Sharing Cities 2020 Iris Wang,Hideaki Ninomiya,Benjamin Gussen,2020-11-26 This book provides valuable insights into how cities are innovating in the field of the sharing economy through case studies. Each chapter explains how different cities have employed the sharing economy to solve their sui generis problems. The concept of Sharing Cities is getting considerable traction with grassroots groups and city governments around the world. Starting with the earliest Sharing City, Seoul, under the efforts of different Sharing Economy Associations and Organizations, more and more cities are being transformed. This book aims to highlight the positive changes that the sharing economy brings to cities and will be a valuable reference to those working in this emerging field.

Sharing Democracy Michael L. Ferguson,2012-10-18 Democratic theorists frequently assume that the people must have something in common, or else democracy will fail. This produces an ironically anti-democratic tendency to emphasize the passive possession of commonality. Sharing Democracy counters this tendency with a radical vision of democracy grounded instead in the active exercise of political freedom.

Access and Benefit Sharing of Genetic Resources, Information and Traditional Knowledge Charles Lawson,Michelle Rourke,Fran Humphries,2022-10-14 Addressing the management of genetic resources, this book offers a new assessment of the contemporary Access and Benefit Sharing (ABS) regime. Debates about ABS have moved on. The initial focus on the legal obligations established by international agreements like the United Nations Convention on Biological Diversity and the form of

obligations for collecting physical biological materials have now shifted into a far more complex series of disputes and challenges about the ways ABS should be implemented and enforced. These now cover a wide range of issues, including: digital sequence information, the repatriation of resources, technology transfer, traditional knowledge and cultural expressions, open access to information and knowledge, naming conventions, farmers' rights, new schemes for accessing pandemic viruses sharing DNA sequences, and so on. Drawing together perspectives from an interdisciplinary range of leading and emerging international scholars, this book offers a new approach to the ABS landscape; as it breaks from the standard regulatory analyses in order to explore alternative solutions to the intractable issues for the Access and Benefit Sharing of genetic resources. Addressing these modern legal debates from a perspective that will appeal to both ABS scholars and those with broader legal concerns in the areas of intellectual property, food, governance, Indigenous issues, and so on, this book will be a useful resource for scholars and students as well as those in government and in international institutions working in relevant areas.

House Sharing and Young Adults Vicky Clark, Keith Tuffin, 2022-12-27 *House Sharing and Young Adults* offers unique insight into the dynamics of successful house sharing among young adults and questions some of the myths fostered by the negative stereotyping of housemates. Illustrated with research from interviews with young adults, it explores co-residence, interpersonal relationships and young people's development. Beginning with an overview of the concept and history of house sharing among young adults, Clark and Tuffin's volume also examines the reasons for the lack of research into the area up until recently. It explores key questions, including how young adults choose housemates, what makes a desirable housemate, avoiding complications, the psychological advantages of house sharing, how conflict arises, and the impact of house sharing on adult development. The authors challenge the stigma of shared domesticity, demonstrating the potential of house sharing to enhance well-being through companionship while acknowledging the potential pitfalls caused by tension in intimate settings. *House Sharing and Young Adults* will be essential reading for both undergraduate and postgraduate students of social psychology, developmental psychology, sociology and anthropology, as well as those interested in group dynamics, housing demographics and discrimination.

Sharing Research Data to Improve Public Health in Africa National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on

Population,2015-09-18 Sharing research data on public health issues can promote expanded scientific inquiry and has the potential to advance improvements in public health. Although sharing data is the norm in some research fields, sharing of data in public health is not as firmly established. In March 2015, the National Research Council organized an international conference in Stellenbosch, South Africa, to explore the benefits of and barriers to sharing research data within the African context. The workshop brought together public health researchers and epidemiologists primarily from the African continent, along with selected international experts, to talk about the benefits and challenges of sharing data to improve public health, and to discuss potential actions to guide future work related to public health research data sharing. Sharing Research Data to Improve Public Health in Africa summarizes the presentations and discussions from this workshop.

Safety and Security in Hotels and Home Sharing Chelsea A. Binns,Robin J. Kempf,2020-11-09

This brief comparatively reviews the security and safety features of hotels and home sharing services. It reviews crime data, laws, and applicable theories – such as defensible space, rational choice, and routine activity theories - to determine how responsibility for crime control and accident prevention in these industries is allotted. This analysis identifies key policy questions about the role of the home sharing hosts and guests in ensuring their own safety and security, which will be of interest to policy makers, researchers and practitioners in criminal justice and law enforcement, as well as those involved in the home sharing and hotel industries.

A Cloud Computing Framework For Sharing Of Cloud Resources And Attacks Information

Amongst Cloud Networks Abdul Waqas,Zulkefli Mohammed Yusof,Asadullah Shah,2017-03-13 Cloud computing has emerged as a new paradigm for hosting and delivering computing resources over the Internet. This research proposed a cross-cloud communication framework (C3F) for enabling

communication among clouds with minimal management burden. Further, it enabled the borrowing and lending of resources among clouds whenever required to fulfil the client requests. It also facilitated to share the information of attacks and intruding entities to cater with same attacks on different clouds. The framework was deployed using web-based prototype development to test and validate the cross-cloud communication. The prototype was developed using open source technologies. Moreover, algorithms were developed using low level description technique for the processes of resource borrowing and lending and, sharing of attacks information. The algorithms were analyzed to test their asymptotic running time complexity, and programmed in accordance with prototype of the study for testing and validation. The results showed high success rate of 94.4% for sharing of resources among clouds with mean allocation time of 12 microseconds. It was observed that 94.4% of the time clients' requests were fulfilled successfully after borrowing the resources from cloud network. An average of 100% results were collected for protecting multiple clouds from same attack by sharing the attacks and intruders information among clouds in different situations. It is therefore concluded that cross-cloud communication framework can benefit for sharing of resources and attacks information among clouds for efficient resource management and allocation and, protection against same attacks at different clouds.
