you' appears. It does not point to 'your' beingness, but to the undeniable Beingness that appears as you.”

**Your Awesome Self** Ginsberg,2019-07

**Sources of the Self** Charles Taylor,1992-03-01 In this extensive inquiry into the sources of modern selfhood, Charles Taylor demonstrates just how rich and precious those resources are. The modern turn to subjectivity, with its attendant rejection of an objective order of reason, has led—it seems to many—to mere subjectivism at the mildest and to sheer nihilism at the worst. Many critics believe that the modern order has no moral backbone and has proved corrosive to all that might foster human good. Taylor rejects this view. He argues that, properly understood, our modern notion of the self provides a framework that more than compensates for the abandonment of substantive notions of rationality. The major insight of *Sources of the Self* is that modern subjectivity, in all its epistemological, aesthetic, and political ramifications, has its roots in ideas of human good. After first arguing that contemporary philosophers have ignored how self and good connect, the author defines the modern identity by describing its genesis. His effort to uncover and map our moral sources leads to novel interpretations of most of the figures and movements in the modern tradition. Taylor shows that the modern turn inward is not disastrous but is in fact the result of our long efforts to define

and reach the good. At the heart of this definition he finds what he calls the affirmation of ordinary life, a value which has decisively if not completely replaced an older conception of reason as connected to a hierarchy based on birth and wealth. In telling the story of a revolution whose proponents have been Augustine, Montaigne, Luther, and a host of others, Taylor's goal is in part to make sure we do not lose sight of their goal and endanger all that has been achieved. Sources of the Self provides a decisive defense of the modern order and a sharp rebuff to its critics.

The information, guidance, and resources offered make it a valuable tool for anyone whose life has been impacted by self-injury. Regardless of the form it takes, self-injury can leave lasting physical and emotional scars on both those who harm themselves and their friends and family. Part of Greenwood's Q&A Health Guides series, Self-Injury: Your Questions Answered provides clear, concise information for readers interested in or struggling with this often-misunderstood subject. *Self-Esteem and Beyond* Neil J. MacKinnon,2015-04-29 Self-esteem is a concept which everybody experiences but there is conceptual confusion between self-feelings and self-conceptions. This book addresses the issue by replicating past studies with analysis of original data and proposing a three-factor theory of self-sentiments consisting of self-esteem, self-efficacy and self activation.

**Wisdom of the Eternal Self** Sayyed Aamir Raza,2020-10-10 This book discusses the reality of human being by pointing out some of the very fundamental issues that remain hidden from the eyes of the modern and post-modern western thought. By elaborating Mulla Sadra's concept of Soul's origination from the body and its survival through the Spirit, this book explains how the human soul develops stage by stage in a gradual manner from a vegetative body in the womb. By using Mulla Sadra's principles of causality, this book shows how God and his Angels create man and other species on the Earth without denying Darwin's evolutionary theory. In this reference, the role of metaphysical worlds in actualizing human knowledge is also discussed. This book also shows how the human life is a journey back towards its origin i.e. towards God and how this journey would continue even after death. In this reference, this book also explains the principles on the basis of which human soul would continue its life in the post-humus world. This book also clarifies the benefits of focusing onto the self and how this focus may lead to the realization of the Eternal Self of God. In this way, it shows how it is not impossible to experience the post-humus conditions even before death. It also specifies what kind of lifestyle may possibly ensure the occurrence of such mystic experiences.

Genetic control of self-incompatibility and reproductive development in flowering plants Elizabeth G. Williams,A.E. Clarke,R.B. Knox,2013-03-09 Plant reproductive biology has undergone a revolution during the past five years, with the cloning, sequencing and localization of the genes important in reproduction. These advantages in plant molecular biology have led to exciting applications in plant biotechnology, including the genetic engineering of male sterility and other reproductive processes. This book presents an interesting and contemporary account of these new developments from the scientists in whose laboratories they have been made. The chapters focus on two areas: the molecular biology of self-incompatibility, which is the system of self-recognition controlled by the S-gene and related genes; and the cellular and molecular biology of pollen development and genetic dissection of male sterility. Some chapters feature Arabidopsis, with its unique genetic system. Reproduction is vital for seed production in crop plants, and this book presents new approaches to manipulate plant breeding systems for the 21st century.

*False Self* Linda Hopkins,2020-09-15 Winner of the 2007 Gradiva Award and the 2006 Goethe Award for Psychoanalytic Scholarship The definitive biography of one of the most engaging figures of British psychoanalysis.Both gifted analyst and generational bete noire, M. Masud R. Khan (1924–1989) exposed through his candor and scandalous behavior the bigotry of his proponents turned detractors. The son of a wealthy landowner in rural India (now Pakistan), Khan grew up in a world of privilege that was radically different from the Western lifestyle he would adopt after moving to London. Notorious for his flamboyant personality and, at first, widely acknowledged as a brilliant clinician, Khan was closely connected to some of the most creative and accomplished individuals of his time, including Donald Woods Winnicott, Anna Freud, Robert Stoller, Michael Redgrave, Julie Andrews, Rudolph Nureyev, and many more. Khan's subsequent downfall, which is powerfully narrated in this biography, offers interesting insights not only into Khan's psychic fragility but into the world of intrigues and deceptions pervasive in the psychoanalytic community of the time. In telling the story of this provocative man, Linda Hopkins makes use of unprecedented access to a complete copy of Khan's unpublished Work Books, which are quoted extensively. Additionally, she conducted innumerable interviews with Khan's peers, relatives, and analysts in order to provide an in-depth and balanced account of Masud Khan as a talented and deeply conflicted individual.

Where are you? Self- and body part localization using virtual reality setups Albert van der Veer ,2019-09-19 This volume presents a line of original experimental studies on the bodily self, investigating where people locate themselves in their bodies and how accurate they are at localizing their body parts. So far, it was not well known whether people locate themselves in one or more specific regions of their bodies. On the other hand, some systematic distortions in indicating bodily locations were already documented. In the present studies, participants were therefore asked to indicate their self-locations, as well as the locations of several of their body parts, using a self-directed, first-person perspective pointing paradigm in various virtual reality (VR) setups (different head-mounted displays and a large-screen immersive display). Overall, participants were found to locate themselves mainly in the (upper) face and the (upper) torso. However, striking differences in self-localization were found when testing in different VR setups. Upon further investigation, these differences were found to be foremost due to inaccuracies in body part localization. When taking these inaccuracies into account, differences between setups—and also with self-localization outside of VR—largely disappear. Another striking finding was that providing participants—in between pointing phases—with information about their bodies in the form of a real-time animated self-avatar, did not make them more accurate at locating their own body parts. While manipulating their viewpoint to chest-height of their self-avatar did shift the afterwards indicated locations of their own body parts upwards, towards where they were seen on the avatar.

Potential explanations for the various new findings, also from tasks outside of VR, are discussed. Taken together, this volume suggests a differential involvement of multi-sensory information processing in experienced self-location within the body and the ability to locate body parts. Self-localization seems to be less flexible, possibly because it is strongly grounded in the 'bodily senses', while body part localization appears more adaptable to the manipulation of sensory stimuli, at least in the visual modality.
